

SESSION I – WORKING GROUPS

Alan Kurešević, Working group (4) for Quantum Communication

SES

Alan Kurešević received a MSc degree in Computer Science, Telecommunication and Information Technology from University of Zagreb. After a short university carrier, Alan joined Astra (today SES) in 1994.

Alan led several projects and technology developments that have provided the foundation for the company's new services. He pioneered development and introduction of the first commercial satellite digital TV broadcast system. He is continuing with positioning satellite in the global connectivity and telecommunication services. In the last years his work is focused on the governmental and institutional customer. He works closely with Luxembourg government, United Nations, European Space Agency and other governments and international organisations. Alan leads a team working on commercial projects and technology developments in the domain of hybrid satellite/terrestrial connectivity, quantum secure communication and humanitarian disaster response communication. Alan holds a position of Vice President, Engineering. He is a member of the Board of Directors of Redu Space Services, Belgium based company co-owned by SES and President of SES Techcom Afrique, 100% owned SES west African engineering company.
