

Proposal for amendments to GRVA-05-05

I. Proposal

In the "Proposal for a new UN Regulation on uniform provisions concerning the approval of vehicles with regard to cyber security and of cybersecurity management systems",

Paragraph 6.11., amend to read:

"6.11. ~~Existing vehicle type approvals shall not lose their validity due to the expiration of the manufacturer's Certificate of Compliance for CSMS. The~~ **expiry or withdrawal of the manufacturer's Certificate of Compliance for CSMS shall be considered, with regard to the vehicle types to which the CSMS concerned was relevant, as modification of approval, as referred to in section 8.**

II. Justification

According to paragraph 7.3.1. of the draft Regulation "the manufacturer shall have a valid Certificate of Compliance for the Cyber Security Management System relevant to the vehicle type being approved". This is one of the necessary requirements for a type approval to be issued under paragraph 5. Therefore, the absence of such a certificate, independently of whether the certificate was withdrawn or expired, should be considered as a modification affecting the technical performance with respect to cybersecurity and/or documentation required in the Regulation. Paragraphs 8.1.1.-8.1.3. shall apply in this case.
