**INLAND TRANSPORT COMMITTEE**

Working Party on Transport Statistics

Fifty-ninth session

Geneva, 28-30 May 2008

Item 4(d) of the provisional agenda

**METHODOLOGICAL DEVELOPMENTS AND HARMONIZATION OF  
TRANSPORT STATISTICS**

Information about further adjustment of the new classification system  
for transport statistics (NST<sup>1/</sup> 2007)

Note by the Chairman of the Working Party, Eurostat and the secretariat <sup>2</sup>

At its fifty-eighth session of the Working Party on Transport Statistics (WP.6), it was decided that an informal group (United Nations Economic Commission for Europe secretariat, Eurostat, Chairman) would work at improving the adopted version of the NST 2000 taking into consideration the updated CPA/CPC (TRANS/WP.6/153, para. 24). In view of the interest of the Working Party to be involved in the development and updates of the statistical nomenclature of goods in transport, Eurostat prepared the following document for information, discussion and approval. An updated version also holding references to the new version of CPC will be presented at a later stage.

---

<sup>1/</sup> Nomenclature statistique des transports; Standard Goods Nomenclature for Transport Statistics.

<sup>2</sup> This document was submitted late for processing since clearance in finalizing this document took longer than anticipated.

## **NST 2007**

1. NST 2007 is related to four modes of transport (road, rail, inland waterways and maritime) statistics. It has been discussed for several years at UNECE WP.6, and the Secretariat hosts the current reference version of it on its website.
2. NST 2007 takes account of the economic activity from which the goods originate. This means that each of its items is strongly interrelated with an item of the European CPA (Classification of Products by Activity) and NACE (statistical classification of economic activities), which are themselves consistent with CPC and ISIC, their counterparts at United Nations level.
3. The new version of CPA has just been adopted and its new version (CPA 2008) is partially inconsistent with the current version of NST 2000, adopted in 2005. Therefore NST 2000 has been updated in order to retrieve the full consistency with CPA2008/CPC. Indeed, the correspondence between production of goods and transport of goods has to be respected and carefully maintained.
4. The updated version of NST 2000, called NST 2007 and is presented in annex to the present paper, minimizes the changes necessary to become consistent with CPA2008/CPC. This makes the move from NST/R to NST 2007 possible in 2008 for the CCST<sup>3/</sup> countries, as decided by this committee at its annual session of November 2005.

<sup>3/</sup> CCST: Coordination Committee for Statistics on Transport. This committee gathers the national authorities of Transport Statistics in the 27 EU Member States, the current Candidate Countries (Croatia and Turkey) and the EFTA Countries (Iceland, Liechtenstein, Norway and Switzerland)
