

Reason for documents EVSC05-38 and EVSC05-39

The documents EVSC05-38 and EVSC05-39 are been proposed on the basis of the following:

The growth of the amendment has resulted in a large amount the text together with 2 appendices being added to the regulation part of ECE Reg.13. Therefore, it is simpler and more in keeping with the structure of ECE Reg.13 to have an annex covering the special requirements for a vehicle stability function, while the definition and mandation is contained in the regulation itself.

The vehicle stability function definition - 1 paragraph and 4 sub-paragraphs - is added to the existing definitions.

All the special requirements relating to a vehicle stability function are contained in a new annex with 2 appendixes (Annex 21).

Annexes 2, 19 and 20 are amended to cover the use of the new Annex 21.

The mandating of a vehicle stability function for specific vehicles – 2 paragraphs - is contained within the body of the Regulation.
