

Correction to the justification section of ECE/TRANS/WP.29/GRE/2013/7

I. Proposal

Section "2. Justification", paragraph 3., amend to read:

"3. As the minimum mounting height of 250 mm is acceptable for the side marker and retro-reflectors, it is not considered that the lowering of the front position lamp will be detrimental for traffic safety. Further, based on present requirements of Regulation No. 48, position lamps are no more switched ON alone except that for the signalisation of parked vehicles."

II. Justification

A mistake occurred in the editing process of the document submitted to the secretariat, which created confusion. Therefore, the secretariat is proposing this correction.
