Amendment of Note 1 to 2.2.3.1.1

Transmitted by the European Chemical Industry Council (CEFIC)\(^1\)\(^2\)

Introduction

1. Note 1 to 2.2.3.1.1 RID/ADR/ADN provides an exemption from classification in class 3 for substances having a flash-point above 35 °C and not sustaining combustion.

2. Whereas RID/ADR/ADN limits this exemption to “non-toxic and non-corrosive” substances, subsection 2.3.1.3 of the UN Model Regulations does not include this limitation but makes this exemption possible for all flammable liquids.

3. Substances unable to sustain combustion do not pose a flammable hazard. It is therefore not justified to except such substances having toxic or corrosive properties from declassification as flammable liquids. Therefore it is proposed to align RID/ADR/ADN with the UN Model Regulations.

Proposal

4. Amend Note 1 to 2.2.3.1.1 as follows (text to be deleted is struck through):

\(^1\) In accordance with the programme of work of the Inland Transport Committee for 2010-2014 (ECE/TRANS/208, para 106, ECE/TRANS/2010/8, programme activity 02.7 (c)).

\(^2\) Circulated by the Intergovernmental Organisation for International Carriage by Rail (OTIF) under the symbol OTIF/RID/RC/2011/46.
Note 1: Substances having a flash-point above 35 °C, non-toxic and non-corrosive, which do not sustain combustion according to the criteria of sub-section 32.2.5 of Part III of the Manual of Tests and Criteria, are not substances of Class 3; if however, these substances are handed over for carriage and carried whilst heated at temperatures …
