

Proposed Approach to the task.

1. Clearly define the objective of this Global Braking Regulation.
2. List the well-known Braking Regulations which are in use today.
3. Assess the features from these documents and classify the layout and texts for their suitability to make a positive contribution to the harmonisation level already reached in Regulation 13-H.
4. Itemise the philosophical differences between the selected main contenders.
5. Define an agreed structure and the broad requirements of this new GTR - Braking.
6. Report to AC3 and obtain the agreement to proceed with the formal GTR preparation
7. A small drafting team will be elected to develop the details of the text.
