

# Reliable road safety statistics – Monitoring SDG3

**Alex Blackburn**

*Podgorica, 11-12 October 2017*

# Overview

- SDG 3 and the Regional Context
- Glossary common definitions and data challenges
- How are data collected?
- UNECE road safety data collection and breakdown

# Sustainable Development Goal 3

- TARGET: 3.6: By 2020, halve the number of global deaths and injuries from road traffic accidents
- Indicator: 3.6.1: Death rate due to road traffic injuries

Read more at <https://sustainabledevelopment.un.org/sdg3>

# Road deaths in ECE

- 24% regional drop between 2005 and 2015
- ~8% reduction per year 2007-2010, but broadly flat since
- Positive trend masks huge differences between countries.

# Data Quality

Road accident fatalities per million inhabitants

Road accident injuries per million inhabitants

- Are road safety data from Countries A and B comparable?
- Higher accident severity in Country B? Differing definitions? Statistical capabilities?

# The Glossary

- Glossary for Transport Statistics - Joint publication with ITF and Eurostat
- Common set of definitions for all transport modes
- Currently on 4th edition and work now starting on a 5th
- Widely used by countries, reflected in many national classification systems

# Glossary Definitions

## B.VII-01 Injury accident

Any accident involving at least one road vehicle in motion on a public road or private road to which the public has right of access, resulting in at least one injured or killed person.

- *A suicide or an attempted suicide is not an accident but an incident caused by a deliberate act to injure oneself fatally. However, if a suicide or an attempted suicide causes injury to another road user, then the incident is regarded as an injury accident.*
- *Included are: collisions between road vehicles; between road vehicles and pedestrians; between road vehicles and animals or fixed obstacles and with one road vehicle alone. Included are collisions between road and rail vehicles. Multi-vehicle collisions are counted as only one accident provided that any successive collisions happen within a very short time period.*
- *Injury accidents exclude accidents incurring only material damage.*
- *Excluded are terrorist acts.*

# Glossary Definitions

## B.VII-05 Person killed

Any person killed immediately **or dying within 30 days as a result** of an injury accident, excluding suicides.

- *A killed person is excluded if the competent authority declares the cause of death to be suicide, i.e. a deliberate act to injure oneself resulting in death. For countries that do not apply the threshold of 30 days, conversion coefficients are estimated so that comparisons on the basis of the 30 day-definition can be made.*

## B.VII-06 Person injured:

Any person who as result of an injury accident was not killed immediately or not dying within 30 days, but sustained an injury, normally needing medical treatment, excluding attempted suicides.

- ***Persons with lesser wounds, such as minor cuts and bruises are not normally recorded as injured.***
- *An injured person is excluded if the competent authority declares the cause of the injury to be attempted suicide by that person, i.e. a deliberate act to injure oneself resulting in injury, but not in death.*

# Data Sources

- **Police** accident reports. **Not** a survey, all reported accidents noted and filed
- **Unreported** accidents (even serious ones) may be excluded. Can cause significant underreporting
- **Hospital data** can be used too, but definitions may be different.
- Statisticians should work closely with the police to improve the data and collection methods
- Be **pragmatic** on data collection

# Accident Form Example

1.5	Number of vehicles	<input type="text"/>			
1.6	Number of casualties	<input type="text"/>			
1.14	ROAD TYPE	<input checked="" type="checkbox"/>			
	Roundabout	1			
	One way street	2			
	Dual carriageway	3			
	Single carriageway	6			
	Slip road	7			
	Unknown	9			
1.15	Speed Limit (Permanent)	<input type="text"/>			
1.16	JUNCTION DETAIL	<input checked="" type="checkbox"/>			
	Not at or within 20 metres of junction	00			
	Roundabout	01			
	Mini roundabout	02			
	T or staggered junction	03			
	Slip road	05			
	Crossroads	06			
	Multiple junction	07			
	Using private drive or entrance	08			
	Other junction	09			
<b>JUNCTION ACCIDENTS ONLY</b>					
1.17	JUNCTION CONTROL	<input checked="" type="checkbox"/>			
	Authorised person	1			
	Automatic traffic signal	2			
	Stop sign	3			
	Give way or uncontrolled	4			
1.20a	PEDESTRIAN CROSSING - HUMAN CONTROL	<input checked="" type="checkbox"/>			
	None within 50 metres	0			
	Control by school crossing patrol	1			
	Control by other authorised person	2			
1.20b	PEDESTRIAN CROSSING - PHYSICAL FACILITIES	<input checked="" type="checkbox"/>			
	No physical crossing facility within 50m	0			
	Zebra crossing	1			
	Pelican, puffin, toucan or similar non-junction pedestrian light crossing	4			
	Pedestrian phase at traffic signal junction	5			
	Footbridge or subway	7			
	Central refuge — no other controls	8			
1.22	WEATHER	<input checked="" type="checkbox"/>			
	Fine without high winds	1			
	Raining without high winds	2			
	Snowing without high winds	3			
	Fine with high winds	4			
	Raining with high winds	5			
	Snowing with high winds	6			
	Fog or mist — if hazard	7			
	Other	8			
	Unknown	9			
1.23	ROAD SURFACE CONDITION	<input checked="" type="checkbox"/>			
	Dry	1			
	Wet / Damp	2			
	Snow	3			
	Frost / Ice	4			
	Flood (surface water over 3cm deep)	5			
1.21	LIGHT CONDITIONS	<input checked="" type="checkbox"/>			
	Daylight: street lights present	1			
	Daylight: no street lighting	2			
	Daylight: street lighting unknown	3			
	Darkness: street lights present and lit	4			
	Darkness: street lights present but unlit	5			
	Darkness: no street lighting	6			
	Darkness: street lighting unknown	7			
1.24	SPECIAL CONDITIONS AT SITE	<input checked="" type="checkbox"/>			
	None	0			
	Auto traffic signal out	1			
	Auto traffic signal partially defective	2			
	Permanent road signing or marking defective or obscured	3			
	Roadworks	4			
	Road surface defective	5			
	Oil or diesel	6			
	Mud	7			
1.25	CARRIAGEWAY HAZARDS	<input checked="" type="checkbox"/>			
	None	0			
	Dislodged vehicle load in carriageway	1			
	Other object in carriageway	2			
	Involvement with previous accident	3			
	Pedestrian in carriageway - not injured	6			
	Any animal in carriageway (except ridden horse)	7			
1.26	Did a police officer attend the scene and obtain the details for this report?	<input checked="" type="checkbox"/>			
	Yes	1			
	No	2			

*Subject to local directions, boxes with a grey background need not be completed if already recorded*

[http://docs.adrn.ac.uk/888043/mrdoc/pdf/888043\\_stats19-road-accident-injury-statistics-report-form.pdf](http://docs.adrn.ac.uk/888043/mrdoc/pdf/888043_stats19-road-accident-injury-statistics-report-form.pdf)

# Collection Challenges

- Turkey's fatalities more than doubled (3524 to 7530) from 2014 to 2015, due to new inclusion of deaths within 30 days (rather than just at scene)
- Hospital data often much higher than police data for bicycle accidents, as not reported to police

# Data Breakdown

- **Location**
  - Motorways
  - inside built-up areas
  - Outside built-up areas
- **Time**
  - Month
  - Day of week: Monday-Thursday, Friday, Saturday, Sunday
- **Light condition**
  - Daylight
  - Twilight (or unknown)
  - Darkness
- **Road condition**
  - Dry road surface
  - Other (wet, icy etc.)
- **Accidents between:**
  - Vehicles and pedestrians
  - Between vehicles
  - Single vehicle accidents
- **Accidents between vehicles:**
  - Rear-end collisions
  - Collisions due to crossing or turning
  - Head-on collisions
  - Collision at level crossing
- **By age of victim:**
  - 0-6, 7-9, 10-14, 15-17, 18-20, 21-24, 25-64, 65 and over
- **By gender of victim**

# Gender Breakdown

- **Three quarters of road deaths are men.** Understanding gender differences in data means policies can be better targeted. E.g. target awareness programmes on males.
- New gender table in our 2017 Publication

# Gender and Age

- Data breakdown in Switzerland shows adult males 25-64 years old ~40% of all deaths. Allows evidence-based policy making

# UNECE Data for SDG 3

- **Ongoing updates**

- UNECE Statistical Database - [w3.unece.org/PXWeb/en](http://w3.unece.org/PXWeb/en) - latest update June 2017

- **Periodic Updates**

- **Statistics of Road Traffic Accidents in Europe and North America**

- **Transport Statistics Infocards**

# UNECE Data Situation

- Published data go back to 1993, for 55 UNECE countries
- Good data availability at the top level for most countries, but better completeness and timeliness needed
- Data on total number of accidents, number of fatalities and number of injuries, plus breakdown
- UNECE works with the ITF and the E.U. (Care database) to harmonise data collection + reduce reporting burden

# Regional Data

- Bosnia and Moldova already reported data for 2016
- All countries have top-level data for 2014 or later, and data seem comparable
- Better breakdown and consistency of injury numbers would allow better analysis

**Suggestions? Comments?**

**We are here to help!**
