

Ministerstvo dopravy

Experience with PPP Projects in the Czech Republic

Emanuel Šíp, Deputy Minister
Ministry of Transport of the Czech Republic

International Conference “Knowledge Sharing and Capacity
Building on Promoting Successful Public-Private Partnerships
in the UNECE Region”, Tel Aviv, 5-8 June 2007

Contents of Presentation

1. Problems of Czech Transport Infrastructure Development

2. PPP As a Tool for Road Projects

3. PPP As a Tool for Rail Projects

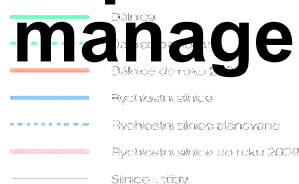

4. Other Potential Spheres of PPP Projects in Transport

5. Summarizing Remarks

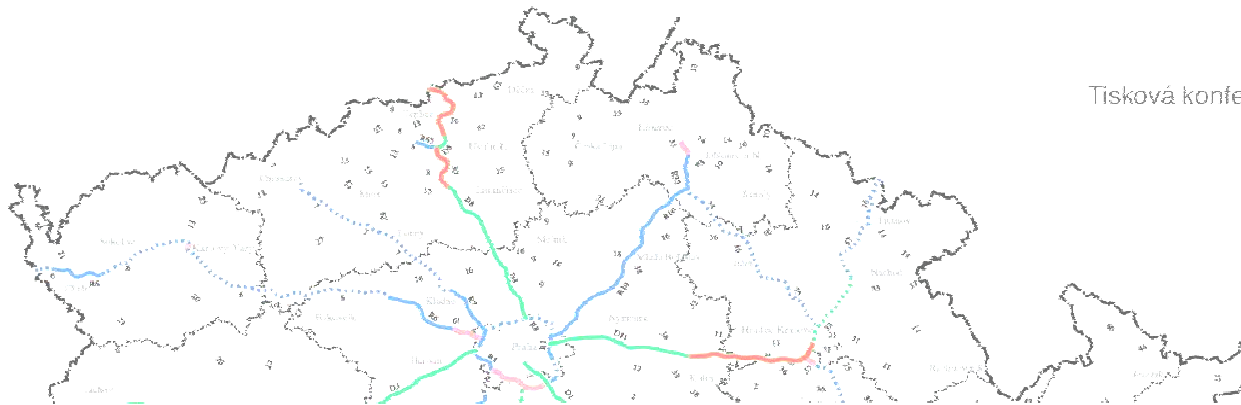

1. Problems of Czech Transport Infrastructure Development

Main Problems of Czech Transport Infrastructure Development (1)

- **Speeding-up the construction of motorways (540 km in operation, 465 km to be constructed), high-speed roads (310 km in operation, 750 km to be constructed) and rail corridors**
- **Improving the everyday maintenance of road and rail network**
- **Raising the share of rail and inland waterway transport in the transport market**
- **Improvement of infrastructure construction management and efficiency**

Main Problems of Czech Transport Infrastructure Development (2)
