

# Application of Marking in the Global Technical Regulations (GTR)

(Reference: The Russian Federation Document  
ECE/TRANS/WP.29/2010/83)

*Presentation by the expert from the Russian Federation  
at the 10<sup>th</sup> Tyre GTR Ad-Hoc Working Group meeting*

February 2011

# **Implementation of the GTRs Through the UNECE Regulations**

- This proposal is already applied in practice.
- The UNECE Regulations become the legal tool ensuring application of the GTR provisions in the national legislation of the CPs to the 1958 Agreement.
- A legal mechanism that operates within the framework of the 1958 Agreement provides a capability of a mutual recognition of results of compliance evaluation.
- The UNECE Regulations shall be merged with the appropriate GTR provisions, because no parallel technical provisions will have to exist in relation to the same object of regulation.

# Implementation of the GTR Provisions through the ECE Regulations

## GTR Provisions

Compulsion of provisions  
is not established

- Provision A
- Provision B
- Provision C
- ...
- Provision X
- Provision Y
- Provision Z

## UNECE Regulation Provisions including marking

### Mandatory

- Provision A
- Provision B
- ...
- Provision X

Regional  
Marking

### Optional

- Provision C
- ...
- Provision Y
- Provision Z

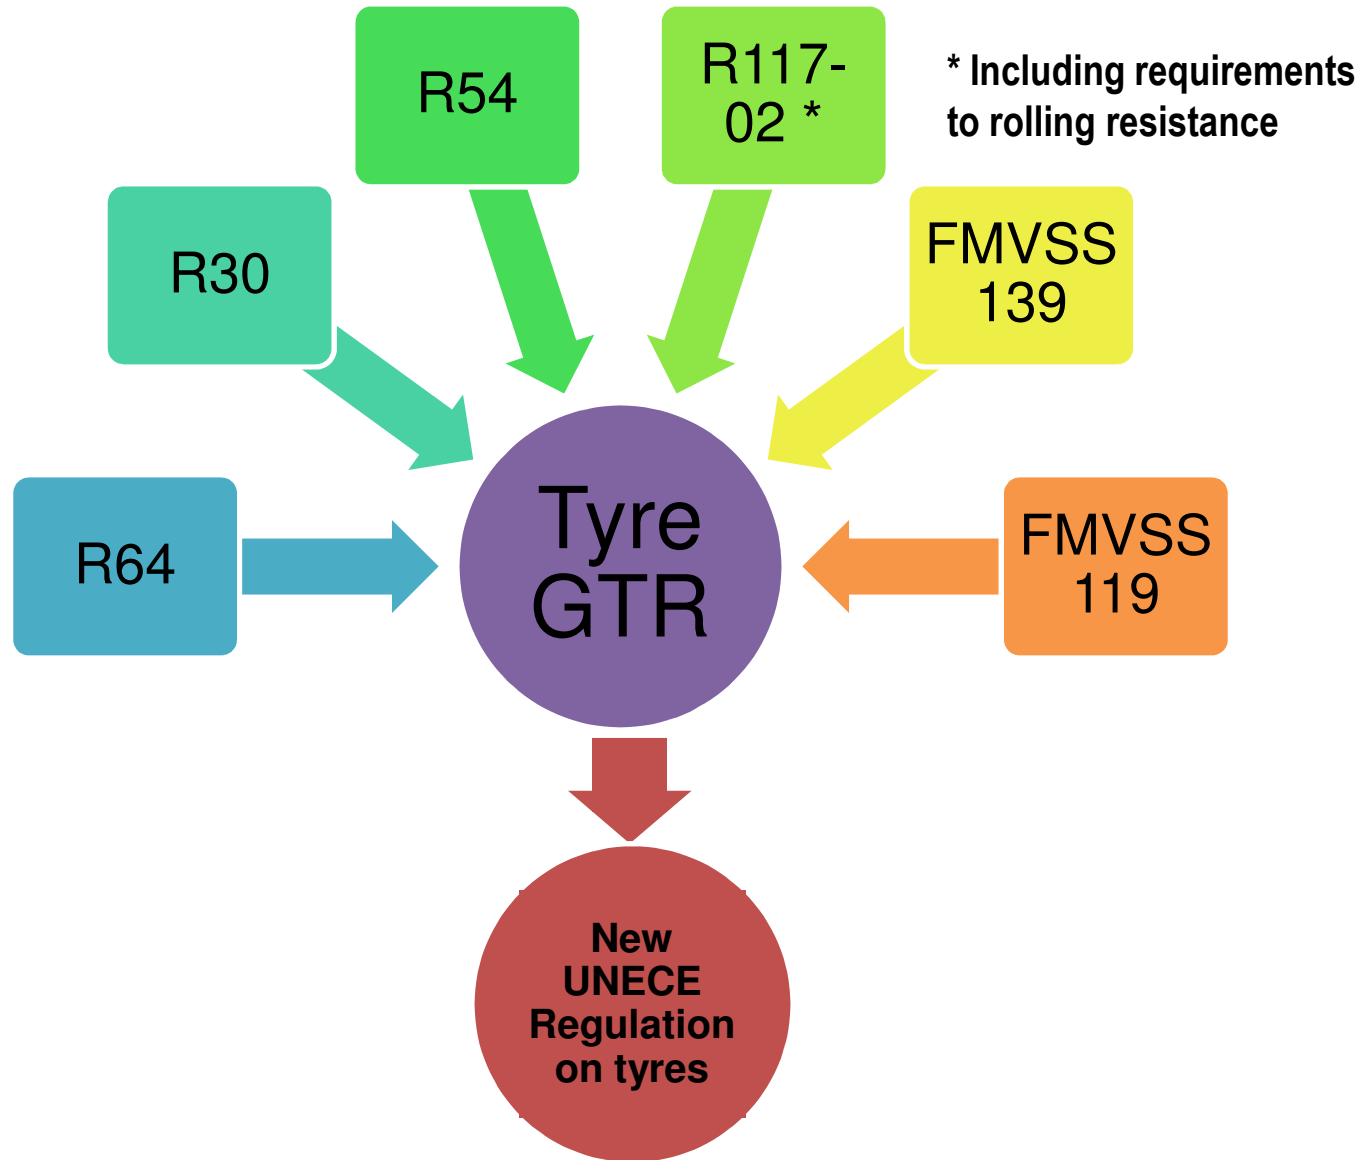

Global Marking

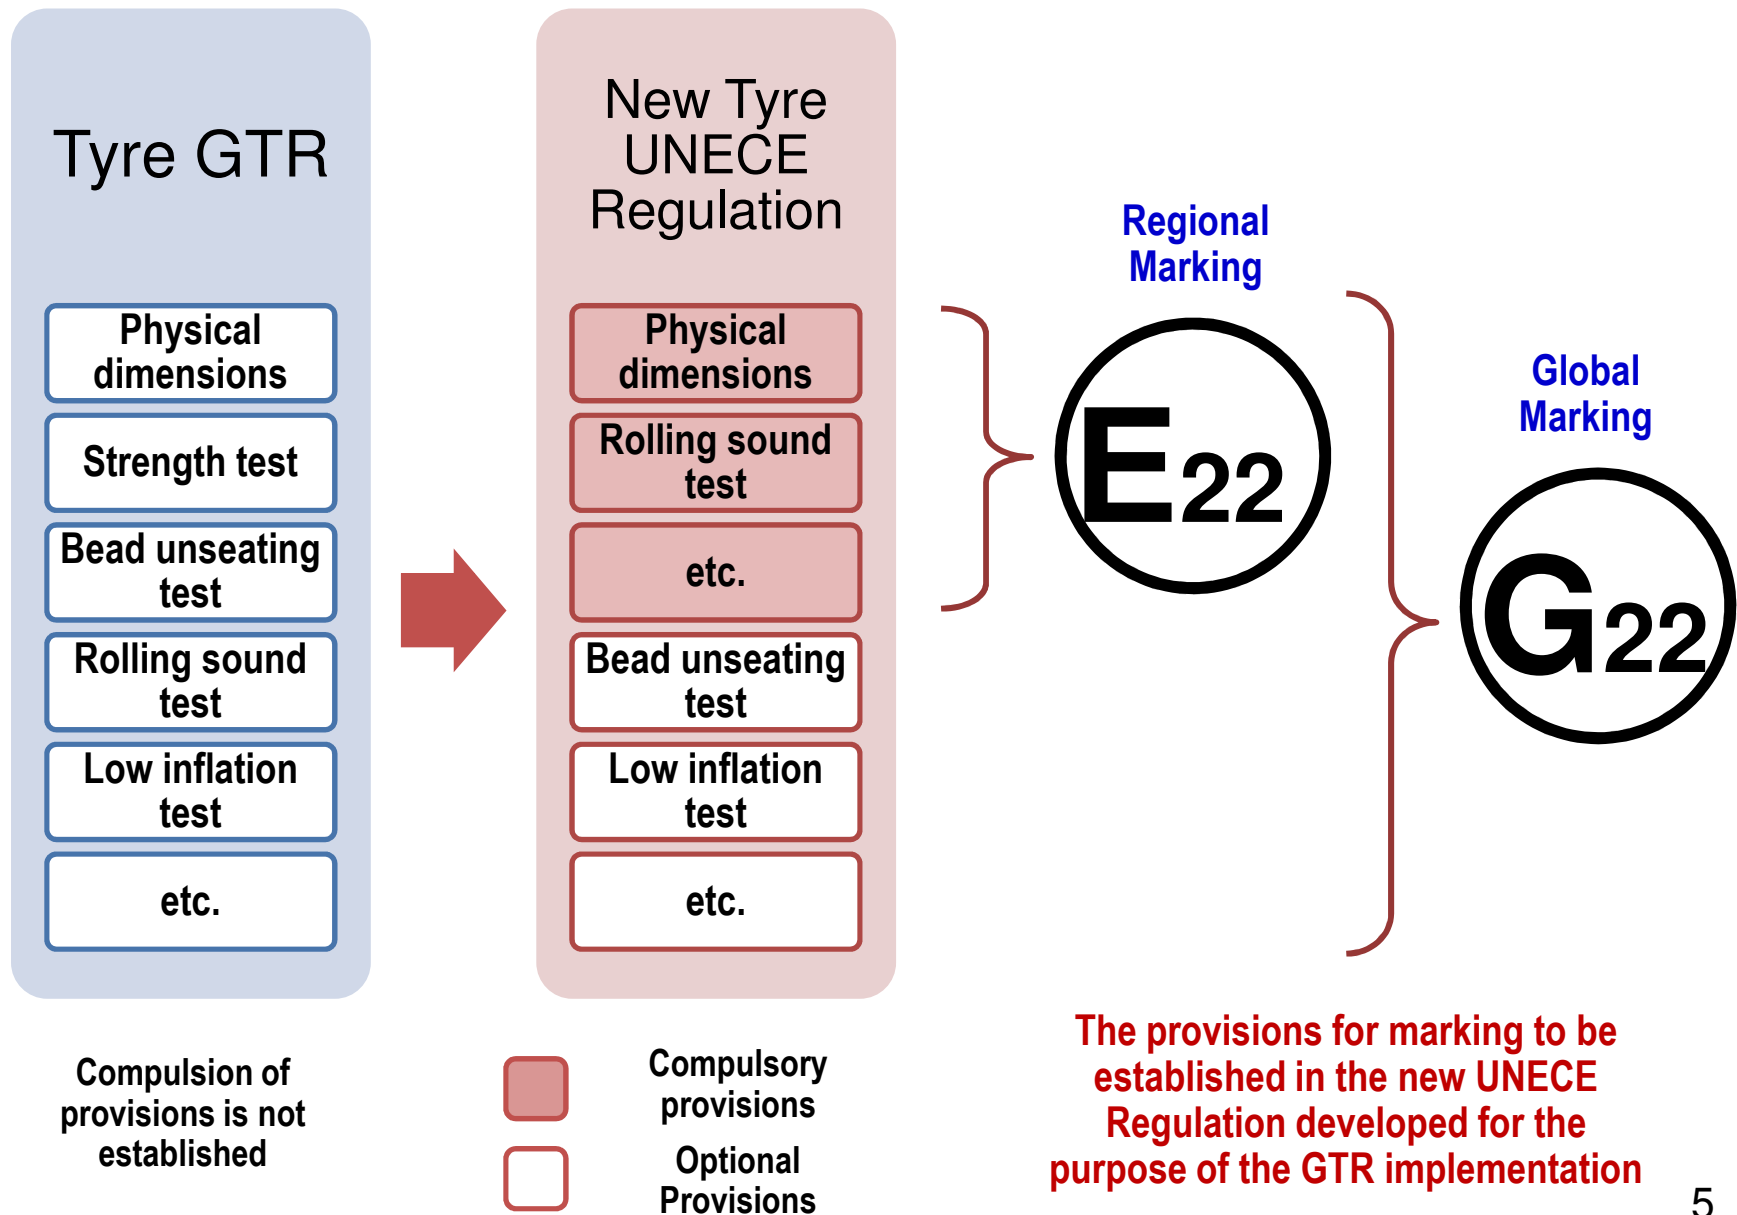

Same marking  
provisions

Marking provisions

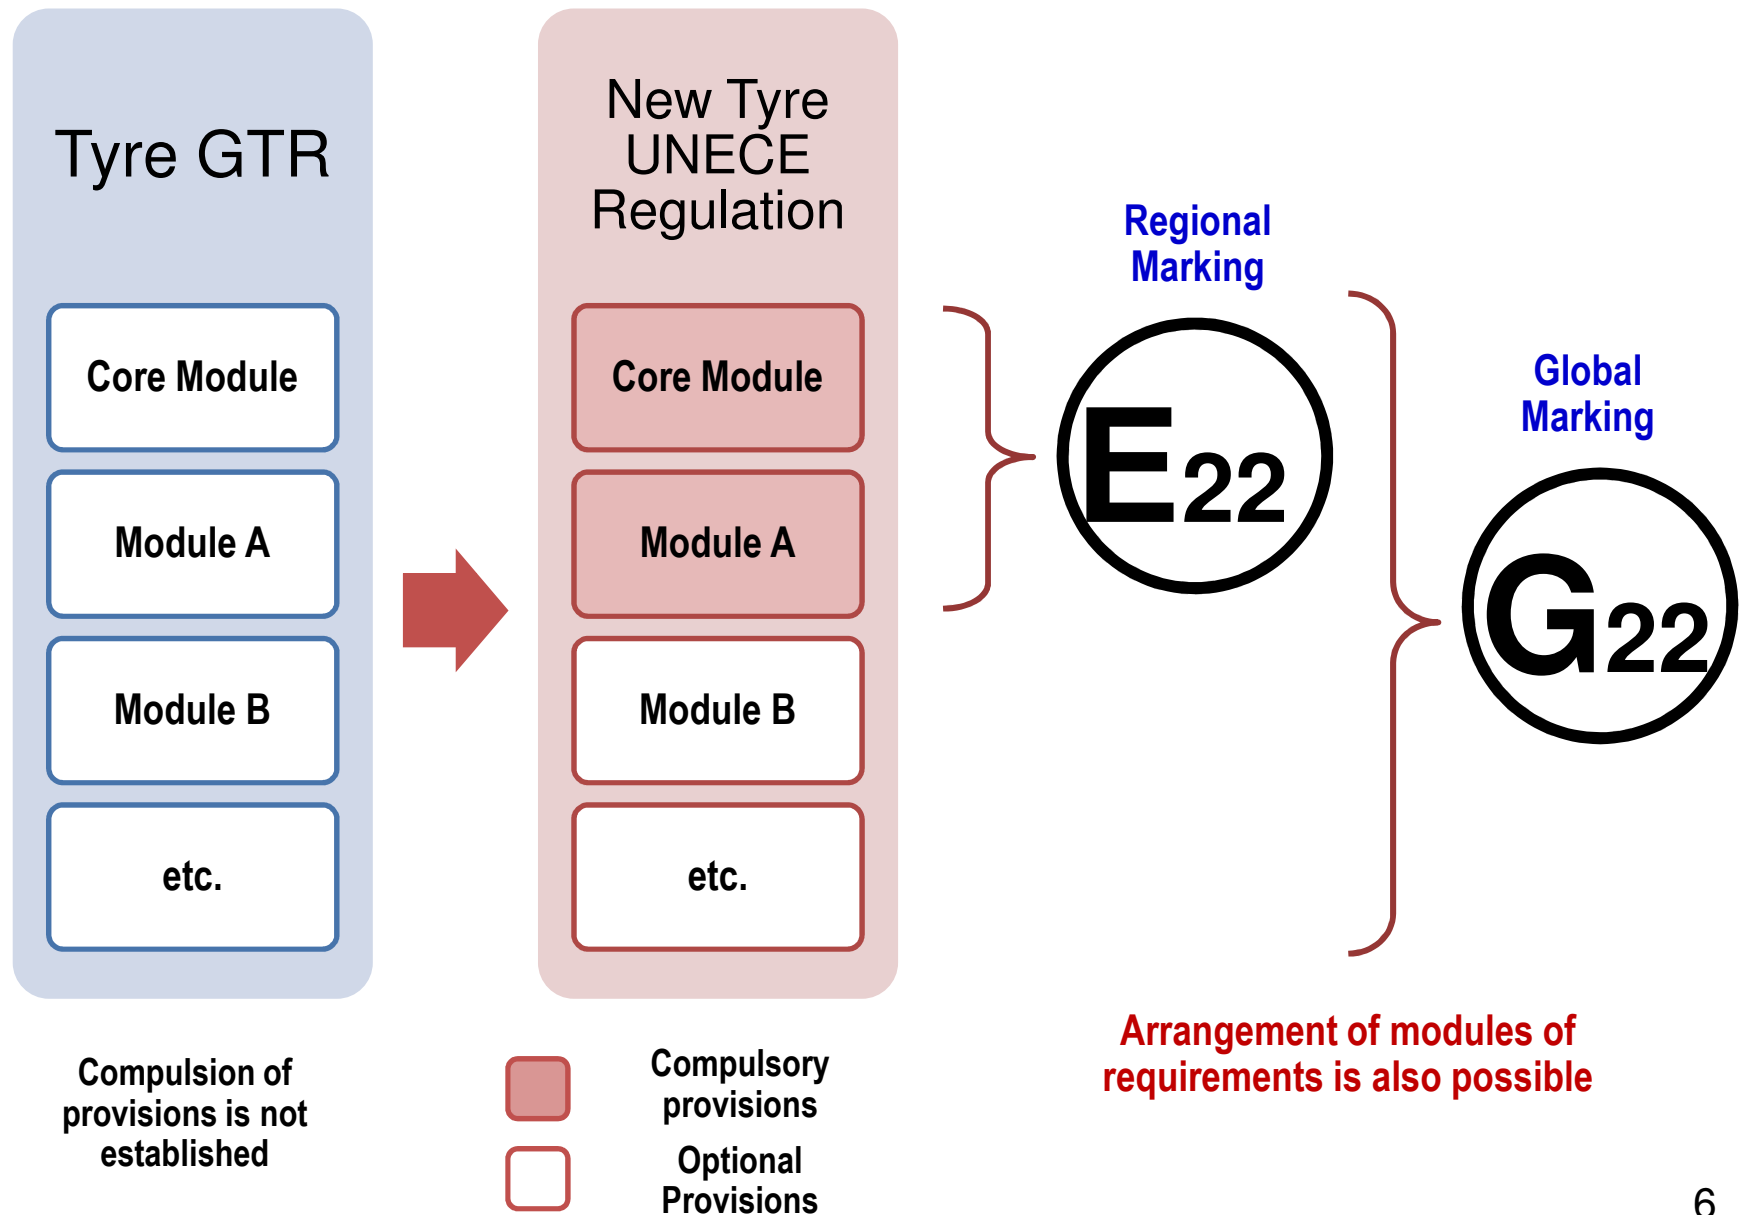

# Application of the Proposed Approach to the Development of Tyre Regulations

# Proposed Approach to Tyre Marking

# Realization of the Modular Approach

# Who Will Not Be Affected: CPs of the 1998 Agreement - non-1958 Agreement countries

- There are just 5 non-1958 Agreement Countries (ECE/TRANS/WP.29/1073/Rev.3), which cannot proceed as proposed:

Country – CP to the 1998 Agreement	National compliance confirmation
Canada	Self Certification
United States	Self Certification
China	Type Approval
India	Type Approval
Moldova	Type Approval (?)

- For those countries an issue of a mutual recognition of results of compliance evaluation conducted in other country, should be decided at their national level.

# Options for Non-Affected Countries

- Accept the UNECE type-approval mark

once it is introduced in the GTR.

- Create its own type-approval mark added to

the GTR mark

This mark will not be recognized

by the countries – CPs of the 1959 Agreement

# Reservation of Space in the GTR Marking

**Variant 1:**

ABC123

XYZ 012439

**Variant 2:**

ABC123

The space for marking corresponding to the approval numbers granted by the countries, which are not the Contracting Parties to the 1958 Agreement, and the auxiliary marking (if any) used by the countries applying the self-certification procedures (the number is shown as an example).

The space for marking granted in accordance with the mechanism of the 1958 Geneva Agreement (the number is shown as an example).

**Thank you for your attention!**
