

Réponses manquantes aux questions 64, 65 et 66 du questionnaire relatif aux stratégies et politiques tel que sollicité par la décision 2013/21.

Question 64: With reference to article 3, paragraph 8 (a), and annex IX, paragraph 8, please provide details on the use in your country of the low-emission storage systems for new slurry stores (construction commenced after 17 May 2006) on large pig and poultry farms (2,000 fattening pigs, or 750 sows or 40,000 poultry) or techniques that have been shown to reduce emissions by 40 per cent or more compared to the reference listed in guidance document V (ECE/EB.AIR/WG.5/2007/13).

According to the authorizations delivered in Luxembourg for large pig farms 9 out of 11 installations are operated with a floating cover allowing a reduction of 40 %. For the 2 remaining farms the authorization process was handled in 2007/2008. The authorizations are requesting the installation of the reference system.

The first pig farm (> 2000 pigs) was authorized in Luxembourg in the course of 2007/2008. Currently no authorization has been granted for a poultry farms with a capacity over 40,000 poultry.

Question 65: With reference to article 3, paragraph 8 (a) and annex IX, paragraph 9, please provide details of whether emission reductions of 40 per cent have been achieved in your country for existing slurry stores (construction commenced on or before 17 May 2006) on large pig and poultry farms (2,000 fattening pigs, or 750 sows or 40,000 poultry).

The first pig farm (> 2000 pigs) was authorized in Luxembourg in the course of 2007/2008. Currently no authorization has been granted for a poultry farms with capacity over 40,000 poultry.

Question 66: With reference to article 3, paragraph 8 (a) and annex IX, paragraph 10, please provide details of the use in your country of housing systems for new animal housing on large pig and poultry farms which have been shown to reduce emissions by 20 per cent or more compared to the reference listed in guidance document V (ECE/EB.AIR/WG.5/2007/13)

According to the authorizations delivered in Luxembourg for large pig farms 9 out of 11 installations are operated with a partly-slatted floor with manure channel with slanted side wall(s) allowing a reduction of 60 %. For the 2 remaining farms the authorization process was handled in 2007/2008. The authorizations are requesting the installation of a fully-slatted floor.
