

# Japan Opinion for TF-BTA Proposals

*Opinion:* Japan supports the proposals [ECE/TRANS/WP.29/GRSP/2014/17](#) and [ECE/TRANS/WP.29/GRSP/2014/31](#), provided that the test area is defined to have an angle  $\theta$  up to 30 deg., as specified in the current regulation.

*Reason:* Proper evaluation cannot be guaranteed beyond the 30 deg. area.

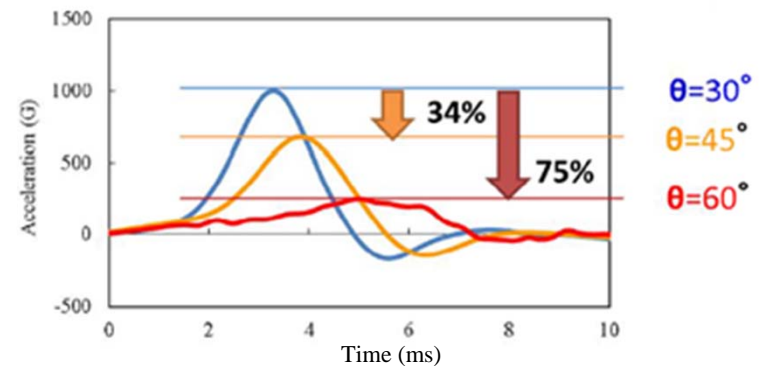

## Comparison bet. impactor and human model

(TF-BTA 7-06)

## Effect of the impactor's rotation

Angle	30 degree	45 degree	60 degree
5 ms			
10 ms
