## The mayor of Almendralejo accuses of "new inquisitors" the members of the Platform Against the Contamination

Extremadura al Día

On January 15, 2008

José M<sup>a</sup> Ramírez, mayor of  
Almendralejo

The mayor of Almendralejo, José María Ramírez, considered today the members of the Platform Against the Contamination as "new inquisitors".

The first town councilor of Almendralejo did these declarations today in the morning on having been present at the act of opening of a new portal of Internet in Almendralejo.

The accusations take place after the announcement on the part of the Junta of Extremadura of opening sanctioning records for a "serious infraction" to the company Vinibasa that manages residues of exhausted residues.

According to Ramírez, this organization devotes itself to "to do exclusively accusations and not to work for the environment of the city".

In this sense he continued saying that "they only try to promote the scandal in the city, looking for his advertizing on having done accusations without foundation".

About Vinibasa he said, that the only thing that has been done is to open sanctioning records, by what "conclusions must not be extracted until there is a firm decision".

Finally, Ramírez Moran ended up by announcing news related to this company that it will announce "in its moment".
