Proposal to amend 8.1.6.3

Transmitted by the Government of Belgium

Introduction

1. The maintenance and periodical inspection of gas detectors, toximeters, breathing apparatus and similar equipment can best be done by the manufacturer of this equipment. The authorization of the manufacturer by the competent authority is deemed to be an unnecessary administrative burden by this delegation.

2. The proposal also aims at re-establishing the situation as it existed under the ADNR Regulations.

3. As a consequence question 110 04.0-03 of the ADN catalogue of questions should be amended accordingly.

Proposal

Amend 8.1.6.3 as follows:

"8.1.6.3 The special equipment referred to in 8.1.5.1 and the gas detection system shall be checked and inspected in accordance with the instructions of the manufacturer by the manufacturer concerned or by persons authorized for this purpose by the competent authority. A certificate concerning this inspection shall be carried on board."
