

Climate change is an opportunity to make cities sustainable

The attempts and examples of sustainable cities throughout history are numerous

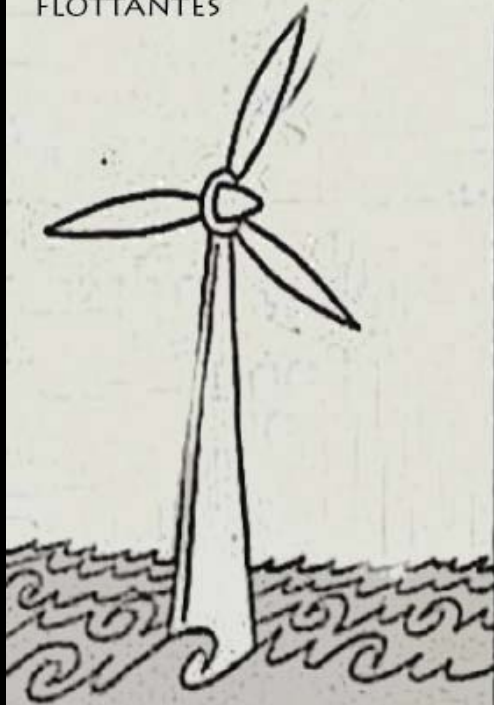

Climate change provides clear targets

1. Direct benefits to reduce greenhouse gas emissions and fight climate change
2. Direct and indirect economic, environmental and social benefits
3. Direct and indirect benefits to individual citizens and their welfare

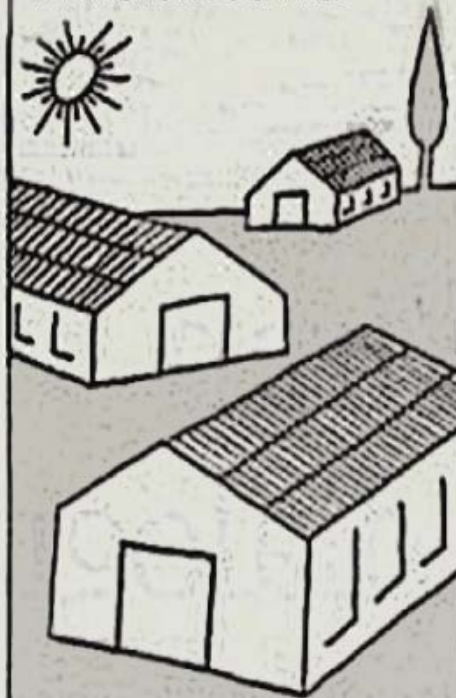

L'ÉCOLOGIE BOUGE.
DANS LA MER, ON CONSTRU-
IT D'ENORMES ÈCOLIENNES
FLOTTANTES

ECOLOGY MOVES.
IN THE SEA, WE BUILD HUGE
FLOATING WINDMILLS.

DANS LES CAMPAGNES, ON
COUVRE LES TOITS AVEC DES
PANNEAUX SOLAIRES

IN THE COUNTRYSIDE, WE
COVER ROOFS WITH
SOLAR PANELS.

QUAND, EN VILLE...ON EN
FAIT DE LA POLITIQUE

WHEN, IN THE CITY...
...IT BECOMES POLITICS.
