Chapter 9.8 - MEMUs

Transmitted by the Government of Norway

"9.8.7.2 Protection of the load by metal thermal shields against tyre fire shall be provided."

Question:
What is the meaning of the expression "metal thermal shields"?

The most common, accordingly to our knowledge, used metal is steel.

We like to hear the opinion of the working party whether e.g. aluminium can be used.

Example of a MEMU after a fire:
