Geneva, 25-27 October 2006)

TUNNEL RESTRICTION CODES FOR ARTICLES OF CLASS 2

Transmitted by Poland

According to the amendments to column (15) of Table A in Chapter 3.2 published in document ECE/TRANS/WP.15/186/Add.1 (page 6) the “Tunnel restriction codes” for goods of class 2 should be the following:

Class 2	Classification codes with letters F, TF, TFC	(B1D)
	Classification codes with letters FC	(D)
	Classification codes with letters T, TC, TO, TOC	(C1D)
	Classification codes with letters A, O, C, CO	(E)

Consequently, tunnel restriction codes B1D or C1D - prescribed for gasses carried in tanks (according to Section 8.6.4) - are assigned also for articles with classification codes F, TF, TFC T, TC, TO or TOC (see: UN 1057, UN 1950, UN 2037 and UN 3150).

In our opinion, to avoid interpretation problems, there is a need to correct the tunnel restriction codes in Table A for all relevant articles of class 2 by replacing codes B1D and C1D with code “D”.
