

Providing statistical services to government

HL seminar Seoul, 20th March 2017 – Bert Kroese

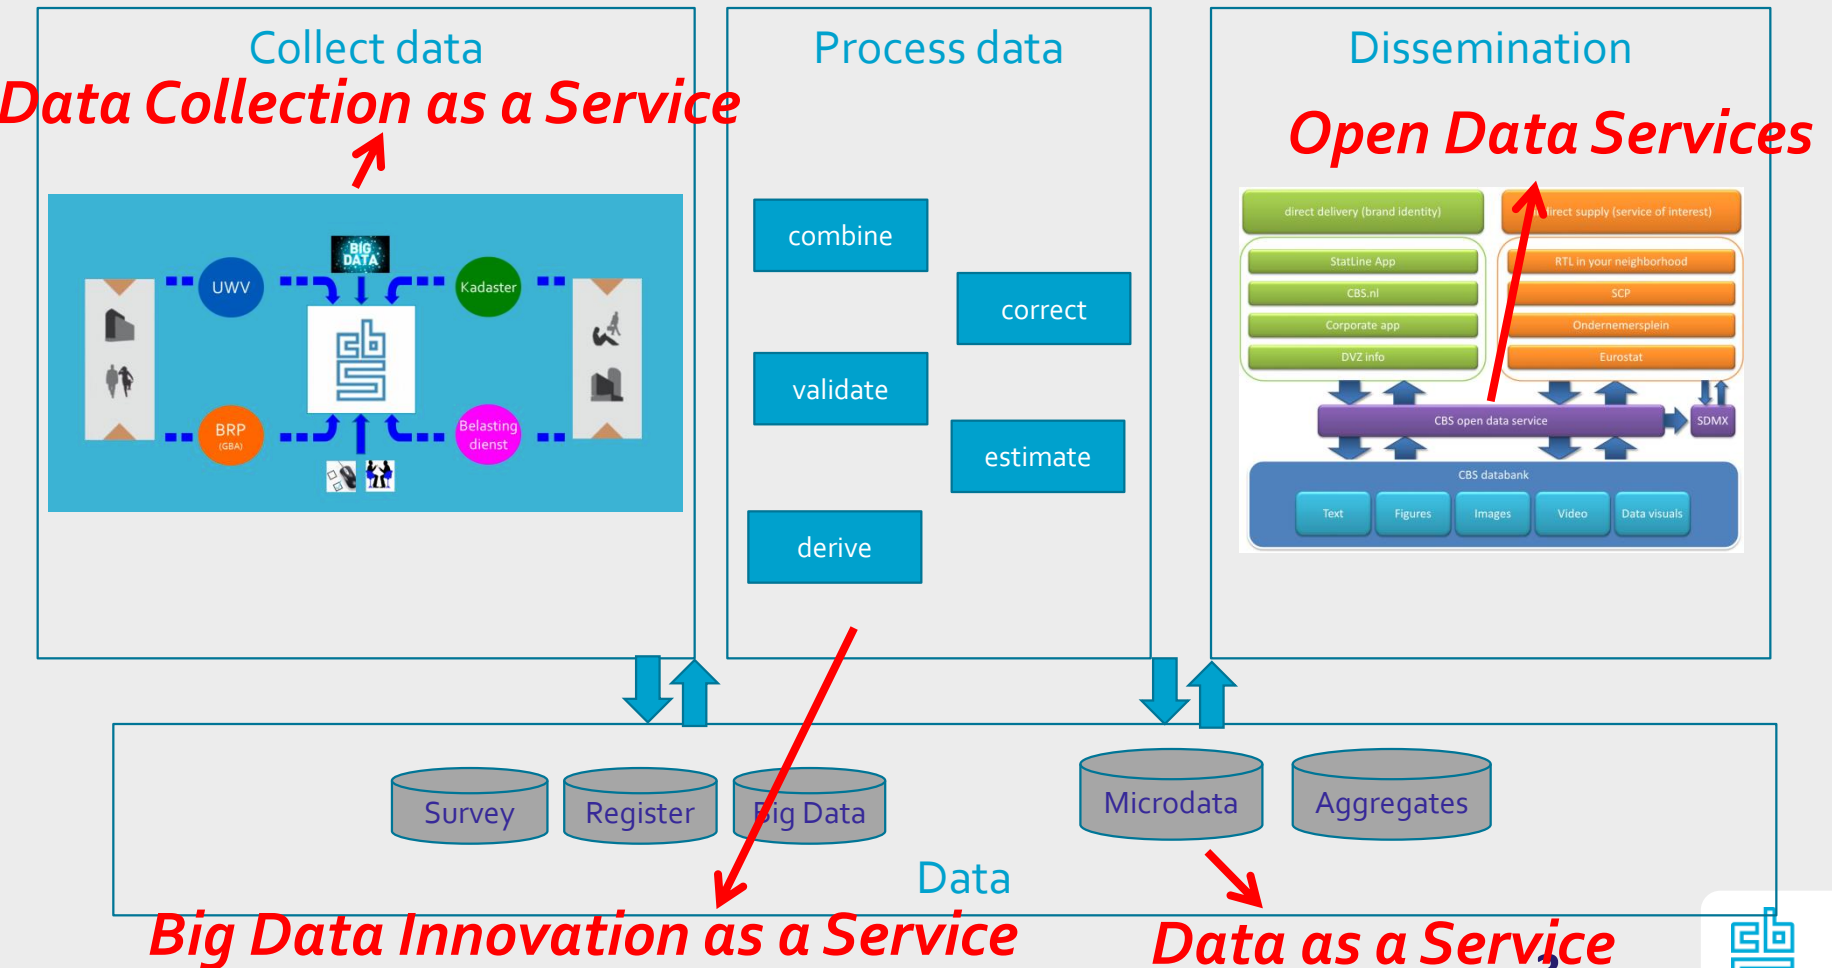

Statistics
Netherlands

This is our traditional task:

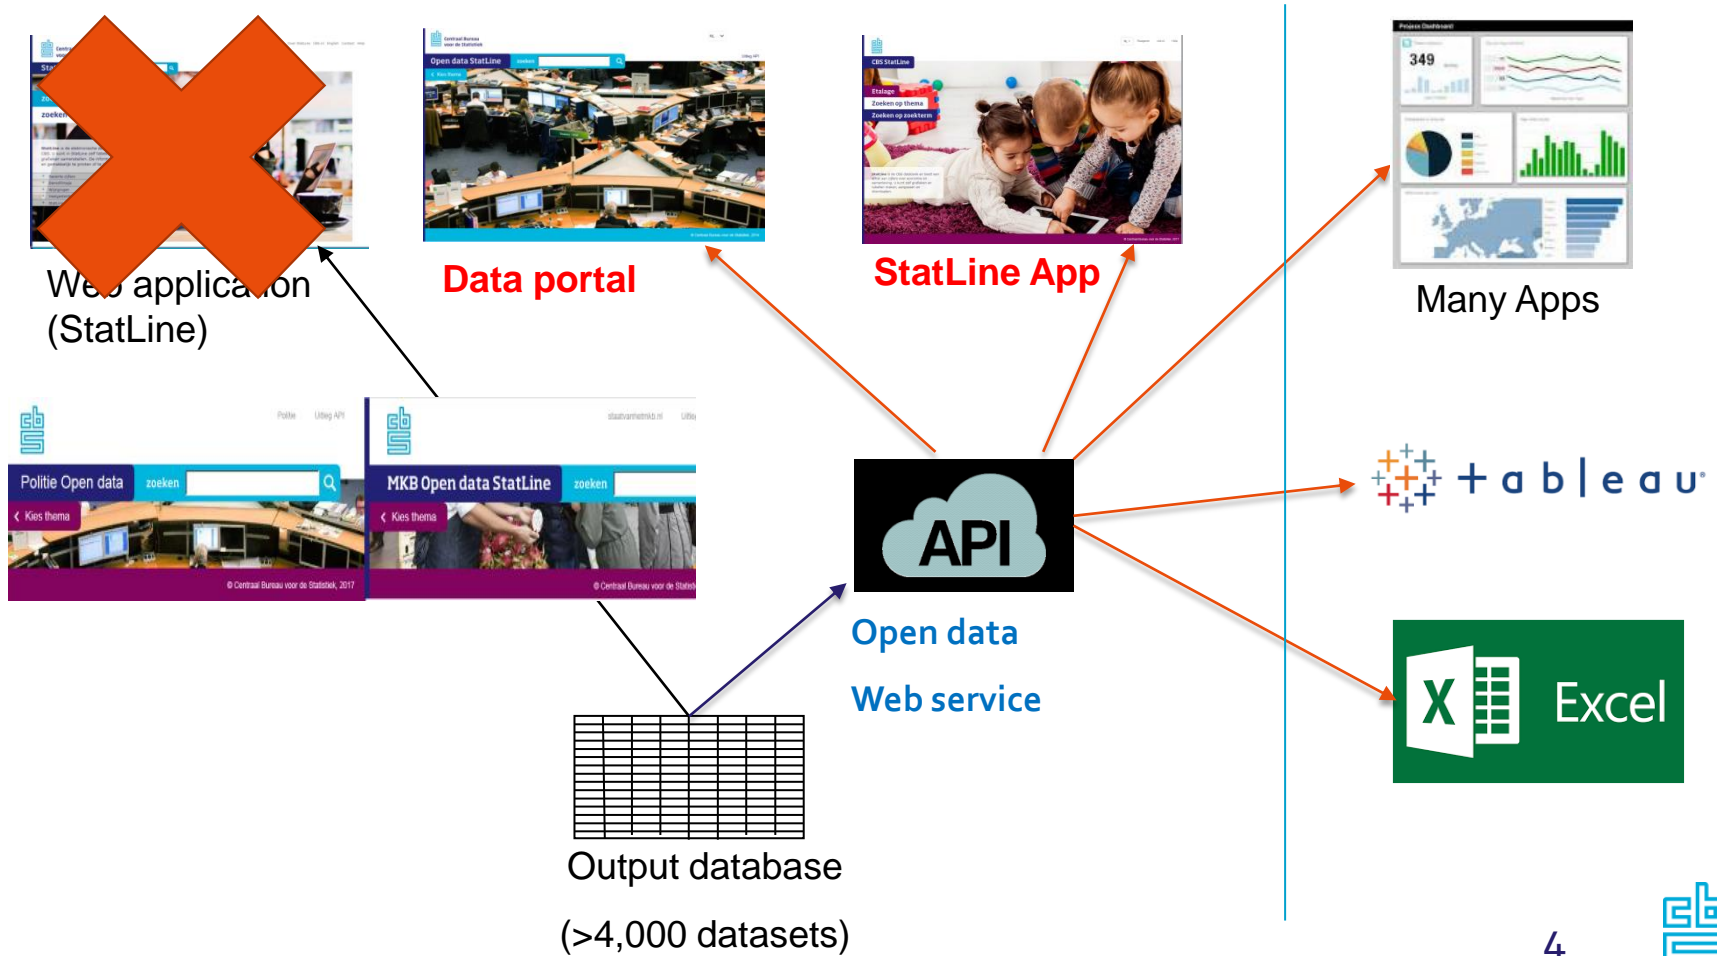

**To publish reliable and
coherent statistical information
which responds to the needs of
Dutch society**

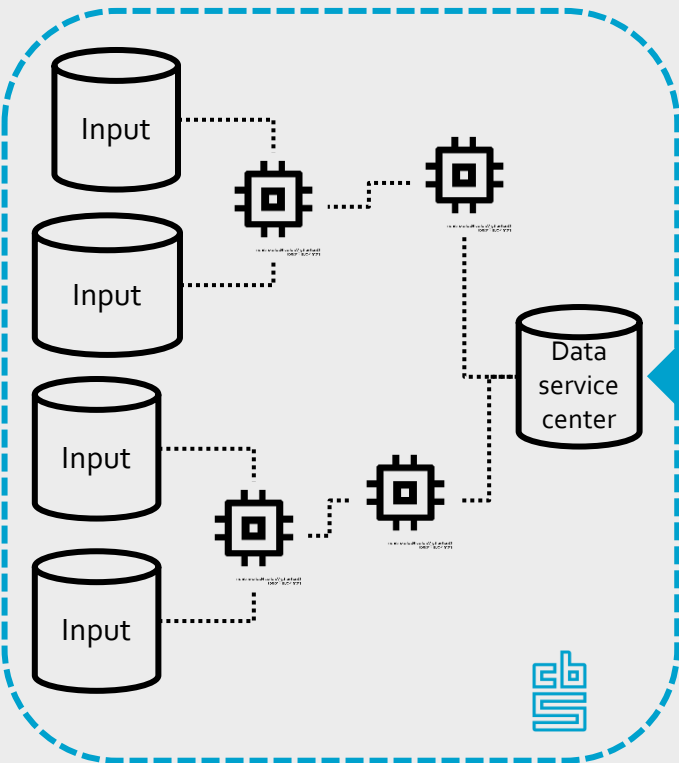

And this is what we do:

Open data services

Data as a service (present)

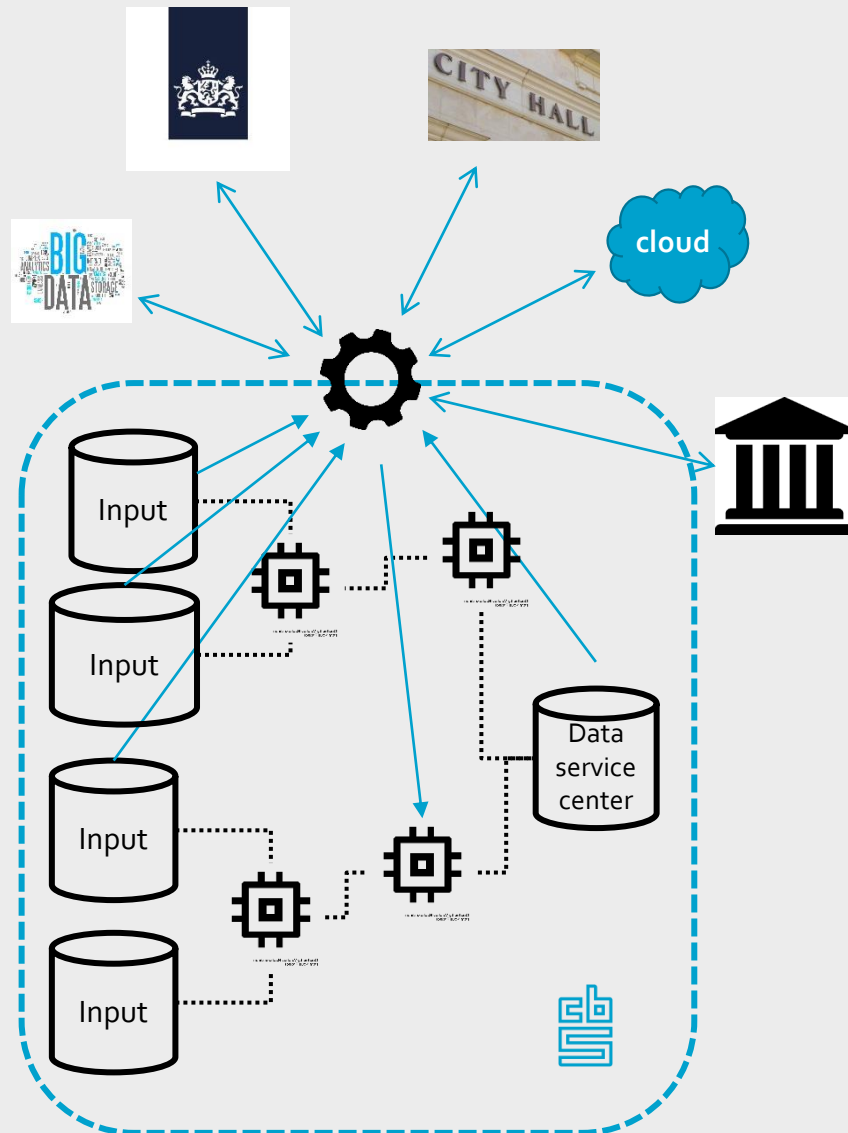

Remote access
Analysis services

- Departments
- Municipalities
- Universities
- Other government agencies

Data as a service (work in progress)

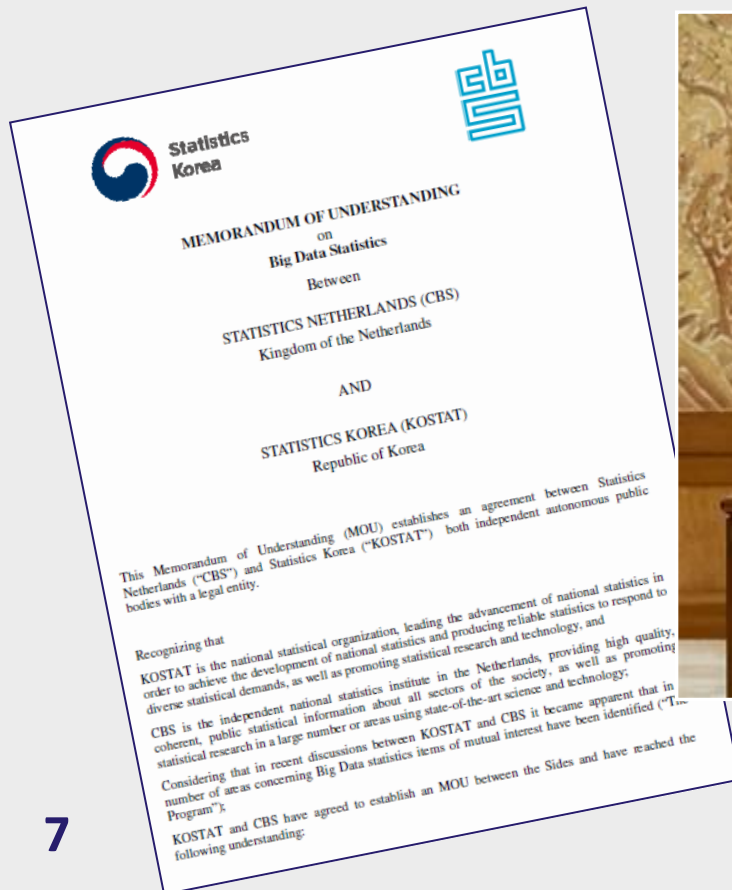

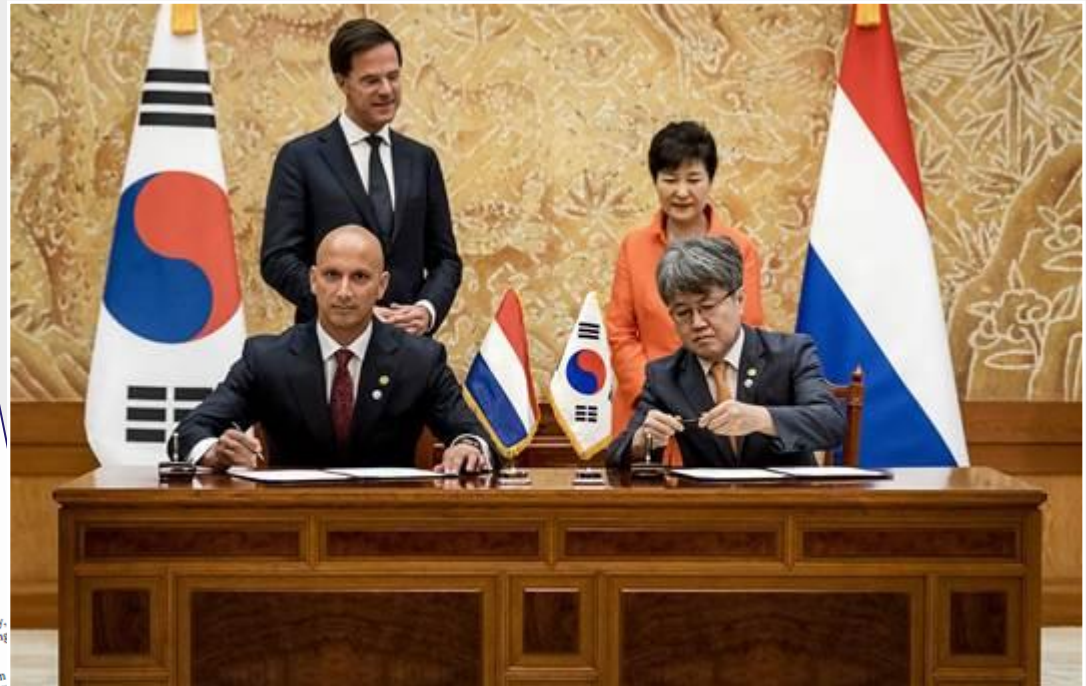

- Always latest information
- Distributed Data
- Sensitive Data

Security and access management very important!

Center for big data statistics

Official Launch 27 September 2016

Partner network

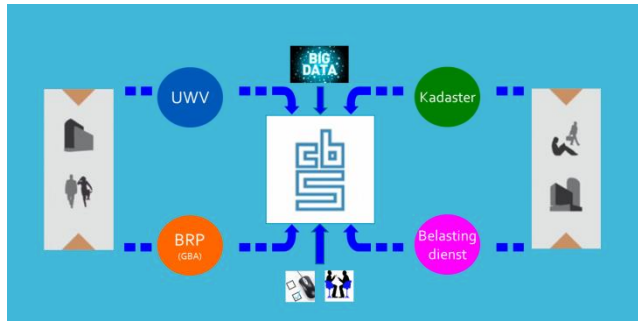

Urban/Departmental/Provincial/Parliamentary Data Center

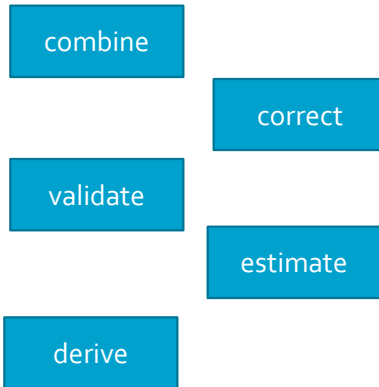

Providing statistical services to government

Collect data

Data Collection as a Service

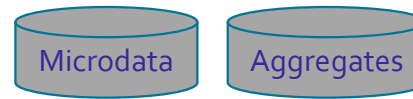

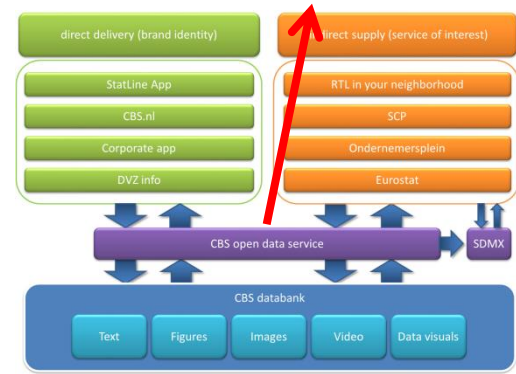

Process data

Dissemination

Open Data Services

Data

Big Data Innovation as a Service

Data as a Service
