

Comment on Doc. ECE /TRANS/WP.29/GRE/2010/54
Proposal for the 04 series of amendments to Regulation No. 10
(Submitted by the experts from France and Germany*)

A. PROPOSALS

A.1 *Paragraph 6.10.5.*, amend to read:

“6.10.5. ~~Conducted~~ **Emission of transient conducted disturbances generated by ESAs on 12/ 24 V supply lines.**

...”

ESAs that are not switched, contain no switches or do not include inductive loads need not be tested for **transient** conducted disturbances and shall be deemed to comply with paragraph 6.9.

A.2. Annex 13, Paragraph 3.3

3.3 The test set-up for the connection of the vehicle in configuration “RESS charging mode coupled to the power grid” is shown in figure ~~2-1~~ of Appendix 1 to this annex.

B Justifications

B.1 Appropriate terminology “----**transient** conducted disturbances ----” in line with the proposed amendment in the title of paragraph to be included in the text of paragraph.

B.2 Correct reference of the figure.
