Greetings,

In 2016, Ukraine ratified the Kyiv Protocol on Pollutant Release and Transfer Registers. The same year, the Protocol entered into force for Ukraine. In accordance with the requirements of the Protocol, the first reporting year for Ukraine is 2017, and during 2018-19 Ukraine was obliged to adopt the relevant legislative, regulatory and other measures to implement the provisions of the Protocol, namely to ensure the collection of information on emissions and their publication by means of the national electronic pollutant release and transfer register.

Given the above, please inform

- 1) what legislative and regulatory acts have been developed / adopted by Ukraine in order to fulfill obligations provided by the Kiev Protocol?
- 2) what other measures have been taken to introduce the national electronic pollutant release and transfer register in Ukraine.

Please respond to the e-mail e.aleksyeyeva@epl.org.ua

Regards,

Yelyzaveta Aleksyeyeva
