## EXPLANATORY NOTES

In view of the difficulty in collecting timely and consistent forest products trade flow data directly from countries by using questionnaires, the Working Party on Forest Economics and Statistics decided to use data collected by the United Nations Statistical Office. These data are available in computer readable form in the COMTRADE database.

The data on forest products trade flows were extracted from the UN COMTRADE database and the trade flow tables have been prepared by the **Forestry Planning and Statistics Branch of the Forestry Department** at FAO headquarters in Rome. The tables were constructed with computer programmes developed over several years by FAO. In addition to providing tables for the Timber Bulletin (ECE/TIM/BULL series), these data contribute to the production of the FAO *Yearbook of Forest Products*, providing an alternative source of data on total imports and exports for countries as well as helping to construct the *Yearbook* direction of trade tables.

### ORGANIZATION OF TABLES

The included tables consist of total value of all forest products and tables for aggregates of roundwood, sawnwood, wood-based panels, pulp and paper and paperboard (excluding newsprint). Detailed tables for individual products follow the aggregate tables. The heading of each table indicates the Harmonised System (HS 96) division and group codes for the data included in that table. For each product, eight tables are provided covering volume and value for imports and exports for the years 2000 and 2001.

### DATA AND METHODOLOGY

The tables in this document were constructed from COMTRADE data available at the end of 2002. Import tables include data primarily reported by importers, while export tables include data primarily reported by exporters. Information from trading partners was used to estimate data that were missing due to non reporting (data that depend on trading partner information are marked with an asterisk).

Missing quantity data (or quantity data that are inconsistent with value data) are replaced with data constructed from value and average unit price.

Please note that data from the COMTRADE database are not necessarily the same as that available directly from the countries and which is reported in the main tables of the UNECE *Forest Products Statistics* or FAO *Yearbook of Forest Products*. No attempt has been made here to reconcile these two sources.

In presenting the data for this publication, the largest 15 exporters (columns) and the largest 25 importers (rows) were included in each table. The importing countries are listed in order of magnitude of their total imports as reported in the import table, while the exporting countries are listed in order of magnitude of their total exports as reported in the export table. All other traders were included either with "Developed NES" (Not Elsewhere Specified) or "Developing NES". Each table represents the data on total world trade available at the date of table construction.

### DEFINITIONS

The tables were constructed to match individual codes of HS (96). Note that pulpwood, sawlogs + veneer logs and other roundwood were not separated in this revision. For non-coniferous roundwood and non-coniferous sawnwood, tables of trade originating in tropical countries and trade originating in non-tropical countries were presented in addition to total world trade of those products.

### DISCLAIMER

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

## NOTES EXPLICATIVES

Devant les difficultés rencontrées à collecter de manière ponctuelle des données homogènes sur les flux commerciaux des produits forestiers à l'aide de questionnaires, le Groupe de travail mixte FAO/CEE de l'économie forestière et des statistiques des forêts a décidé d'utiliser les données collectées par l'Office Statistique des Nations Unies. Ces chiffres, accessibles par ordinateur, sont stockés dans la base de données COMTRADE.

**La Sous-division de la planification et des statistiques forestières du Département des Forêts** au siège de la FAO à Rome a extrait les données relatives aux flux commerciaux des produits forestiers de la base de données de l'ONU COMTRADE et a préparé les tableaux des flux commerciaux. Ces tableaux ont été conçus à l'aide de logiciels développés sur plusieurs années à la FAO. Outre leur insertion dans le Bulletin du Bois (séries ECE/TIM/BULL), ces chiffres apparaîtront dans *l'Annuaire des Produits Forestiers* de la FAO, constituant ainsi pour les pays une autre source d'information sur les importations et les exportations totales, et également une aide pour produire les tableaux des flux commerciaux publiés dans *l'Annuaire*.

### ORGANISATION DES TABLEAUX

Dans les tableaux de ce Bulletin, on trouve la valeur totale de tous les produits forestiers ainsi que les agrégations pour les bois ronds, les sciages, les panneaux dérivés du bois, les pâtes et les papiers et cartons (à l'exclusion du papier journal). Des tableaux détaillés pour chaque produit suivent les tableaux d'agrégation. Le titre de chaque tableau donne les codes des divisions et groupes de la Système Harmonisé (SH 96) relatifs aux produits qui figurent dans ce tableau. Pour chaque produit, on publie huit tableaux comportant les quantités et les valeurs des importations et des exportations pour les années 2000 et 2001.

### DONNEES ET METHODOLOGIE

On a constitué les tableaux publiés dans ce Bulletin à l'aide des chiffres du COMTRADE disponibles fin 2002. Les tableaux des importations indiquent des chiffres initialement fournis par les importateurs, tandis que les tableaux des exportations montrent ceux fournis par les exportateurs. On a utilisé des informations provenant des partenaires commerciaux pour estimer les données non disponibles. Les chiffres dérivés des partenaires commerciaux sont marqués d'un astérisque.

Quand les chiffres de quantité n'étaient pas disponibles (ou lorsqu'il y avait incohérence entre quantité et valeur), on a fait des estimations à partir des valeurs et des prix unitaires moyens.

Veillez noter que les données qui proviennent du banque du donnée COMTRADE ne sont pas nécessairement identiques aux données fournies directement par les pays et qui sont utilisés dans les tableaux principaux du CEE-ONU *Statistiques des produits forestiers* ou *l'Annuaire de produits forestiers* de FAO. Aucun effort n'a été essayé pour concilier ces deux sources.

Dans chaque tableau, apparaissent les 15 plus importants exportateurs (colonnes) et les 25 plus importants importateurs (lignes). Les pays importateurs figurent par ordre d'importance de leurs importations totales, comme indiqués dans le tableau des importations, tandis que les exportateurs sont classés par ordre de grandeur de leurs exportations. Tous les autres pays sont inclus sous les rubriques "Developed NES" (Pays développés, Non Désignés Ailleurs) ou "Developing NES" (Pays en développement, Non Désignés Ailleurs). Chaque tableau fournit les chiffres du commerce mondial disponibles au moment où il a été rempli.

### DEFINITIONS

On a complété les tableaux sur la base des codes spécifiques de la SH (96). Le lecteur est prié de noter que le bois de trituration, les grumes pour sciages et les grumes pour placages ainsi que les autres bois ronds ne sont pas identifiés séparément dans cette révision. Pour les bois ronds feuillus et les sciages feuillus, les tableaux du commerce en provenance des pays tropicaux et tempérés sont publiés en plus des tableaux concernant le commerce total.

### AVERTISSEMENT

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.
