Thirty-ninth session
Geneva, 18–20 April 2007
Item 5 of the provisional agenda

**2006 REVIEW OF STRATEGIES AND POLICIES FOR
AIR POLLUTION ABATEMENT**

Additional material

Note by the secretariat

Corrigendum

1. Page 2

After paragraph 4, insert a new paragraph, reading

4bis. The Convention's work continues to be underpinned by strong science. Monitoring gives basic information on pollutant levels and environmental damage and recovery as well as providing data that are essential for driving dose-response mechanisms and for developing predictive models. Linking these scientific activities and policy development, for example by using integrated assessment modelling, remains an important feature of the Convention's approach to developing protocols and abating air pollution.

2. Page 3, paragraph 8

After second sentence, insert

In addition, many Parties are keen to consider synergies and trade-offs with climate change and take account of the nitrogen cycle in such a new protocol development.

3. Page 4, paragraph 13

After clean transport systems; insert

dust abatement measures;
