

Transmitted by the expert from Russian Federation

PROPOSAL BY THE EXPERT FROM RUSSIAN FEDERATION
INTRODUCING ADDITIONS INTO THE DRAFT AMENDMENTS
TO THE ECE REGULATIONS No. 13 (DOCUMENT EVSC-06-13)

A. PROPOSAL

Annex 21, paragraph 2.1.3., add the new third subparagraph, to read:

The results of a dynamic demonstration shall provide clear evidence that, when the vehicle stability function is enabled, the actual vehicle behavior is adequate to that demanded by the driver and such behavior does not lead a vehicle to an unexpected stability loss.

B. JUSTIFICATION

It can be concluded that the 8th EVSC meeting document (EVSC-06-13) basically has taken into account the concerns recently raised by Russian Federation (document EVSC-06-01).

However the statement that EVSC shall not interfere with the driver in realization of control inputs is not clearly reflected in the current working document (EVSC-06-13).

Therefore the present proposal is made in alignment with the recent proposals of Russian Federation. This proposal also corresponds with the EVSC performance criteria, as they are seen by the United States (in particular the reference can be made to the document WP.29-138-20).
