The mayor, José María Ramírez , assured last Saturday that keeps on considering that the comments that he fulfilled in the 2008 on the members of the Plataforma Contra la Contaminación de Almendralejo in which he branded them as inquisitors , the manipulators and ignorants are not insults

Last Saturday the mayor received a resolution of the Aarhus Convention Compliance Committee of the UN in which it indicated the acceptance the Plataforma had done in front of the aforementioned committee for said comments of the mayor. According to Ramírez, in resolution it is indicated that the attitude that he had with the association was not the correct. However, he

asserted that the aforementioned document does not entail any adverse verdicts, fine or sanction for said comments, as the Plataforma indicated in a communication in which it stood out that the UN condemns for harassment the mayor.

In this sense, Ramírez pointed out on Friday he does not believe that he insulted the association when he made those declarations, triggered for the case Vinibasa. Furthermore, he congratulated the Plataforma because they have gotten hold of that a NGO get gratuitous representation in front of the UN and he invited the members of the Platform to form its own political party if they want to do politics.
