## ECONOMIC COMMISSION FOR EUROPE

COMMITTEE FOR TRADE, INDUSTRY AND ENTERPRISE DEVELOPMENT

<u>Working Party on Standardization of</u>
<u>Perishable Produce and Quality Development</u>

Specialized Section on Co-ordination of Standardization of Fresh Fruit and Vegetables (Forty-sixth session, 23-26 May 2000, Geneva

Item 3(i) of the provisional agenda

PROPOSAL TO REVISE UN/ECE STANDARD FFV-27 PEAS

# Note by the secretariat

The following proposal is reproduced in the form in which it was submitted by the European Union. Proposed additions have been <u>underlined</u> and deletions are <del>crossed out</del>.

### Proposal to revise UN/ECE Standard FFV-27 (Peas)

#### I. DEFINITION OF PRODUCE

This standard applies to **shelling** peas of varieties (cultivars) grown from Pisum sativum L. and peas intended for consumption in the pods or snow peas (mange-tout peas) from Pisum sativum L. var. macrocarpon and sugar snap peas from Pisum sativum L. var. saccharatum to be supplied fresh to the consumer, peas for industrial processing being excluded.

# According to the type of consumption, peas are classified in two groups :

- Shelling peas (round peas, wrinkled peas) intended for consumption without the pod;
- <u>Mange-tout peas and Sugar Snap peas intended for consumption with the pod.</u>

### II. PROVISIONS CONCERNING QUALITY

The purpose of the standard is to define the quality requirements for peas at the export control stage, after preparation and packaging.

## A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed,

- (i) the pods must be:
  - intact
  - sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded
  - clean, practically free of any visible foreign matter (including parts of the flowers)
  - free from hard filaments or films in mange-tout peas <a href="mailto:and-order-tout">and</a>
    <a href="mailto:sugar snap peas">sugar snap peas</a>
  - practically free from pests
  - practically free from damages caused by pests
  - free of abnormal external moisture
  - free of any foreign smell and/or taste.

# (ii) the $\underline{\text{seeds}}$ $\underline{\text{peas}}$ must be:

- fresh
- sound, produce affected by rotting or deterioration such as
  to make it unfit for consumption is excluded

  damage caused by pests or diseases
- normally developed in shelling peas

The development and condition of peas must be such as to enable them:

- to withstand transport and handling, and
- to arrive in satisfactory condition at the place of destination.

#### B. Classification

Peas are classified in two classes defined below :

#### (i) Class I

Peas in this class must be of good quality. They must be characteristic of the variety and/or the commercial type.

The pods must be:

- characteristic of the variety in shape, size and colouring
- fresh and turgid
- with peduncles attached
- free from damage  $\underline{\textbf{caused}}$  by hail
- without free from damage caused by heating.

## For mange-tout peas the pods may have

- very slight skin defects, injuries and bruises
- very slight defects of shape
- very slight defeats of colouring

For shelling peas, the pods must be well filled, containing at least 5 seeds

# For shelling peas, the seeds peas must be:

- well-formed
- tender
- succulent and sufficiently firm, i.e., when squeezed between two

TRADE/WP.7/GE.1/2000/15 page 4

fingers they should become flat without disintegrating

- at least half the full-grown size but not full-grown
- of the colour typical of the variety
- non-farinaceous
- undamaged.

For mange-tout peas  $\underline{and\ sugar\ snap\ peas}$ , the  $\underline{seeds}\ peas$  if present must be small and underdeveloped.

The following very slight defects of the pod, however, may be allowed, provided these do not affect the general appearance of the produce, the quality, the keeping quality and presentation in the package:

- very slight skin defects, injuries and bruises
- very slight defects in shape
- very slight defects in colouring

#### (ii) Class II

This class includes peas which do not qualify for inclusion in Class I but satisfy the minimum requirements specified above.

# For shelling peas, the pods must contain at least three seeds.

Shelling peas may be riper than those in Class I, but over-mature peas are excluded.

The following slight defects may be allowed provided the peas retain their essential characteristics as regards the quality, the keeping quality and presentation:

### For mange-tout peas, the pods may have :

- slight skin defects, injuries and bruises
- slight defects in shape, including those due to the seed formation
- slight defect in colouring
- slight not progressive skin defects caused by pests
- slight drying, excluding wilted and uncoloured pods.

For shelling peas, the pods may have:

- <u>a</u> slight defect in colouring
- <u>a</u> slight damage provided it is not progressive and there is no risk of the seeds being affected
- some loss of freshness, although excluding wilted pods are excluded.

# The pods must contain at least 3 seeds.

# For shelling peas, the seeds peas may be:

- have a slight defect in shape
- <del>less well-formed</del>

### page 6

- have a slight defect in colouring
- slightly less coloured
- be slightly harder
- **be** slightly damaged.

# Over-mature peas are excluded.

# For mange-tout peas and sugar snap peas, the pods may have :

- slight skin defects, injuries and bruises,
- slight defects in shape, including those due to the seed formation
- slight defect in colouring
- slight drying excluding wilted and uncoloured pods

#### III. PROVISIONS CONCERNING SIZING

Sizing is not compulsory for peas.

#### IV. PROVISIONS CONCERNING TOLERANCES

Tolerances in respect of quality shall be allowed in each package for produce not satisfying the requirements of the class indicated.

### (i) Class I

10 per cent by weight of peas not satisfying the requirements of the class, but meeting those of Class II or, exceptionally, coming within the tolerances of that class.

## (ii) Class II

10 per cent by weight of peas satisfying neither the requirements of the class nor the minimum requirements, with the exception of produce affected by rotting, progressive diseases or any other deterioration rendering it unfit for consumption.

# V. PROVISIONS CONCERNING PRESENTATION

# A. Uniformity

The contents of each package must be uniform and contain only peas of the same origin, variety and/or commercial type and quality.

The visible part of the contents of the package must be representative of the entire contents.

#### B. Packaging

Peas must be packed in such a way as to protect the produce properly.

The materials used inside the package must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly paper or stamps, bearing trade specifications is allowed provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter.

#### VI. PROVISIONS CONCERNING MARKING

Each package<sup>1</sup> must bear the following particulars in letters grouped on the same side, legibly and indelibly marked, and visible from the outside:

#### A. Identification

Packer ) Name and address or and/or ) officially issued or Dispatcher ) accepted code mark. <sup>2</sup>

## B. Nature of produce

- "Shelling peas", "Snow peas", "Sugar peas" or "Mange-tout peas",

Package units of produce prepacked for direct sale to the consumer shall not be subject to these marking provisions but shall conform to the national requirements. However, the markings referred to shall in any event be shown on the transport packaging containing such package units.

The national legislation of a number of countries requires the explicit declaration of the name and address. However, in the case where a code mark is used, the reference "packer and/or dispatcher (or equivalent abbreviations)" has to be indicated in close connection with the code mark.

TRADE/WP.7/GE.1/2000/15 page 8

# C. Origin of produce

- Country of origin and, optionally, district where grown or national, regional or local place name.

# D. Commercial specifications

- Class.

# E. Official control mark (optional)
