Improving data collection on population migration

- Information system "Statistical Population Register" is compiled (**ИС СРН**) (IS SPR)

2011

all data in SPR are obtained online

- From information systems of the Ministry of Internal Affairs (Registration point for documentation and registration of the population) and the National Security Committee (Berkut)

- **Statistical records of arrivals/departures include new characteristics: IIN (Individual Identification Number), citizenship, place of birth**

2016

Difficulties in using administrative data to measure migration by the UN recommendations

Database on population migration based on IS SPR will be possible only <u>after achieving comparability level of data 95-100 %.</u>

not all information is in digital format

possibility of double counting when combining information from various sources

false information on persons

data comparability at approximately 50-60%

Administrative source reports are provided in abstracts

INTEGRATION OF SPR AND ADMINISTRATIVE SOURCES
