Regulation name and reference number

Point (b) of section 2.5.1.1 of the proposal for amendment to ECE R.115 (doc. ECE/TRANS/WP.29/GRPE/2009/19).

Name of Amendment/Work Item

Classifications of vehicles in families

Specific language for Amendment/Work Item

(b) It is classified in the same category M₁ or M₂ or M₃ or N₁ or N₂ or N₃. Vehicles of category M₁ and N₁ class I may belong to the same family. **Vehicles of category N1 classes II and III may belong to the same family than vehicles in categories M1 and N1 if they fulfill with the limit values of these categories .**

Rationale: (Why is it important/required?)

According to our experience, some manufacturers are approving vehicles of category N1 classes II and III with the limit values of category N1 class I. In that case we suggest that vehicles of category N1 classes II and III could be included within the same family when applying ECE R.115.
