DefSecIntel Mission

AUTOMATED SURVEILLANCE FOR FREEDOM DEFENDERS

Background

- Coming from Estonian MoD
- Three years in security and technology industry
- Last 2 years involved in different computer vision companies
- Computers (AI) are faster, but not smarter
- Super intelligence is far far away
- If possible, we should use AI for efficiency, accuracy and speed

AI-powered.

- ## 05 | Law Enforcement **Control**

How benefit from AI?

- Computer vision – computers do it million x faster than humans
- Detection
- Inspection
- Minimize or eliminate False alerts
- Optimization

AI in trade and logistics

- Efficient customs procedures
- Document forging detection
- Smart City (streets and traffic)
- Route planning and optimization
- Trend analyze (big data analyze)

Thank you.
