EUROPEAN AGREEMENT ON IMPORTANT INTERNATIONAL COMBINED TRANSPORT LINES AND RELATED INSTALLATIONS (AGTC)

Extension of the AGTC network to include Euro-Asian links

Note by the secretariat

A. MANDATE

1. In accordance with the decision of the Working Party at its fortieth session, the secretariat has prepared below a first draft of possible amendments to Annex I of the AGTC Agreement covering Euro-Asian links and aligning in this respect the AGTC network with that of the European Agreement on Main International Railway Lines (AGC) (TRANS/WP.24/101, para. 13). These amendment proposals would complement those made by the Russian Federation as contained in document TRANS/WP.24/2004/1.

\[2\] As of 2004, the ECMT and the UNECE have adopted cooperative arrangements in establishing the “Joint ECMT/UNECE Working Party/Group on Intermodal Transport and Logistics” consisting of separate ECMT and UNECE segments, the UNECE segment consisting of its Working Party on Intermodal Transport and Logistics.
2. The ad hoc expert group on Euro-Asian combined transport links, established by the Inland Transport Committee, may wish to prepare, on the basis of the secretariat draft, concrete proposals for such Euro-Asian links covering administrative, legal and technical issues (TRANS/WP.24/99, para. 4). Such routes should also include lines on the so-called “Southern corridor” linking Europe to Central Asia through Bulgaria, Turkey and Iran (TRANS/WP.24/97, para. 17). Contracting Parties are invited to submit concrete proposals to the secretariat.

3. The Working Party may wish to provide guidance to the secretariat and the expert group on the identification of such links, taking account of the Euro-Asian Land Transport Corridors identified at the second International Euro-Asian Conference on Transport (St. Petersburg, 2000) and of work undertaken in this field by UNESCAP, UIC, TARSECA as well as other international organizations and initiatives. The expert group could meet in the margins of the forthcoming session of the Working Party in September 2004 to determine such links and to identify the appropriate combined transport installations (terminals, border crossing points, gauge interchange stations and ferry links) for consideration by the Working Party and inclusion into Annexes I and II of the AGTC Agreement.

B. POSSIBLE AMENDMENTS TO ANNEX I OF THE AGTC AGREEMENT

4. In a first step, the secretariat has identified below important international combined transport lines that would align the AGTC and AGC networks (for an updated version of the AGC network refer to document TRANS/SC.2/2003/12 prepared for the UNECE Working Party on Rail Transport). In a second step, additional lines of importance for Euro-Asian combined transport may need to be identified as well as related transport installations (terminals, border crossing points, gauge interchange stations and ferry links/ports).
