

RE: REGULATION No. 107

Regulation No.107 stipulates the type approval requirements for two-floor vehicles for the transport of passengers.

Some Spanish manufacturers have requested the Spanish Authorities type approval according to this Regulation for double-deckers without roof.

In the opinion of the Spanish Authorities, it is not possible to grant type approval to a double-decker without roof because there are not rules on this in the Regulation.

The Spanish Authorities request the World Forum on harmonization of vehicle regulations (WP.29) to give his opinion on this matter.
