## Important Classifications, Definitions and Conventions

- Industry classification: ISIC 4.0
- Groundwater abstracted: Includes water from springs
- Surface water abstracted: Includes bank filtration and rainwater collection
- Water used by the electricity industry: Excludes water used for hydropower

## Important Classifications, Definitions and Conventions

### Water import and export:

- Excludes bottled water
- Bulk water accross national boundaries: Ship, truck, container, pipeline

#### Reused water:

- Wastewater (treated or untreated) supplied to another user
- Excludes recycled water within the same establishment
- Excludes wastewater which has been returned to the environment and is abstracted downstreams

### Questions, comments?

Thank you for your attention!
