Explanations of Entries in Table C

Transmitted by Germany

Introduction

Germany took notice of the fact that subsection 3.2.3.1 of ADN does not contain any explanations for column 5 under 'Explanatory notes for each column' mentioning why subsidiary risks are listed in brackets for various entries. Likewise, ADN does not contain any further explanations elsewhere.

The same applies to the entry '*' in columns 6 to 18, which is not explained in subsection 3.2.3.1, 'Explanations concerning Table C', where it would be expected to be found. If there are explanations, they are contained in column (20) of the respective entry, which is not in conformity with the system.

Proposal

The informal working group on substances should be asked to propose a corresponding addition for subsection 3.2.3.1, 'Explanations concerning Table C' to be decided on by the Safety Committee in its 24th session in January 2014.

Grounds

The ADN will be easier to understand by those users who did not participate in the development of its provisions.
