

**United Nations Economic Commission for Europe
(UNECE)**

Programme

**National Capacity-building Seminar on
Information and Communication Technology Policy
and Legal Issues**

**Tashkent, Uzbekistan
1-2 July 2008**

In cooperation with

**COMMUNICATION AND INFORMATION AGENCY OF UZBEKISTAN
(UzACI)**

**UNITED NATIONS DEVELOPMENT PROGRAMME (UNDP),
UZBEKISTAN**

**UNDP INFORMATION AND COMMUNICATION TECHNOLOGY
POLICY PROJECT (ICTP)**

Objectives of the Seminar

The development of information and communications technologies (ICTs) enables businesses and individuals to communicate and engage in transactions with other parties electronically, instantaneously and internationally. This gives rise to a variety of legal and regulatory issues for policymakers, from the validity of electronic methods of contracting and the security risks associated with them, to concerns over cybercrime and the ability to protect intellectual property rights (IPR) online. ICT policymakers are constantly facing challenges in dealing with these issues. The promotion of harmonized law reforms, which would facilitate the sound development of eCommerce and related activities, ensuring that citizens have appropriate protection against harmful behavior, is a way to address these challenges.

The National Seminar will cover legal issues in five distinct areas relevant for the sound development of eCommerce and related activities in Uzbekistan, namely: legal infrastructure, legal certainty, legal security, legal protection and legal deterrence. It highlights and discusses relevant related developments, best practice initiatives at an international level for the reference of ICT policymakers in Uzbekistan.
