members of the Committee on Environmental Policy,
Nature Resources Utilisation and Elimination of the
Consequences of Chernobyl Catastrophe M.Tomenko
and others

LAW OF UKRAINE **«On Environmental Impact Assessment»**

This Law shall set legal and organisational policies for an environmental impact assessment with a view to avoid and prevent environmental damage, ensure environmental safety, environmental protection, rational use and restoration of natural resources, in the process of decision-making on economic activity likely to cause a significant impact on the environment, taking into account state, public and private interests.

Article 1. Definitions

In this Law the following terms shall have the following meaning:

Impact – any effects caused by a proposed activity on the environment including the effects for such factors as human safety and their health, flora, fauna, biodiversity, soil, air, water, climate, landscape, natural areas and objects, historical monuments or other physical structures or the interaction among these factors; it also includes effects on cultural heritage or socio-economic conditions resulting from alterations to those factors.

Public – one or more natural or legal persons and their associations, organisations or groups.

Proposed activity – a proposed economic activity, which includes construction, expansion, conversion, elimination (dismantling) of objects, other intervention into the environment and landscapes, including mining, and use of man-caused mineral deposits.

Competent local authority – regional, Kyiv and Sevastopol city state administration (relevant unit on ecology and natural resources), state executive authority of the Autonomous Republic of the Crimea on ecology and natural resources.

Competent central authority – central state executive authority, forming and implementing state policy in the field of environmental protection.

Article 2. Content and subjects of environmental impact assessment

1. Environmental impact assessment means a procedure, consisting of:

1) the preparation of an environmental impact assessment Report by the developer pursuant to Articles 5 and 6, as well as, where appropriate, Article 14 of this Law;

2) the carrying out of public consultations pursuant to Articles 7 and 8, as well as, where appropriate, Article 14 of this Law;

3) the examination by the competent authority pursuant to Article 9 of this Law of the information presented in the environmental impact assessment Report, any supplementary information provided by the developer, as well as information received through the public consultations, other information and in the result of the transboundary impact assessment, where conducted;

4) the reasoned environmental impact assessment Decision by the competent authority, which takes into account the results of the examination referred to in point 3 of paragraph 1 of this Article; and

5) the taking into account of the environmental impact assessment Decision in the decision on carrying out the proposed activity pursuant to Article 11 of this Law.

2. The environmental impact assessment shall be carried out taking into account the requirements of the environmental legislation, environmental situation in the location of the proposed activity, environmental risks and forecasts, prospects for the socio-economic development of the region, capacity and types of cumulative impact (direct and indirect) on the environment, including taking into account the impact of existing objects, proposed activity and objects for which the consent has been obtained or which are in the process of being approved.

3. Developers, competent central and local authorities, other state executive authorities, the Supreme Council of the Autonomous Republic of the Crimea, the Council of Ministers of the Autonomous Republic of the Crimea, local self-governance authorities, public and, in cases referred to in Article 14 of this Law, the state of origin and the affected state – shall be the subjects of the environmental impact assessment.

Article 3. Scope of application of the environmental impact assessment

1. The environmental impact assessment shall be mandatory in the process of decision-making on carrying out the proposed activity identified in paragraphs 2 and 3 of this Article. Such a proposed activity shall be made subject to the environmental impact assessment before the decision on carrying out the proposed activity is made.

2. The first category of the types of the proposed activity and objects likely to cause a significant impact on the environment and subject to the environmental impact assessment shall include the following:

1) crude-oil refineries (excluding undertakings manufacturing only lubricants from crude oil) and installations for the gasification and liquefaction of 500 tonnes or more of coal or bituminous shale per day;

2) thermal power stations (TPP and CHP) and other installations for production of electricity, vapour and hot water with a heat input of 50 megawatts or more using organic fuel, nuclear power stations and other nuclear reactors including the construction, decommissioning of such power stations or reactors (except research installations for the production and conversion of nuclear fuel and raw materials for producing secondary nuclear fuel, fissionable and fertile materials whose maximum power does not exceed 1 kilowatt continuous thermal load);

3) installations designed for the production or enrichment of nuclear fuel; installations designed for the processing of irradiated nuclear fuel and high-level radioactive waste; installations designed for the final disposal of radioactive waste, storage (planned for more than 10 years) or processing of irradiated nuclear fuel or radioactive waste in a different site than the production site;

4) production in the field of ferrous and non-ferrous metallurgy (using ferrous metals, ore, enriched ore or secondary raw materials by metallurgical, chemical or electrolytic processes);

5) installations for the extraction, production and processing of asbestos and products containing asbestos (for asbestos-cement products, with an annual production of more than 20 000 tonnes of finished products, for friction material, with an annual production of more than 50 tonnes of finished products, and for other uses of asbestos, utilisation of more than 200 tonnes per year);

6) chemical production including production of basic chemical substances, biochemical, biotechnical and pharmaceutical production, production of plant health products, regulators of plants growth, mineral fertilizers, polymeric and polymer-containing materials, production and storage of nanomaterials of more than 10 tonnes per year, storage of chemical products (basic and consumable stores, storages, bases) irrespective of methods and amounts of production;

7) construction of:

– airports and airfields with a basic runway length of 2 100 m or more;

– highways;

– national and local motorways for common use of four or more lanes, or realignment and/or widening of an existing road of two lanes or less so as to provide four or more lanes, where such new road or realigned and/or widened section of road would be 10 km or more in a continuous length;

– motorways of the first category;

– lines for long-distance railway traffic;

– hydro technical facilities of sea and river ports that can take vessels of over 1 350 tonnes;

– deep water vessel ways including those along natural river beds, specialized canals on land and in shallow marine waters permitting the passage of vessels of over 1 350 tonnes;

8) waste management:

– operations in the sphere of hazardous waste management: storage, installations for the treatment, recycling, recovery, disposal, neutralization, and landfilling;

– operations in the sphere of non-hazardous and other waste management (treatment, recycling, recovery, disposal, neutralization, and landfilling) with the capacity exceeding 100 tonnes per day;

9) groundwater abstraction or artificial groundwater recharge schemes where the annual volume of water abstracted or recharged is equivalent to or exceeds 10 million m³;

10) works for the transfer of water resources between river basins;

11) extraction of petroleum and natural gas on the continental shelf;

12) dams, water reservoirs and other installations designed for the holding back or permanent storage of water, where a new or additional amount of water held back exceeds 10 million m³;

13) pipelines for the transport of gas, oil or chemicals with a diameter of more than 800 mm and a length of more than 40 km;

14) production and processing of cellulous, paper and cardboard from any raw materials with a production capacity exceeding 200 tonnes per day;

15) extraction of minerals, except for minerals of local importance which are extracted by land owners or land users on their land plots with relevant intended use; processing of minerals including the enrichment thereof;

16) installations for storage of petroleum, petrochemical or chemical products with a capacity of 200 000 tonnes or more;

17) installations for the capture of CO₂ streams from installations covered by this list or where the total yearly capture of CO₂ is 1,5 megatonnes or more, geological storage sites of carbon dioxide;

18) waste-water treatment plants with a capacity exceeding 150 000 population equivalent;

19) installations for the intensive rearing of poultry or pigs with more than 60 000 places for poultry, 85 000 places for broilers, 3 000 places for production pigs (over 30 kg); or 900 places for sows;

20) construction of overhead electrical power lines with a voltage of 220 kV or more;

21) all non-selective or gradual logging of main use and non-selective sanitary logging on the territory exceeding 1 ha; all non-selective sanitary logging in the territory and objects of the nature-reserve fund;

22) change to the activity or objects listed in points 1-21 of paragraph 2 of this Article, except for those changes which are not likely to cause a significant impact on the environment pursuant to the criteria established by the Cabinet of Ministers of Ukraine.

3. The second category of the types of the proposed activity and objects likely to cause a significant impact on the environment and subject to the environmental impact assessment shall include the following:

1) deep drilling, in particular: geothermal drilling; drilling for the purpose of storing nuclear waste; drilling for the purpose of water supply, except for drilling to study the stability of the soil;

2) agriculture, forestry and water management:

– agricultural and forestry reclamation, re-cultivation and melioration of lands (water resource management for agricultural purposes including irrigation and melioration) covering the area of 10 ha or more;

– afforestation of the areas exceeding 0,5 ha (except for the reforestation);

– conversion of farming lands into another type of land use (where the new type of land use belongs to at least one type of activity referred to in paragraphs 2 and 3 of this Article) and conversion of particularly valuable lands into another type of land use;

- installations for the rearing of: poultry (40 000 places and more); pigs (1 000 places and more or 500 places and more for sows); cattle and livestock (1 000 places and more); rabbits and other fur animals (2 000 heads and more);
- installations for the industrial recovery, disposal of animal carcasses and/or stockbreeding waste;
- intensive aquaculture with annual capacity of 10 tonnes or more;
- reclamation of land from the sea in the coastal area and on the shelf;
- 3) extractive industry:
 - quarries, open-cast mining and peat extraction;
 - extraction of minerals on the water fund lands;
- 4) energy industry:
 - storage, processing and transportation of hydrocarbon raw materials (natural gas, shale gas, dissolved in oil gas, gas of central-basin type, gas (methane) of coal deposits, condensate, oil, oil bitumen, liquefied petroleum gas) as well as technical solutions regarding gas supply of population and industry;
 - surface storage of fossil fuels on the area of 500 m² and more;
 - industrial briquetting of coal and lignite;
 - industrial installations for the gasification and liquefaction of coal or bituminous shale with the capacity of up to 500 tonnes per day;
 - hydro power plants on rivers regardless of their capacity;
 - hydro accumulating power plants;
 - wind power plants with two or more turbines or constructions higher than 15 meters;
 - thermal power stations (TPP and CHP);
 - installations for production of electricity, vapour and hot water with a heat input of 200 kilowatts or more using organic fuel;
- 5) production and processing of metals:
 - installations for the roasting or sintering of metallic ores (including sulphide ore);
 - installations for the production of pig iron or steel (primary or secondary fusion) including continuous casting with the capacity exceeding 2,5 tonnes per hour;
 - installations for the processing of ferrous metals:
 - a) hot-rolling mills with the output exceeding 20 tonnes of raw steel per hour;
 - b) smitheries with hammers with capacity exceeding 50 kJ per hammer and capacity of heat consumption exceeding 20 megawatts;
 - c) application of protective fused metal coats with the supply of raw steel exceeding 2 tonnes per hour;
 - smelting of ferrous metals with the capacity exceeding 20 tonnes per day;
 - installations for:
 - a) production of non-ferrous crude metals from ore, concentrates or secondary raw materials by metallurgical, chemical or electrolytic processes;
 - b) smelting, including the alloyage, of non-ferrous metals, including recovered products (refining, foundry, etc.), with smelting capacity exceeding 4 tonnes per day for lead and cadmium or 20 tonnes per day for all other metals;

- installations for surface treatment of metals in tanks made of plastic materials using an electrolytic or chemical process, where the size of the processing technological tanks exceeds 30 m³;
 - manufacture and assembly of motor vehicles and manufacture of motor-vehicle engines;
 - shipyards;
 - installations for the construction and repair of aircraft;
 - manufacture and repair of railway rolling stock and railway infrastructure equipment;
 - swaging by explosives;
 - installations for the roasting and sintering of metallic ores;
- 6) mineral industry:
- coke ovens, other installations for manufacturing coke or black-lead;
 - manufacture of cement, cement clinker or lime;
 - manufacture of glass including glass fibre;
 - smelting of mineral substances, production of mineral fibres;
 - manufacture of ceramic products by burning, in particular roofing tiles, bricks, refractory bricks, tiles, stoneware or porcelain with production capacity exceeding 75 tonnes per day and/or kilns with capacity exceeding 4 m³ and setting density per kiln exceeding 300 kg/m³;
 - production of construction materials (bituminous concrete, insulation, asbestos, asbestos products);
- 7) chemical industry:
- production on an industrial scale of pesticides, pharmaceutical products, paint, varnishes, elastomers, peroxides and other chemicals including production on an industrial scale by chemical processing of substances or groups of substances:
- a) installations for the production of organic chemicals, such as:
- simple hydrocarbons (linear or cyclic, saturated or unsaturated, aliphatic or aromatic);
 - oxygen-containing hydrocarbons such as alcohols, aldehydes, ketones, carboxylic acids, esters, acetates, ethers, peroxides, epoxy resins;
 - sulphurous hydrocarbons;
 - nitrogenous hydrocarbons such as amines, amides, nitrous compounds, nitro compounds or nitrate compounds, nitriles, cyanates, isocyanates;
 - halogenic hydrocarbons;
 - organometallic compounds;
 - basic plastic materials (polymers, synthetic fibres and cellulose-based fibres);
 - synthetic rubbers;
 - dyes and pigments;
 - surface-active agents and surfactants;
- b) installations for the production of inorganic chemicals:
- gases: ammonia, chlorine or hydrogen chloride, fluorine or hydrogen fluoride, hydrogen oxides, sulphur compounds, nitrogen oxides, hydrogen, sulphur dioxide, carbonyl chloride (phosgene);

- acids: chromic acid, hydrofluoric acid, phosphoric acid, nitric acid, hydrochloric acid, sulphuric acid, oleum, sulphurous acids;
- bases: ammonium hydroxide, potassium hydroxide, sodium hydroxide;
- salts: ammonium chloride, potassium chlorate, potassium carbonate, sodium carbonate, perborate, silver nitrate;
- non-metals, metal oxides or other inorganic compounds such as calcium carbide, silicon, silicon carbide;
- c) installations for the production of phosphorous-, nitrogen- or potassium-based fertilizers (simple or compound fertilizers);
- d) installations for the production of basic plant health products and of biocides;
- e) installations using a chemical or biological process for the production of basic pharmaceutical products;
- f) installations for the production of explosives;
- g) installations using chemical or biological processing for the production of protein feed additives, ferments and other protein substances;
- h) installations for the surface treatment of substances, objects or products using organic solvents, in particular for dressing, printing, coating, degreasing, waterproofing, sizing, painting, cleaning or impregnating, with a consumption capacity of more than 150 kg per hour or more than 200 tonnes per year;
- 8) food industry:
 - treatment and processing intended for the production of food products from:
 - a) animal raw materials (other than milk) with a finished product production capacity greater than 75 tonnes per day;
 - b) vegetable raw materials with a finished product production capacity greater than 300 tonnes per day (average value on a quarterly basis);
 - c) milk, the quantity of milk received being greater than 200 tonnes per day (average value on an annual basis);
 - packing and canning of more than 10 tonnes of animal and vegetable products per day;
 - manufacture of more than 3 tonnes of dairy products per day;
 - manufacture of more than 5 tonnes of beer and malt per day;
 - confectionery and syrup manufacture of more than 2 tonnes per day;
 - starch manufacturing;
 - fish-meal and fish-oil factories;
 - sugar factories;
- 9) textile, leather, wood and paper industries with production capacity exceeding 1 tonne per day:
 - plants for the pre-treatment (washing, bleaching, mercerisation) or dyeing of fibres or textiles;
 - plants for treatment of skin raw materials and fur;
 - plants for the tanning of skins where the processing capacity exceeds 10 tonnes of finished products per day;

- plants for wood treatment (chemical processing of wood, fibreboard, woodworking production using synthetic resins, wood preservation via impregnation);
- industrial production and processing of cellulose, paper and cardboard from any raw materials;
- 10) rubber industry:
 - manufacture and treatment of elastomer-based products;
- 11) infrastructure projects:
 - industrial estate development projects;
 - construction of residential areas (complexes) and shopping centres, high-rise buildings and car parks covering the area of 0.5 ha and more;
 - construction of airports and airfields with a basic runway length of up to 2 100 m;
 - construction of railway stations, railways and facilities;
 - construction of transshipment terminals and intermodal transshipment facilities, as well as intermodal terminals;
 - construction of dams and other installations designed for the holding back of water or accumulating it on a long-term basis; the works on clearing and dredging of the channel and the bottom of rivers, strengthening river banks, change and stabilization of river beds;
 - construction of tramways, suspended lines, funiculars or similar lines of a particular type, used for passenger transport;
 - construction of underground and ground metro lines as unified complexes, including depot maintenance complexes of buildings; vehicle parks (transport companies with a complex of technical maintenance and repair facilities);
 - installations of long-distance aqueducts and pipelines for long-distance water transportation;
 - construction of main product pipelines (pipelines for the transport of gas, ammonia, oil or chemicals);
 - construction of electrical power lines (overhead and cable) with a voltage of 110 kV or more and substations with a voltage of 330 kV and more;
 - construction of hydro technical facilities of sea and river ports that can take vessels of up to 1 350 tonnes;
 - construction of deep water vessel ways including those along natural river beds, specialized canals on land and in shallow marine waters permitting the passage of vessels of up to 1 350 tonnes;
 - specialized sea or river terminals;
 - coastal work to combat erosion and maritime works capable of altering the coast, i.e. the construction of main hydro technical facilities, underwater dumping of soil, as well as other sea defence works, excluding the maintenance bottom dredging works;
 - waste water treatment installations with the canalization of 10 000 m³ per day or more;
- 12) other activities:

- permanent racing and test tracks for motorised vehicles; test benches for engines, turbines and reactors covering 0.5 ha and more;
 - sludge-deposition sites with the area of 0.5 ha and more located 100 m or closer from water protection zones;
 - permanent and temporal storage of scrap iron with the area of 0.5 ha and more located 100 m or closer from water protection zones;
 - recovery, disposal, treatment, neutralization, and landfilling of household waste;
 - servicing stations, which include colouring chamber, washing facilities, and those used for repair and testing of diesel engines and automotive body repair using the methods of chemical treatment of the surface covering the area of more than 5 ha or the construction thereof within the distance of 100 meters or closer from water protection zones;
 - filling (fuelling) stations and complexes, as well as gas compressor filling stations, liquefied petroleum gas filling stations;
 - facilities for the production of synthetic mineral fibers, production of extruded polystyrene;
 - construction works involving the extraction of sand and gravel, laying cables, pipelines and other communication facilities on the water fund lands;
 - genetic engineering activities, deliberate release and placing on the market of genetically modified organisms and GM-products (in the open system);
 - introduction of alien flora and fauna species into the environment;
 - manufacture of micro biological products;
 - manufacture, storage, recovery and destruction of ammunition of all types, explosive substances, rocket fuel and other toxic chemicals;
- 13) tourism and leisure:
- ski runs, ski lifts, cable cars and associated facility complexes with the area of 0.5 ha and more;
 - yacht clubs, yacht and boat parking;
 - holiday villages and hotel complexes with more than 50 rooms outside urban areas and covering the area of 5 ha and more;
 - permanent campsites and caravan sites covering the area of 1 ha and more;
 - golf clubs covering the area of 3 ha and more;
 - thematic entertainment parks covering the area of 1 ha and more;
- 14) commencement of activities to be carried out in the areas with special environmental or heritage status (including parks, forests, territories and objects of the nature reserve fund);
- 15) economic activity that leads to the discharge of pollutants into water, water intake from water bodies when intake of underground water exceeds 300 m³ per day;
- 16) change to the activity or objects listed in points 1-15 of paragraph 3 of this Article, except for those changes which are not likely to cause a significant impact on the environment pursuant to the criteria established by the Cabinet of Ministers of Ukraine.

4. The commencement of the proposed activity referred to in paragraphs 2 and 3 of this Article prior to the environmental impact assessment and the decision on carrying out the proposed activity shall be prohibited.

5. The proposed activity which belongs to the first category and is listed in paragraph 2 of this Article shall be made subject to the mandatory consideration as regards the grounds for the transboundary environmental impact assessment thereof pursuant to the international commitments of Ukraine. Where such a proposed activity is likely to cause a significant adverse transboundary environmental impact, it shall be made subject to the transboundary environmental impact assessment pursuant to Article 14 of this Law.

6. It shall be prohibited to carry out the economic activity, operate the objects, intervene in other manner into the environment and landscapes, including mining and use of man-caused mineral deposits, where full compliance with environmental conditions and implementation of measures, envisaged by the environmental impact assessment Decision, the decision on carrying out the proposed activity and the projects of construction, expansion, conversion, elimination (dismantling) of objects, other interventions into the environment and landscapes, including mining and use of man-caused mineral deposits, as well as changes to this activity or extension thereof, is not ensured.

Article 4. Transparency of environmental impact assessment

1. The timely, adequate and effective informing of the public shall be ensured in the process of the environmental impact assessment.

2. The Notification on the proposed activity subject to the environmental impact assessment, the Notice on the commencement of public consultations on the environmental impact assessment Report, information on the environmental impact assessment Decision and the decision on carrying out the proposed activity (indicating the authority, reference number and the date thereof) shall be made public by posting thereof on the official Internet website of the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, of the competent central authority, indicating the date of the official disclosure of the document.

3. The Notification on the proposed activity subject to the environmental impact assessment, the Notice on the commencement of public consultations on the environmental impact assessment Report shall be made public by the developer no later than 5 working days of submission thereof to the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, to the competent central authority, by publishing thereof in the printed mass media (at least two) identified by the developer, the territory of dissemination of which covers the administrative-territorial units likely to be affected by the proposed activity, as well as placed on the notice boards of the local self-governance authorities or in other public places in the location of the proposed activity or shall be made public by any other means that guarantees the informing of the inhabitants of the relevant administrative-territorial unit in the location of the planned object, or the relevant

community, which is affected or likely to be affected by the proposed activity, and of other stakeholders.

4. The information on the environmental impact assessment Decision and the decision on carrying out the proposed activity (indicating the authority, reference number and the date thereof) shall be made public by the developer within 5 working days of the receipt thereof by the developer, by publishing it pursuant to the procedure established by paragraph 3 of this Article for the Notification on the proposed activity subject to the environmental impact assessment and the Notice on the commencement of public consultations on the environmental impact assessment Report.

5. The environmental impact assessment Report and other documentation requisite for the environmental impact assessment shall be open (with due account of the requirements of paragraph 8 of this Article) and provided by the competent authority, local self-governance authority and the developer for examination. Access to the environmental impact assessment Report and other documentation on the proposed activity shall be ensured through placing thereof in accessible points of access to the public in the premises of the competent authority, local self-governance authority of the relevant administrative-territorial unit, affected or likely to be affected by the proposed activity, in the premises of the developer, and, additionally, may be placed in other public places, identified by the developer. The public shall be provided at that with opportunities to make copies (photocopies) and extracts from the documentation, as well as with opportunities to examine information at its location.

6. The competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, local self-governance authorities of the relevant administrative-territorial unit, affected or likely to be affected by the proposed activity shall provide the developer, within 3 days of his request, with opportunities to disclose the documents and information referred to in paragraphs 3 and 4 of this Article, and placement and access to documentation referred to in paragraph 5 of this Article, in places accessible to the public in the premises of the competent authority or the local self-governance authority.

7. The competent local authority and the competent central authority shall ensure free of charge public access to all information (with due account of the requirements of paragraph 8 of this Article) relevant to the decision-making process as it becomes available.

8. In exceptional cases where the documentation on the proposed activity or the environmental impact assessment Report contain confidential information of the developer, such the information upon the reasoned request of the developer shall be detached and the remaining information shall be provided to the public for examination. However, the information on the environmental impact, including quantitative and qualitative indicators of emissions and discharges, physical and biological factors of impact, use of natural resources and waste management shall not be restricted and shall be open.

9. The publication in the printed mass media, the placement on the notice boards and the production of copies for their physical allocation with a view to

inform the public, shall be ensured by the developer. At the time of submitting the environmental impact assessment Report, the developer shall simultaneously provide the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, with the data proving the fact and the date of publication, placement or disclosure via other means of the Notification on the proposed activity subject to the environmental impact assessment and the Notice on the commencement of public consultations on the environmental impact assessment Report. The competent authority shall verify and add the referred information to the Report on public consultations.

10. The competent central authority shall maintain the Single environmental impact assessment registry. Information added to the Single environmental impact assessment registry shall be open and accessible via Internet. The procedure for maintaining the Single registry shall be established by the Cabinet of Ministers of Ukraine.

Article 5. Notification on the proposed activity subject to the environmental impact assessment, scoping of the assessment and the level of detail of the information

1. The developer shall inform the competent local authority on the intent to carry out the proposed activity and the environmental impact assessment thereof by submitting the Notification on the proposed activity subject to the environmental impact assessment in writing and in an electronic form in the location of such activity.

2. The Notification on the proposed activity subject to the environmental impact assessment shall include information on the following:

- 1) the developer – its name, legal address (registration), and contact telephone number;
- 2) the proposed activity, characteristics thereof, technical alternatives;
- 3) the location of the proposed activity, territorial alternatives;
- 4) socio-economic impact of the proposed activity;
- 5) main technical characteristics, including features of the proposed activity (capacity, length, size, output, etc.);
- 6) environmental and other restrictions applicable to the proposed activity by alternatives;
- 7) required environmental and engineering preparations and the protection of the territory by alternatives;
- 8) area, sources and types of possible impact on the environment;
- 9) belonging of the proposed activity to the first or the second category of the types of activity and objects likely to cause a significant impact on the environment and subject to the environmental impact assessment;
- 10) presence of grounds for the transboundary environmental impact assessment;
- 11) envisioned scope of assessment and the level of detail of the information to be included into the environmental impact assessment Report;

12) contemplated environmental impact assessment procedure and opportunities for public participation therein;

13) public consultations on the Notification on the proposed activity subject to the environmental impact assessment (scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report) and the procedure thereof;

14) the nature of the decision on carrying out the proposed activity and the public authority competent to take this decision;

15) name of the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, of the competent central authority, to which the Notification on the proposed activity subject to the environmental impact assessment shall be submitted and to which public comments and suggestions regarding the proposed activity, scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report, can be submitted.

3. The competent local authority shall within 5 working days forward the Notification on the proposed activity subject to the environmental impact assessment to the competent central authority and simultaneously inform the developer thereof in cases where the proposed activity:

- is identified in paragraph 2 of Article 3 of this Law or is likely to cause a significant transboundary impact; or

- is likely to cause impact on the environment of two and more regions (the Autonomous Republic of the Crimea); or

- will be financed with foreign loans under state guarantees.

4. The developer possesses the right to independently (and in compliance with the requirements of paragraph 2 of this Article) submit the Notification on the proposed activity subject to the environmental impact assessment directly to the competent central authority with a view to obtain the environmental impact assessment Decision. In such a case the competent central authority within 5 working days shall forward a copy of the Notification on the proposed activity subject to the environmental impact assessment to the competent local authority in the location of the activity with a view to receive comments and suggestions thereof to the proposed activity, the scope of assessment and the level of detail of the information to be included into the environmental impact assessment Report.

5. The Notification on the proposed activity subject to the environmental impact assessment shall be made public by the competent local authority, and in cases referred to in paragraphs 3 and 4 of this Article, by the competent central authority, pursuant to the procedure and means established by Article 4 of this Law within 5 working days of the receipt thereof.

6. The Notification on the proposed activity subject to the environmental impact assessment shall be added by the competent local authority and in cases referred to in paragraphs 3 and 4 of this Article, by the competent central authority to the Single environmental impact assessment registry within 5 working days of the receipt thereof.

7. Within 20 working days of the official disclosure of the Notification on the proposed activity subject to the environmental impact assessment, the public may forward to the competent local authority, and in cases referred to in paragraphs 3 and 4 of this Article, to the competent central authority, its comments and suggestions to the proposed activity, the scope of assessment and the level of detail of the information to be included into the environmental impact assessment Report. Where the comments and suggestions from the public have been received the relevant competent authority shall within 5 working days of the receipt inform the developer thereof.

8. In case of the transboundary environmental impact assessment pursuant to the state of origin procedure or upon the request of the developer, the competent local authority, and in cases referred to in paragraphs 3 and 4 of this Article, the competent central authority, shall provide conditions on the scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report. In such a case the conditions on the scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report shall be binding for the developer in the preparation of the environmental impact assessment Report.

9. In cases referred to in paragraph 8 of this Article the request of the developer to provide conditions on the scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report, shall be submitted and made public simultaneously with the Notification on the proposed activity subject to the environmental impact assessment. The competent authority shall provide conditions within 30 working days of the date of the official disclosure of the Notification on the proposed activity subject to the environmental impact assessment.

10. During the preparation of the environmental impact assessment Report the developer shall fully accept, partially accept or reasonably reject (hereinafter – take into account) comments and suggestions from the public received through the public consultations on the scope of assessment and the level of detail of the information to be included in the environmental impact assessment Report.

Article 6. Environmental impact assessment Report

1. The developer shall ensure the preparation of the environmental impact assessment Report and shall be responsible for the credibility of information provided in the environmental impact assessment Report pursuant to this Law.

2. The environmental impact assessment Report shall include:

- 1) a description of the proposed activity including in particular:
 - a) a description of the location of the proposed activity;
 - b) objectives of the proposed activity;
 - c) a description of the physical characteristics of the activity during the preparatory and construction works and in carrying out the proposed activity, including, where relevant, requisite demolition works, and land-use requirements (restrictions) during the preparatory and construction works and in carrying out the proposed activity;

d) a description of the main characteristics of carrying out the proposed activity (in particular any production process), for instance, nature and quantity of the materials and natural resources (water, land, soil and biodiversity) to be used;

e) an estimate, by type and quantity, of expected waste and emissions (discharges) (water, air, soil pollution, noise, vibration, light, heat, radiation), produced during the preparatory and construction works and in carrying out the proposed activity;

2) a description of the reasonable alternatives (for example, in terms of geographical and (or) technological features) relevant to the proposed activity, and an indication of the main reasons for selecting the chosen option, taking into account environmental effects;

3) a description of the current state of the environment (baseline scenario) and an outline of the likely changes thereof without implementation of the proposed activity as far as natural changes from the baseline scenario can be assessed on the basis of the availability of environmental information and scientific knowledge;

4) a description of the factors of environment likely to be affected by the proposed activity and its alternatives, including, inter alia, human health, fauna, flora, biodiversity, land (including the withdrawal of lands), soil, water, air, climate factors (including climate change and greenhouse gas emissions), physical structures, including architectural, archaeological and cultural heritage, landscape, socio-economic conditions and the interaction among these factors;

5) a description and assessment of the likely effects for the environment of the proposed activity, in particular its size and scale (territory and population likely to be affected), type (where present – transboundary), intensity and complexity, probability, expected start, duration, frequency and irreversibility of effects (including the direct effects and any indirect, secondary, cumulative, transboundary, short-term, medium-term and long-term, permanent and temporary, positive and negative effects) resulting from:

a) the preparatory and construction works and carrying out of the proposed activity, including, where relevant, demolition works after the completion of this activity;

b) the use in carrying out the proposed activity of natural resources, in particular land, soil, water and biodiversity;

c) the emission and discharge of pollutants, the creation of nuisances, and carrying out of waste management operations;

d) the risks to human health, cultural heritage or the environment (including due to emergencies);

e) the cumulation of effects with other existing and approved projects, taking into account any existing environmental problems relating to areas of particular environmental importance likely to be affected or where the natural resources are likely to be used;

f) the impact of the proposed activity on climate (including the nature and magnitude of greenhouse gas emissions) and the vulnerability of the proposed activity to climate change;

g) the technologies and the substances used.

6) a description of the forecasting methods, used to assess the effects on the environment, referred to in point 5, and the assumptions underlying such forecasting, as well as the data on the state of the environment used;

7) a description of the measures envisaged to preclude, prevent, avoid, reduce, offset significant adverse effects on the environment, including, if possible, the compensatory measures;

8) a description of the expected significant adverse effects of the activity on the environment deriving from the vulnerability of the project to risks of emergencies, measures to prevent or mitigate the effects of emergencies on the environment and the response measures to emergencies;

9) identification of any difficulties (technical deficiencies, lack of sufficient technical means or knowledge) encountered in the process of preparation of the environmental impact assessment Report;

10) any comments and suggestions, received by the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, by the competent central authority, as the result of making public by them of the Notification on the proposed activity, as well as the table showing information on full acceptance, partial acceptance or reasonable rejection (hereinafter – taking into account) of comments and suggestions received through the public consultations;

11) an outline of the monitoring and management programmes, as well as, where appropriate, the post-project monitoring plans;

12) a non-technical summary of the information provided under points 1-11, intended for a wide audience;

13) a reference list detailing the sources used for the descriptions and assessments included into the environmental impact assessment Report.

3. The developer shall submit the environmental impact assessment Report and the Notice on the commencement of public consultations on the environmental impact assessment Report in writing and in an electronic form, as well as the other supplementary information requisite for consideration thereof, to the competent local authority in the location of the proposed activity, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, to the competent central authority.

4. Public access to the environmental impact assessment Report shall be ensured pursuant to the procedure established by Article 4 of this Law.

5. Within 5 working days of the receipt thereof the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, shall add the environmental impact assessment Report to the Single environmental impact assessment registry.

6. Where, at any stage of consideration of the environmental impact assessment Report the competent local authority ascertains that the proposed activity is likely to cause impact on the environment of two and more regions (the Autonomous Republic of the Crimea), it shall without delay and no later than 3 working days forward the documentation to the competent central authority with a view to carry out public consultations and take an environmental impact assessment Decision pursuant to this Law, and shall simultaneously inform the developer thereof.

7. Where, at any stage of consideration of the environmental impact assessment Report the competent local authority or the competent central authority ascertains that the proposed activity is likely to cause a significant transboundary impact, the competent local authority shall without delay and no later than 3 working days forward the documentation to the competent central authority, and the competent central authority shall carry out the environmental impact assessment according to the procedure established by this Law for the proposed activity likely to cause a significant transboundary impact, and shall simultaneously inform the developer thereof.

8. The environmental impact assessment Report shall be signed by all authors (executives) thereof indicating their qualification and be kept in the Single environmental impact assessment registry during the time of carrying out of the proposed activity, but not less than 3 years after the decision on carrying out the proposed activity.

9. The regulatory and methodological support and standardisation of the preparation of the environmental impact assessment Report shall be ensured by the competent central authority.

Article 7. Public consultations

1. Public consultations in the process of the environmental impact assessment shall be carried out with a view to identify, collect and take into account comments and suggestions from the public to the proposed activity.

2. The public shall have the right to submit any comments or suggestions it considers relevant to the proposed activity, without the need to substantiate them. Comments and suggestions may be submitted in writing (including in an electronic form) and orally through the public hearings to be recorded in the protocol thereof. Written comments and suggestions shall be submitted during the public consultations within the time frames established by paragraph 7 of Article 5 of this Law and paragraph 6 of this Article.

3. The competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, shall ensure the public consultations in the process of environmental impact assessment.

4. Public consultations on the scope of assessment and the level of detail of the information to be included into the environmental impact assessment Report shall be carried out pursuant to Article 5 of this Law.

5. Public consultations on the proposed activity after the submission of the environmental impact assessment Report shall be carried out in the form of public hearings and submission of comments and suggestions in writing (including in an electronic form).

6. Public consultations on the proposed activity after the submission of the environmental impact assessment Report shall commence on the date of the official disclosure of the Notice on the commencement of public consultations on the environmental impact assessment Report and provision of public access to the environmental impact assessment Report for examination pursuant to the procedure established by Article 4, and shall not be shorter than 35 working days and longer

than 60 working days. Where comments and suggestion have not been submitted within the referred time frame it shall be considered that comments and suggestions are absent.

7. The competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, shall ensure the preparation of the Report on public consultations. The data on the disclosure of information pursuant to Article 4 of this Law and the proof of such disclosure, the list of materials provided to the public for examination, protocols of public hearings, all written comments and suggestions received from the public, as well as the table showing information on taking into account of the comments and suggestions received through the public consultations, shall form the essential part of the Report on public consultations. The Report on public consultations shall be added to the Single environmental impact assessment registry not later than it is established by paragraph 5 of Article 11 of this Law. The requirements to the content and format of the Report on public consultations shall be established by the competent central authority.

8. The developer shall bear the costs related to the public consultations.

9. The procedure for public consultations in the process of the environmental impact assessment shall be established by the Cabinet of Ministers of Ukraine.

Article 8. Notice on the commencement of public consultations on the environmental impact assessment Report

1. Within 5 working days of the receipt of the environmental impact assessment Report the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority shall disclose the Notice on the commencement of public consultations. The Notice on the commencement of public consultations on the environmental impact assessment Report shall be made public by means and according to the procedure established by Article 4 of this Law.

2. The Notice on the commencement of public consultations on the environmental impact assessment Report shall contain the following information on:

- 1) the proposed activity (outline);
- 2) the developer;
- 3) the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, ensuring the public consultations;
- 4) the procedure for taking the decision on carrying out the proposed activity and the authority in charge of examination of the environmental impact assessment findings;
- 5) the time frames, duration and procedure for public consultations on the environmental impact assessment Report, including the information on the time and venue of any envisaged public hearing;
- 6) the public authority ensuring access to the environmental impact assessment Report and other accessible information on the proposed activity;

7) the authority to which questions, comments and suggestions can be submitted, and the time frames for the submission of questions, comments and suggestions;

8) the available environmental information relevant to the proposed activity;

9) the place(s) at which the environmental impact assessment Report and other relevant information is located with a view to ensure opportunities for the public to examine them, as well as the time at which the public can examine them.

3. The Notice on the commencement of public consultations on the environmental impact assessment Report shall be posted during the entire period, from the date of its official disclosure until the consultation time frames are completed, at the official Internet website of the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, of the competent central authority, on the notice boards of the local self-governance authorities or in other public places in the location of the proposed activity.

Article 9. Environmental impact assessment Decision

1. The competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority shall grant the environmental impact assessment Decision establishing the admissibility of the proposed activity and determining environmental conditions for carrying out thereof.

2. The environmental impact assessment Decision shall be binding for implementation. Environmental conditions for carrying out of the proposed activity, referred to in paragraph 5 of this Article, shall be binding. The environmental impact assessment Decision establishing the inadmissibility of the proposed activity shall form the grounds for refusal of the decision on carrying out the proposed activity.

3. In taking the environmental impact assessment Decision the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority shall consider and note the environmental impact assessment Report and the Report on public consultations.

4. The descriptive part of the environmental impact assessment Decision shall contain the information on the following:

- the conducted environmental impact assessment procedure;
- the taking into account of the environmental impact assessment Report;
- the method of taking into account of comments and suggestions obtained through the public consultations.

5. In the environmental impact assessment Decision the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority shall:

- 1) determine the type, main features and location of the proposed activity;
- 2) determine the admissibility of the proposed activity (where determined, shall provide grounds for inadmissibility of the proposed activity);

- 3) establish conditions for the use of the territory and natural resources during the preparatory and construction works and in carrying out the proposed activity;

4) establish conditions for environmental protection and ensuring environmental safety during the preparatory and construction works and in carrying out the proposed activity;

5) establish conditions for the prevention of emergencies and mitigation of consequences thereof;

6) establish conditions for the reduction of the transboundary impact of the proposed activity, which underwent the transboundary environmental impact assessment;

7) where the environmental impact assessment shows the need for:

a) compensatory measures – shall impose an obligation to implement those measures;

b) prevention, avoiding, reduction (mitigation), offset, control, as well as monitoring of the impact of the proposed activity on the environment – shall impose an obligation to undertake relevant action;

c) carrying out of additional environmental impact assessment at the other stage of the project – shall determine the time frames and substantiate requirements for such an assessment. The additional environmental impact assessment shall be carried out according to the procedure established by this Law;

d) carrying out of the post-project monitoring – shall determine the time frames and requirements thereto;

Where the environmental impact assessment shows that the environmentally justified alternative is different from the one proposed by the developer, with the written consent of the developer the environmental impact assessment Decision shall indicate the agreed alternative of carrying out the proposed activity, and in the absence of agreement – the Decision on inadmissibility of the proposed activity shall be granted.

6. The environmental impact assessment Decision shall be granted to the developer free of charge within 25 working days of the completion of the public consultations, and where the transboundary environmental impact assessment is conducted, – of the date of completion thereof and approval of the Decision on taking into account of the outcome of the transboundary environmental impact assessment. The environmental impact assessment Decision shall be supplemented by the Report on public consultations.

7. The competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, within 5 working days of the adoption thereof shall make the environmental impact assessment Decision public by means and according to the procedure established by Article 4 of this Law, and shall add it to the Single environmental impact assessment registry.

8. The environmental impact assessment Decision shall be invalid after 3 years where the decision on carrying out the proposed activity has not been taken. Where before the decision on carrying out the proposed activity is taken the project documentation has been amended or the new legal requirements have been enacted, requiring amendments to environmental conditions, determined by the environmental impact assessment Decision, the environmental impact assessment shall be re-conducted.

9. The environmental impact assessment Decision and other results of the environmental impact assessment may be used during 5 years of the date of the decision on carrying out the proposed activity for obtaining other permits, foreseen by the valid legislation, if the latter do not establish (approve) changes to the activity approved (adopted) by the decision on carrying out the proposed activity or the extension thereof.

10. The procedure for submitting documentation for the environmental impact assessment Decision and the procedure for financing the environmental impact assessment shall be established by the Cabinet of Ministers of Ukraine.

Article 10. Expert commissions on environmental impact assessment

1. In order to exercise its powers referred to in Articles 5, 9 and 14 of this Law the competent central authority and the competent local authority may establish expert commissions on environmental impact assessment, which shall be designated for the period of 3 years. The competent central authority shall maintain the roster of experts from which the members of the expert commissions can be appointed.

2. The regulation on the expert commission on environmental impact assessment, qualification requirements for experts and the procedure for maintaining the roster of experts on environmental impact assessment shall be approved by the competent central authority.

Article 11. Taking into account of the results of environmental impact assessment in the decision on carrying out the proposed activity

1. The environmental impact assessment Report, the Report on public consultations and the environmental impact assessment Decision shall be submitted by the developer seeking the decision of a public authority or a local self-governance authority on approving (adopting) a proposed activity, which forms the basis for the commencement thereof, establishes (approves) parameters and conditions for carrying it out, and which is taken in the form of a permit or other act of a public authority or a local self-governance authority (hereinafter – the decision on carrying out the proposed activity) pursuant to the procedure established by the legislation for the relevant decisions.

2. The public authorities or the local self-governance authorities in taking the decision on carrying out the proposed activity shall be obliged to take into account the environmental impact assessment Decision. The decision on carrying out the proposed activity shall indicate that the environmental conditions for carrying out the proposed activity are determined by the environmental impact assessment Decision. If the public authority or the local self-governance authority decides so, the decision on carrying out the proposed activity may include the environmental conditions for carrying out the proposed activity referred to in paragraph 5 of Article 9 of this Law.

3. Where after granting the environmental impact assessment Decision the legislation does not require the taking of the decision on carrying out the proposed activity for it to commence, the environmental impact assessment Decision shall be assumed to be the decision on carrying out the proposed activity.

4. The public authorities or the local self-governance authorities shall make the information on the decision on carrying out the proposed activity public within 5 working days of taking thereof and shall ensure opportunities for the public to examine it.

5. The public authorities or the local self-governance authorities shall within 5 working days of taking the decision on carrying out the proposed activity inform thereof the competent authorities which have granted the environmental impact assessment Decision. Information on the decision on carrying out the proposed activity shall within 5 working days of receiving thereof be added by them to the Single environmental impact assessment registry.

Article 12. Challenging decisions, acts and omissions in the process of environmental impact assessment

1. The environmental impact assessment Decision, other decisions, acts or omissions of public authorities or local self-governance authorities in the process of the environmental impact assessment may be challenged by any natural or legal person through a judicial procedure, including on the grounds of violation of the environmental impact assessment procedure.

2. Infringement of the environmental impact assessment procedure, non-consideration or improper taking into account of the results of public participation, other violations of the legislation in the sphere of environmental impact assessment shall form the grounds for cancellation of the environmental impact assessment Decision and the decision on carrying out the proposed activity.

Article 13. Post-project monitoring

1. Where envisaged by the environmental impact assessment Decision, the developer shall ensure the post-project monitoring with a view to identify any discrepancies and deviations of predicted levels of exposure and efficiency of measures for prevention of environmental pollution and mitigation thereof. The procedure, time frames and requirements for the post-project monitoring shall be established by the environmental impact assessment Decision. Based on the outcome of the post-project monitoring the developer and the competent local authority, and in cases referred to in paragraphs 3 and 4 of Article 5 of this Law, the competent central authority, where appropriate, shall coordinate the implementation of additional measures and actions of prevention, avoiding, reduction (mitigation), offset, and control of the impact of the economic activity on the environment.

2. Where the economic activity that underwent the environmental impact assessment turns out to cause significant adverse impact on the public health or environment and such impact has not been assessed in the environmental impact assessment and/or changes materially the environmental impact score of the economic activity in question, the decision on carrying out such a proposed activity shall be repealed by the court decision and the activity – terminated.

3. In case referred to in paragraph 2 of this Article, where applying for the new decision on carrying out the proposed activity, the environmental impact assessment

shall be re-conducted pursuant to the procedure established by Articles 1-10, 14 of this Law taking into account the revealed information.

Article 14. Transboundary environmental impact assessment

1. The proposed activity likely to cause a significant adverse transboundary environmental impact shall be made subject to the transboundary environmental impact assessment pursuant to the valid international treaties of Ukraine before the decision on carrying out such a proposed activity is taken.

2. The transboundary environmental impact assessment shall be carried out on the decision of the competent central authority. In considering and determining the likely significant adverse transboundary environmental impact, the scope, location as well as the likely effects of the proposed activity shall be noted. The decision to carry out the transboundary environmental impact assessment shall be made by the competent central authority pursuant to the procedure established by the Cabinet of Ministers of Ukraine on the basis of available information on the proposed activity or on the request of a foreign state.

3. Depending on the location of the proposed activity the transboundary environmental impact assessment shall be carried out pursuant to:

a) the state of origin procedure – with respect to the proposed activity to be carried out on the territory of Ukraine;

b) the affected state procedure – with respect to the proposed activity to be carried out on the territory of a foreign state.

4. In case of the transboundary environmental impact assessment pursuant to the state of origin procedure the competent central authority within 3 working days of taking the relevant decision shall officially notify the states whose environment is likely to be significantly adversely affected by the proposed activity.

5. The notification shall include information on the proposed activity, including any available information on its possible transboundary impact, possible decision and the procedure for the transboundary environmental impact assessment of the proposed activity. The notification shall indicate time within which the affected state shall respond as regards its participation in the transboundary environmental impact assessment, which shall be no less than 30 days. This time frame shall be calculated from the date of receipt of the notification by the affected state.

6. The competent central authority shall terminate the procedure of transboundary environmental impact assessment if all affected states refuse to participate in this assessment or fail to respond within the specified time.

7. In case of the transboundary environmental impact assessment pursuant to the state of origin procedure the conditions for the scope of assessment and the level of detail of the information to be included into the environmental impact assessment Report shall be provided by the competent central authority. In this case the environmental impact assessment Report shall include the transboundary impact assessment (a chapter on the transboundary impact assessment), and the Report on public consultations – a chapter on public consultations with the public of other states. The environmental impact assessment Report shall be supplemented with the protocols (letters) resulting from consultations with the state (or states) concerned.

8. The developer shall ensure the preparation and translation into foreign language(s) of the draft notification of the affected states, the environmental impact assessment Report and other documentation which shall be determined in each case by the competent central authority.

9. The competent central authority shall enter into consultations with the affected state(s), as well as jointly with the states concerned ensure public consultations with the public of these states on the proposed activity and the environmental impact assessment Report.

10. The Decision on taking into account of the outcome of the transboundary environmental impacts assessment shall be approved by the Interagency Coordination Council on the Implementation in Ukraine of the Convention on Environmental Impact Assessment in a Transboundary Context, the composition and functioning of which shall be determined by the Cabinet of Ministers of Ukraine, and shall be binding for implementation on the territory of Ukraine. The Decision on taking into account of the outcome of the transboundary environmental impacts assessment, after the approval by the Interagency Coordination Council on the Implementation in Ukraine of the Convention on Environmental Impact Assessment in a Transboundary Context, shall be adopted by the competent central authority and shall form an essential part of the environmental impact assessment Decision.

11. The Decision on taking into account of the outcome of the transboundary environmental impacts assessment shall be made public and be added by the competent central authority to the Single environmental impact assessment registry according to the procedure established by paragraph 7 of Article 9 of this Law.

12. The competent central authority shall inform all the states concerned of the decision on carrying out the proposed activity, which underwent the transboundary environmental impact assessment, and shall publish the information on it on its official website in the Internet.

13. The participation of Ukraine in the transboundary environmental impact assessment pursuant to the affected state procedure shall be ensured by the competent central authority and shall include:

1) the request to the foreign state regarding the need to carry out the transboundary environmental impact assessment;

2) the response to the notification indicating the intention (disinterestedness) to participate in the transboundary environmental impact assessment;

3) participation in the consultations between the state of origin and the affected state(s) on the provided materials of the transboundary environmental impact assessment;

4) joint arrangements with the states concerned for public participation;

5) other actions and measures.

14. The competent central authority shall disclose its decision to carry out the transboundary environmental impact assessment pursuant to the affected state procedure, shall facilitate public consultations on the materials of the transboundary environmental impact assessment and taking them into account, as well as inform the public of the decision on carrying out the proposed activity taken by the state of origin.

15. Temporary or permanent joint bodies with other states may be established with a view to improve the management of the transboundary environmental impact assessment. The status and the procedures of such bodies shall be determined by the relevant bilateral or multilateral agreements.

Article 15. Responsibility for the infringement of legislation on environmental impact assessment

1. The infringements in the sphere of environmental impact assessment shall be the following:

1) deliberate provision of false or incomplete information on the environmental impact of the proposed activity;

2) violation of the established by the legislation procedure of environmental impact assessment, including the procedure for informing the public and the procedure for public consultations and taking into account the results thereof;

3) failure to take into account according to the established procedure the results of the environmental impact assessment in the decision-making on carrying out the proposed activity;

4) preparation of the knowingly false environmental impact assessment Report or knowingly false environmental impact assessment Decision;

5) illegal interference into the preparation and granting of the environmental impact assessment Decision;

6) carrying out of the proposed activity subject to the environmental impact assessment, without such an assessment and a decision on carrying out the proposed activity;

7) failure to comply, when carrying out the economic activity, operating the objects, intervening in other manner into the environment and landscapes, including mining and use of man-caused mineral deposits, with environmental conditions envisaged by the environmental impact assessment Decision, the decision on carrying out the proposed activity and the projects of construction, expansion, conversion, elimination (dismantling) of objects, other interventions into the environment and landscapes, including mining and use of man-caused mineral deposits, as well as changes to this activity or extension thereof.

The legislation of Ukraine may establish responsibility for other infringements in the field of environmental impact assessment.

2. Persons violating the legislation on environmental impact assessment shall be brought respectively to the disciplinary, administrative, civil or criminal liability.

Article 16. Restrictions, temporary ban (suspension) and termination of activities of enterprises in the case of infringement of the legislation on environmental impact assessment

1. The activity of business entities, regardless of ownership, in violation of the legislation on environmental impact assessment may be:

1) restricted – reduced emissions and discharges of pollutants and waste disposal as a whole or for individual units (sections) and pieces of equipment shall be

imposed for a certain period (until the compliance with environmental conditions established by the environmental impact assessment Decision is achieved);

2) temporarily banned (suspended) – until the compliance with environmental conditions established by the environmental impact assessment Decision is achieved, the operation of the enterprise or its individual units (sections) or pieces of equipment shall be suspended;

3) terminated – the operation of the enterprise or its individual units (sections) and pieces of equipment shall be completely ceased.

During the temporary ban (suspension) or termination of operations of enterprises all emissions and discharges of pollutants and disposal of waste of enterprises as a whole or their individual units (sections) and pieces of equipment shall be prohibited.

2. The operation of enterprises shall be restricted or temporarily banned (suspended) according to the procedure established by the Cabinet of Ministers of Ukraine, in case of infringements of the legislation on environmental impact assessment, such as:

1) carrying out of the proposed activity subject to the environmental impact assessment, without such an assessment and a decision on carrying out the proposed activity – until such an assessment is conducted and the decision on carrying out the proposed activity is granted;

2) failure to comply, when carrying out the economic activity, operating the objects, intervening in other manner into the environment and landscapes, including mining and use of man-caused mineral deposits, with environmental conditions envisaged by the environmental impact assessment Decision, the decision on carrying out the proposed activity and the projects of construction, expansion, conversion, elimination (dismantling) of objects, other interventions into the environment and landscapes, including mining and use of man-caused mineral deposits, as well as changes to this activity or extension thereof – until the compliance with such environmental conditions is ensured.

3. Systematic infringements in the sphere environmental impact assessment, which cannot be removed for technical, economic or other reasons, shall form the basis for the termination of the operation of an enterprise or its individual units (sections) and pieces of equipment.

4. The decision to restrict and put a temporary ban (suspend) the operation of an enterprise for infringements of the legislation on environmental impact assessment shall be taken by the central state executive authority implementing the state policy of state supervision (control) in the field of environmental protection, rational use, reproduction and protection of natural resources, its local authorities or by the court.

5. The decision to terminate the activities of enterprises in violation of the legislation on environmental impact assessment shall be made exclusively by the court on the motion (claim) of the central state executive authority implementing the state policy of state supervision (control) in the field of environmental protection, rational use, reproduction and protection of natural resources, its local authorities or on the motion (claim) of other persons whose rights and interests have been violated.

Article 17. Final and transitional provisions

1. This Law shall enter into force on the day following the date of its publication and shall take effect in six months after the day of its entry into force.

2. Until reconciled with this Law the legal acts shall be applied in part which is not in conflict with this Law.

3. Repeal the Law of Ukraine “On ecological expertise” (Vidomosti of the Verkhovna Rada of Ukraine, 1995, № 8, art. 54; 2000, № 27, art. 213; 2003, № 4, art. 31; 2007, № 34, art. 444; 2009, № 30, art. 428; 2011, № 34, art. 343; 2012, № 2-3, art. 3; 2013, № 46, art. 640).

4. Amend the following legislative acts of Ukraine:

1) In the Code on Administrative Violations of Ukraine (Vidomosti of the Verkhovna Rada of UkrSSR, 1984, № 51):

add article 91-5 as follows:

“Article 91-5. Infringement of the legislation in the field of environmental impact assessment

1. The deliberate provision of false or incomplete information on the environmental impact of the proposed activity; violation of the established by the legislation procedure of environmental impact assessment, including the procedure for informing the public and the procedure for public consultations and taking into account the results thereof; failure to take into account according to the established procedure the results of the environmental impact assessment in decision-making on carrying out the proposed activity; preparation of the knowingly false environmental impact assessment Report or knowingly false environmental impact assessment Decision; illegal interference of anyone in the preparation and granting of the environmental impact assessment Decision, -

shall entail the imposition of a fine on officials, citizens-entrepreneurs – from fifty to two hundred tax-free minimum citizen incomes.

2. The failure to comply, when carrying out the economic activity, operating the objects, intervening in other manner into the environment and landscapes, including mining and use of man-caused mineral deposits, with environmental conditions envisaged by the environmental impact assessment Decision, the decision on carrying out the proposed activity and the projects of construction, expansion, conversion, elimination (dismantling) of objects, other interventions into the environment and landscapes, including mining and use of man-caused mineral deposits, as well as changes to this activity or extension thereof – until the compliance with such environmental conditions is ensured, -

shall entail the imposition of a fine on officials, citizens-entrepreneurs – from two hundred to five hundred tax-free minimum citizen incomes.”;

add the words “On environmental impact assessment” after the words “On access to public information” in paragraph 1 of Article 212-3;

add paragraph 8 to Article 212-3 as follows:

“The untimely inclusion of documents into the Single environmental impact assessment registry pursuant to the Law of Ukraine “On environmental impact assessment” or the restriction of access to information contained therein -

shall entail the imposition of a fine on officials – from twenty five to fifty tax-

free minimum citizen incomes.”

Thereby assume paragraph 8 of Article 212-3 to be paragraph 9 and replace the words “one-seven” in this paragraph with the words “one-eight”;

indent 29 of point 1 of paragraph 1 of Article 255 formulate as follows:

the central state executive authority implementing the state policy of state supervision (control) in the field of environmental protection, rational use, reproduction and protection of natural resources (paragraphs two, four and five of Article 85, Articles 85-1, 88, 88-1, 88-2, 90, 91, 91-5, 164 – as regards the infringement of the procedure for carrying out of economic activity, related to the rational use, reproduction and protection of natural resources (land, bowels, surface waters, ambient air, fauna and flora, natural resources of the territorial sea, continental shelf and exclusive (sea) economic zone of Ukraine, fisheries and use of fish and other living aquatic resources), waste management (except for the radioactive waste management), hazardous chemicals, pesticides and agrochemicals”.

2) In the Criminal Code of Ukraine (Vidomosti of the Verkhovna Rada of Ukraine of Ukraine, 2001, № 25-26, art. 131):

replace the words “ecological expertise” with the words “environmental impact assessment” in paragraph 1 of Article 236;

3) In the Land Code of Ukraine (Vidomosti of the Verkhovna Rada of Ukraine, 2002, № 3-4, art. 27)

replace the words “conducting the state ecological expertise” with the words “coordination and ensuring the environmental impact assessment” in point «B» of paragraph 1 of Article 14-1.

4) In the Water Code of Ukraine (Vidomosti of the Verkhovna Rada of Ukraine, 1995, № 24, art. 189):

delete point 4 of Article 11;

point 4 of paragraph 1 of Article 15-1 formulate as follows:
