

Data sources for Business Registers

Volker Täube

EFTA Statistical Office Luxembourg

Outlook

- Administrative data sources from the public sector
- Administrative data sources from the private sector
- Issues in combining administrative data sources
- Combining administrative and statistical data sources

Administrative data sources: Public Sector

- Tax registers
- Social security registers
- Business registration/license registers
- Central Bank
- Agricultural administrative registers

Administrative data sources:

Private Sector

- Company / trade associations and chambers of commerce registers
- Industry association registers
- Water supply registers
- Electricity associations' registers

Issues in combining administrative data sources

- Definitions of units (Profiling)
- Definitions of variables, classifications
- Timeliness
- Matching data (UID, address, etc.)
- Consistency between sources
- Political changes and impacts on administrative data

Combining administrative and statistical data sources

- Profiling: Build and define the structure of mainly large enterprises and enterprise groups using company accounts and information from enterprise officials
- Dedicated improvement surveys for SBR
- Using information from enterprise and/or establishment surveys (update contact information, Deaths, etc.)

Thanks for your attention!
