UN/SCETDG/43/INF.26/Add.1 UN/SCEGHS/25/INF.9/Add.1

Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals

17 June 2013

Sub-Committee of Experts on the Transport of Dangerous Goods

Sub-Committee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals

Forty-third session

Geneva, 24–28 June 2013

Item 11 (a) of the provisional agenda

Issues relating to the Globally Harmonized System of Classification and Labelling of Chemicals:

Corrosivity criteria

Twenty-fifth session

Geneva, 1 - 3 July 2013

Item 2 (c) of the provisional agenda

Classification criteria and hazard communication:

Corrosivity criteria

Harmonisation of the skin corrosion classification criteria in the UN Model Regulations on the Transport of Dangerous Goods with those in GHS

Transmitted by the European Chemical Industry Council (CEFIC)

Annex I

Comparison of classifications results for butylamine; diethylamine; triethylamine; sodium hydroxide; (S)-2-chloropropionic acid; 3,3'-iminodipropylamine; acetic acid and phosphoric acid in Japan, the Republic of Korea, New Zealand, European Union and the UN Model Regulations on the Transport of Dangerous Goods

| EU - GHS - SV - CLP (1272/2008) - Composite | 7664-38-2 | Skin corrosion/irritation - Skin Corr. 1B: H314 Causes severe skin burns and eye damage. (C >= 25 %) | Phosphoric acid |
| EU - GHS - SV - CLP (1272/2008) - Concentration Limits | 7664-38-2 | Skin corrosion/irritation - Skin Corr. 1B: H314 Causes severe skin burns and eye damage. (C >= 25 %); Skin corrosion/irritation - Skin Irrit. 2: H315 Causes skin irritation. (10 % <= V <25 %); Serious Eye Damage/Eye Irritation - Eve Irrit. 2: H319 Causes serious eye irritation. (10 % <= V <25 %) | Phosphoric acid |
| (1272/2008) - Labelling | | Signal Word: Danger Hazard: H314: Causes severe skin burns and eye damage. Prevention: P280: Wear protective gloves/protective clothing/eye protection/face protection. P260: Do not breathe dust/fume/gas/mist/vapours/spray. P264: Wash thoroughly after handling. Response: P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a POISON CENTER or doctor/physician. P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. P363: Wash contaminated clothing before reuse. P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P321: Specific treatment (see label). Storage: P405: Store locked up. Disposal: P501: Dispose of contents/container in accordance with local/regional/national/international regulations. Notes: B: Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and, therefore, these solutions require different classification and labelling since the hazards vary at different concentrations. In Part 3 of Annex VI entries with Note B have a general designation of the following type: "nitric acid". In this case the supplier must state the percentage concentration of the solution on the label. Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis. | |
