

Measurement Framework of Violence Against Women

**UNECE Work session on Gender Statistics
29 November – 1 December 2017**

Strategic framework on Violence against Women 2015 – 2018

Improvement of data collection in the Member States

- Address data gaps and improve quality of data
- Support in collecting quality data
- Support in meeting reporting / monitoring requirements for the Victims' Rights Directive and the Istanbul Convention
- Prepare the methodology for collection of data

Activities in support of the Member States

- Propose and implement specific actions to facilitate improvement of the quality of data
- Integrate violence against women within EIGE's gender statistics database
- Cooperate continuously with Eurostat
- Support the mainstreaming of gender into future data collection on violence against women

International Framework: Need of a harmonised reporting

Indicators

27.5

Violence

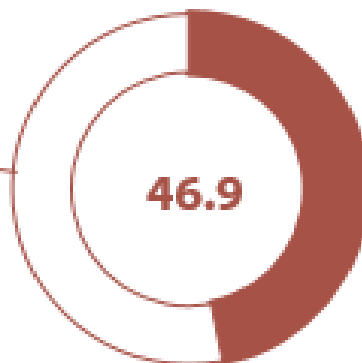

Prevalence

Physical and sexual violence

Femicide (not included)

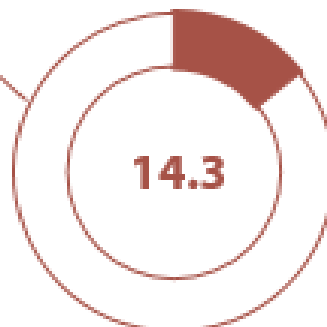

Severity

Multiple victimization

Health consequences

Disclosure

Disclosure of violence experienced in the past 12 months

EIGE's elaboration from FRA, 2012

Data on femicide is published for only 13 EU MS.

A woman is killed everyday by a partner or former partner

For 70% of victims of physical or sexual violence, violence leads to health consequences

Almost 1 victim in two in the EU has not disclosed her experience to anyone

**Women are not leading violence-free lives but lives marked by silence.
Let's change this**
