

Benchmarking Transport Infrastructure Construction Costs - GE.4

*SC.3, 63rd session
Geneva, 6-8 November 2019*

Mandate

ITC at its eighty-first session (February 2019) extended mandate of GE.4 until June 2020

GE.6 Final Report should:

- Identify models, methodologies, tools and good practices for evaluating, calculating and analysing inland transport Infrastructure costs
- Identify and list terminologies used for costing inland transport Infrastructure
- Collect and analyse data for benchmarking inland transport construction costs.

Progress

- **Draft consolidated list of terminologies available** (covering all inland modes including road, rail, inland waterways/ ports and intermodal terminals)
- Questionnaire on **benchmarking of road and rail transport infrastructure construction costs** submitted in August 2019/ re-submitted in October 2019
- **Response rate for infrastructure construction cost quantification/ benchmarking models remains low** – request for additional inputs issued

Request for assistance

Request for assistance from SC.3 to:

- Provide feedback on the **draft inland waterways/ ports questionnaires** as prepared by the Group of Experts
- Provide **data for analysis and benchmarking of inland waterways/ port infrastructure construction costs**
- **Identify models, methodologies, tools and good practices** for evaluating, calculating and analysing construction costs of inland waterways and ports

Thank you for your attention
