Committee of Experts on the Transport of Dangerous Goods  
and on the Globally Harmonized System of Classification  
and Labelling of Chemicals  

Sub-Committee of Experts on the Globally Harmonized  
System of Classification and Labelling of Chemicals  

Twenty-second session  
Geneva, 7 – 9 December 2011  
Item 2 (b) of the provisional agenda  
Updating of the Globally Harmonized System of Classification  
and Labelling of Chemicals (GHS): Health hazards  

Amendment to paragraphs 3.2.3.1.2 and 3.3.3.1  

Transmitted by the expert from Germany on behalf of the informal correspondence group on the editorial revision of Chapters 3.2 and 3.31  

Proposal  

1. In 3.2.3.1.2 and 3.3.3.1, replace  
   “If consideration of alkali/acid reserve suggests the substance or mixture may not be corrosive despite the low or high pH value, then further testing needs to be carried out to confirm this, preferably by use of an appropriate validated in vitro test.”  
   with  
   “However, if consideration of acid/alkaline reserve suggests the substance or mixture may not be corrosive despite the low or high pH value, this needs to be confirmed by other data, preferably data from an appropriate validated in vitro test.”

Justification  

2. The GHS does not make testing requirements for health hazards. The recommendations on testing strategy will be deleted in chapters 3.2 and 3.3. The proposed deletion is not dependent on putative future changes in GHS chapters 3.2 and 3.3 and can
