

LAW OF UKRAINE

On information

1992

as amended in 2011

Article 13. Information on the state of the environment (ecological information)

1. Information on the state of the environment (ecological information) is information and/or data about:

state of the elements of the environment and its components, including genetically modified organisms, and interactions between these elements;

factors affecting or likely to affect the elements of the environment (substances, energy, noise and radiation, and also activities or measures, including administrative, environmental agreements, politics, legislation, plans and programs);

state of health and safety of people, conditions of life of people, cultural sites and built structures, inasmuch as they are or may be affected by the state of the elements of the environment;

other information and/or data.

2. The legal regime of information on the state of the environment (of ecological information) is determined by the laws of Ukraine and international agreements of Ukraine, a consent to binding nature of which is given by Verkhovna Rada of Ukraine.

3. Information on the state of the environment (ecological information), except for information on location of military facilities, can not be limited.
