

Status of Implementation of the protocol on Water and Health in Serbia

Serbia ratified the Water Convention in May 2010 and now we are in the final faze of the ratification of the protocol on Water and Health.

Responsible Ministries for the implementation of this document are: Ministry of Health, Ministry of Environment and Spatial Planning and Ministry of Agriculture, Forestry and Water Management.

Serbia has formed a multisectoral working group to follow up the activities and support quicker ratification and implementation.

Serbia supports the PROTOCOL as an very important document related to intersectoral collaboration, related to water and health.

We expect that the agreement from the Ministry of Agriculture, Forestry and Water management will be provided during the 2011, so the further Parliament and Government approval and adoption procedure can be completed and the Protocol announced as ratified through diplomatic channels.
