***Report to 176th WP.29 session
from
the 28th IWVTA Informal Group
meeting (Phase 2)***

1. Alignment of provisions on approval numbering in UN R90 in line with those of Schedule 4 of the 1958 Agreement
2. Candidates of UN Regulations to be added to Annex 4 of UN Regulation No.0 in IWVTA Phase 2
3. Note to WP.29

1. Alignment of provisions on approval numbering in UN R90 in line with those of Schedule 4 of the 1958 Agreement

The pros and cons of the different ways for alignment

Variant	Pros	Cons	Supported by
1. Amend Schedule 4 to exclude UN R90 from its scope	-UN R90 remains unchanged	-possibility to open the door to more UN Regulations to be excluded in the future	CLEPA
2. Amend UN R90 to have type approval number and type approval code	-approval markings of UN R90 remains unchanged	-Custom authority at ports may not understand the difference between type approval code on the product and packaging and type approval number , which may cause expensive problems downstream for manufacturers	The Russian Federation (refer to GRVA-01-15 proposed by RUS)
3. Amend UN R90 to delete some suffix indicating dimension or test group	-provisions for type approval number seem? to be in line with those for Schedule 4	-The concept for codification of parts and approval scheme will be lost, which will affect traceability for the product verification at COP checks, etc.	CLEPA (refer to GRVA-01-41 proposed by CLEPA)

IWVTA IWG recommends that GRVA should consider variants 2. and 3. first which may solve the issue without amending Schedule 4.

2. Candidates for UN Regulations to be added to Annex 4 of UN Regulation No.0 in IWVTA Phase 2
