

*Proposal on the organization and shape
of the regular process of environmental
assessment in the ECE region*

***Working Group on Environmental Monitoring and Assessment
17th session***

Geneva, 7-8 September 2015

Lukasz Wyrowski, Manager, UNECE Programme
on Environmental Monitoring and Assessment

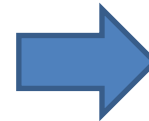

Task for FoS in 2015

The organization and shaping of the regular environmental assessment process taking into consideration the benefits of SEIS

SEIS in action

Common pan-European environmental knowledge base is being developed (through pan-European SEIS in action)

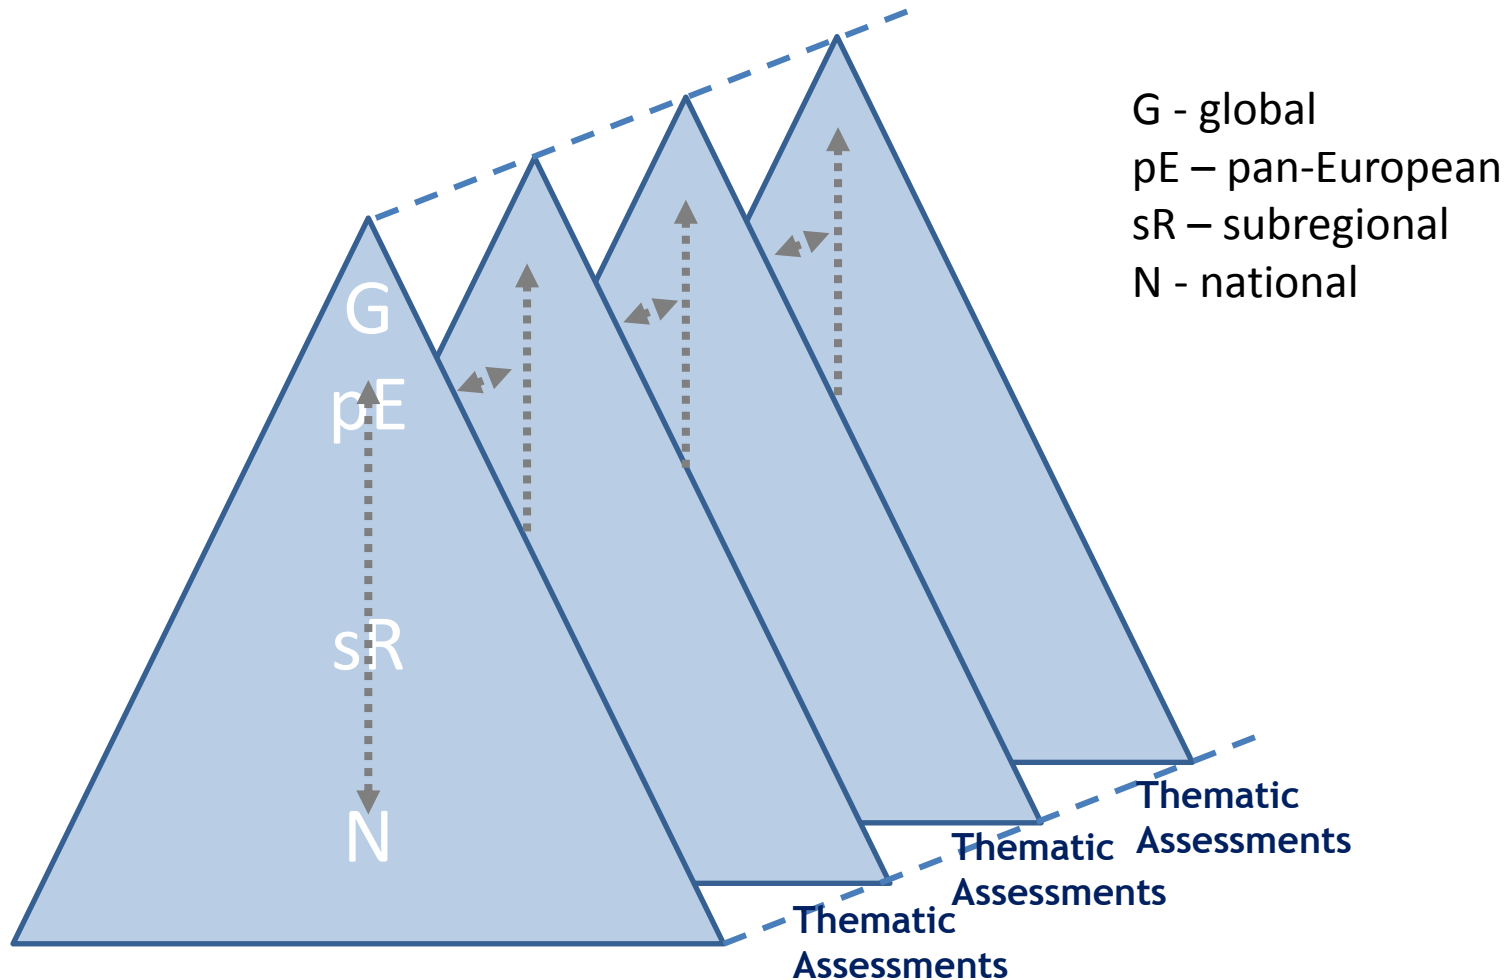

Good basis for generation of assessments

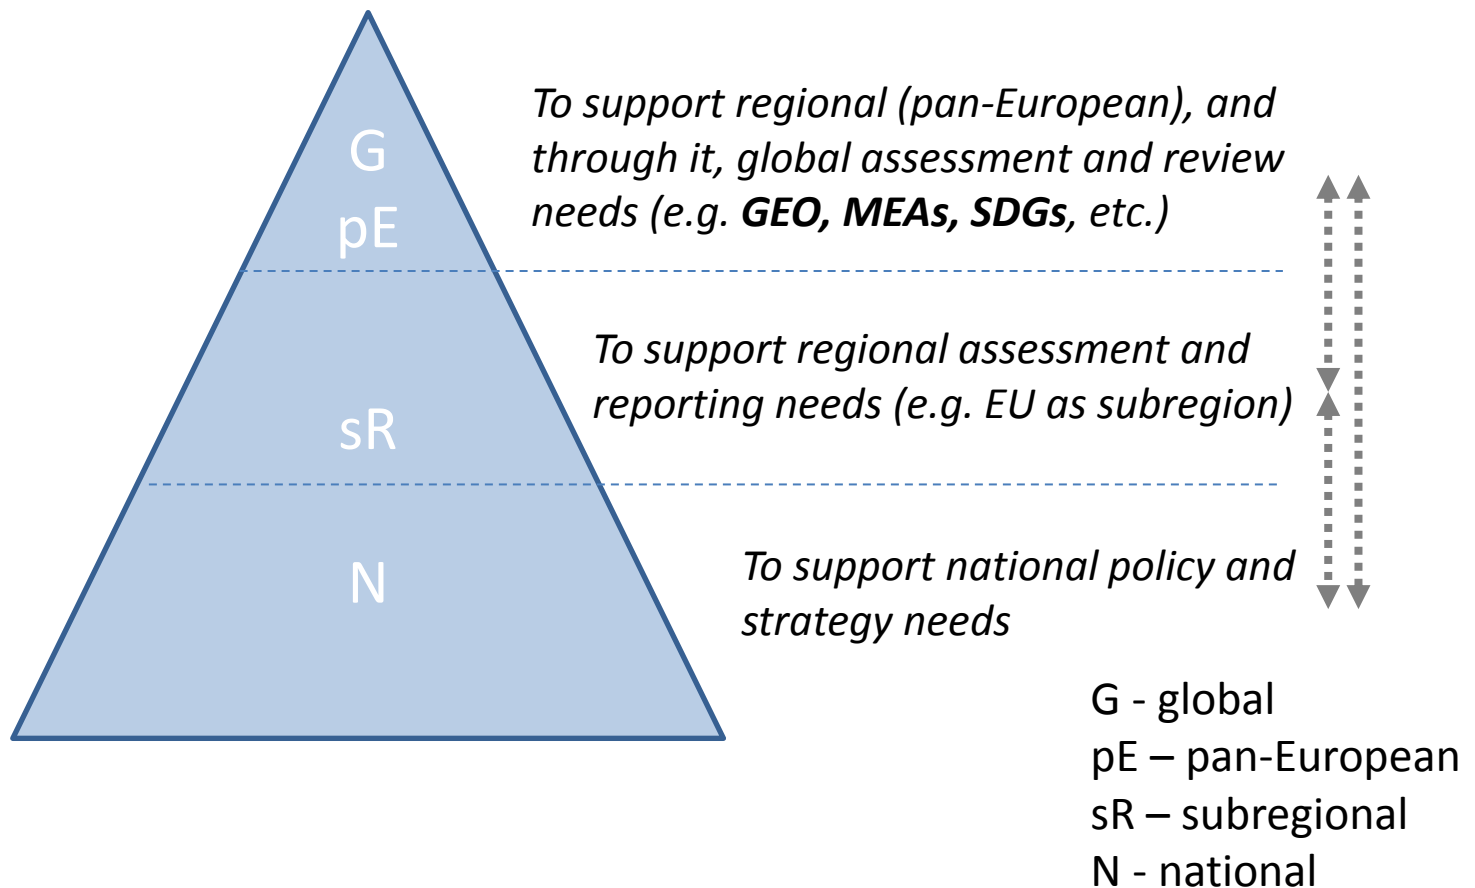

Performance management being set up (would allow in a simple way to assess on-line available and accessibility of data and information, and if such not ensured to identify possible performance gaps as per the SEIS targets and performance indicators)

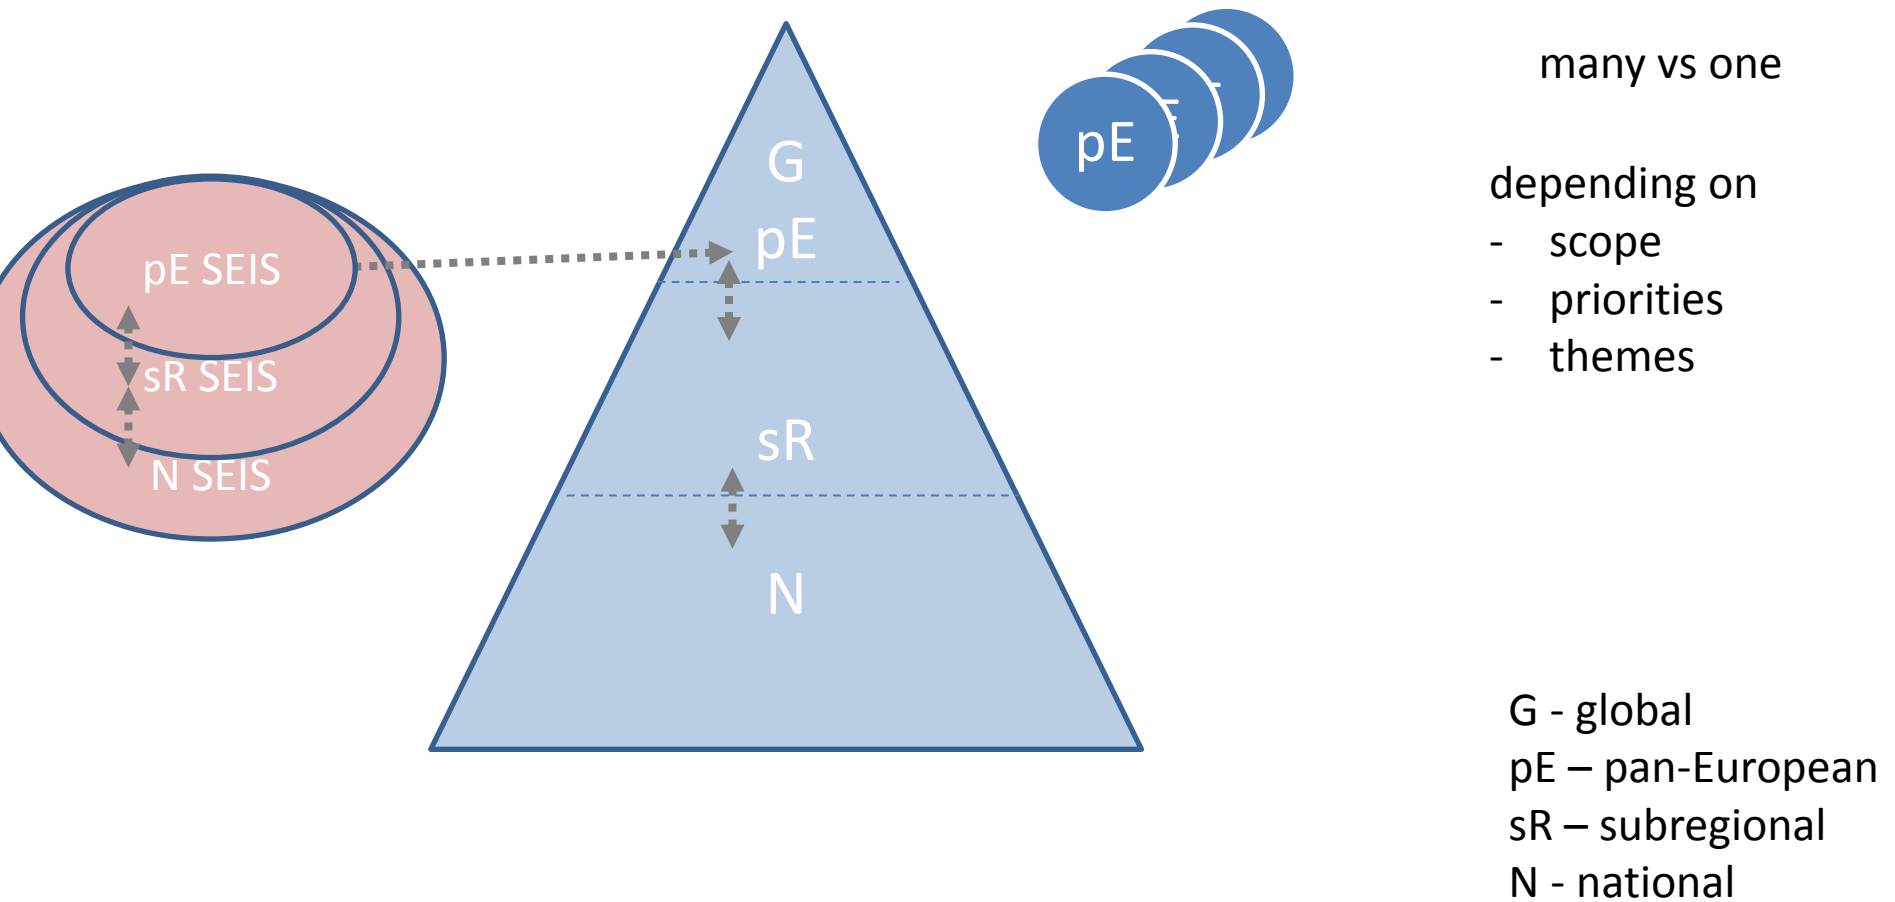

Regular process of environmental assessment

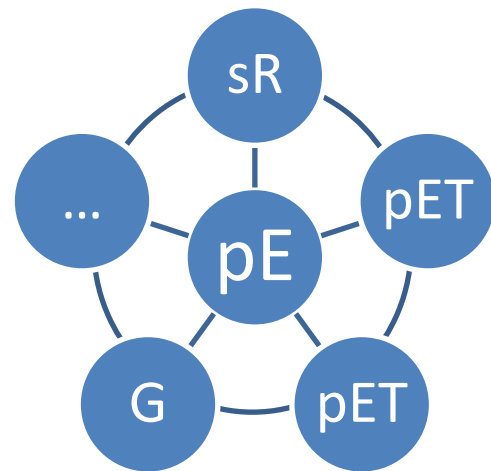

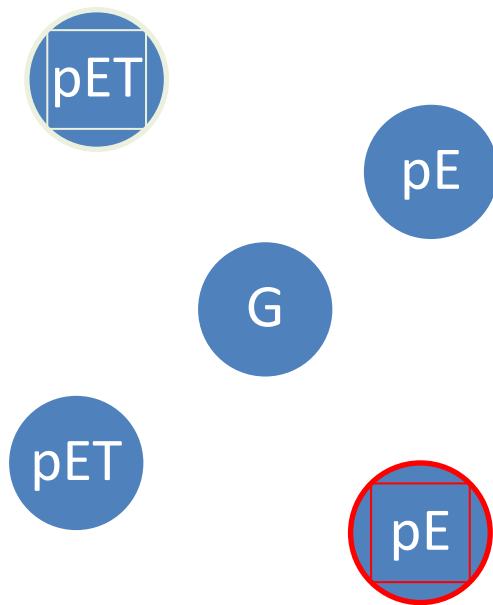

Regular process of environmental assessment

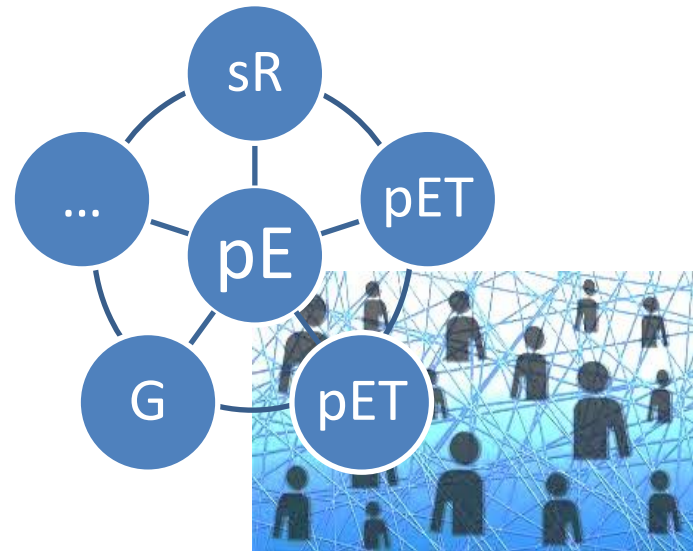

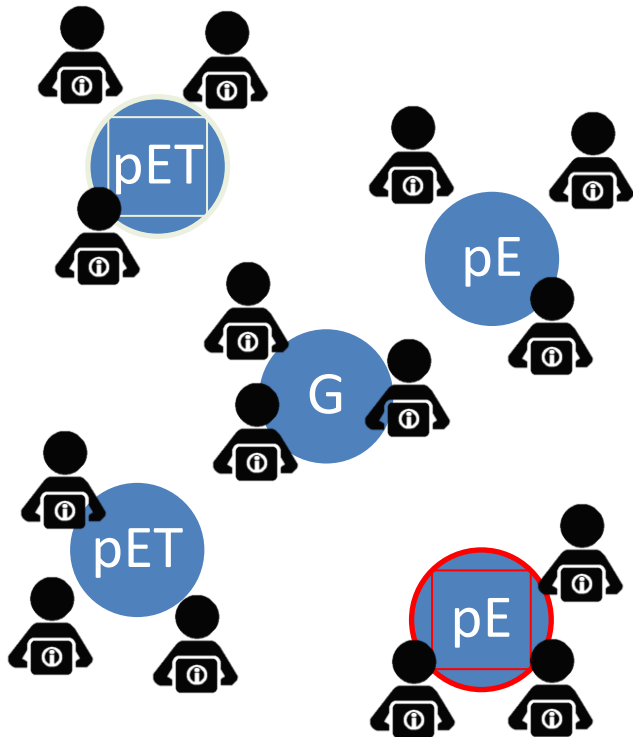

Regular process of environmental assessment
