Coding & ID in Agriculture/Fresh F&V (GPC, GLN) & eLAB

Agenda

- ☐ Introduction Frug I Com
- ☐ Identification Global ID key – GLN
- ☐ Classification Global “Sector & Supply Chain” key – GPC
- ☐ Development new GPC segment Crops
- ☐ Use cases GPC segment Crops
- ☐ UN/CEFACT eLAB
- ☐ GS1 in EU F&V WG – Agricultural Quality Standards
- ☐ Q&A

- Apples
- Appels
- Malus domestica
- Brick Code: 10005900

Introduction Frug I Com

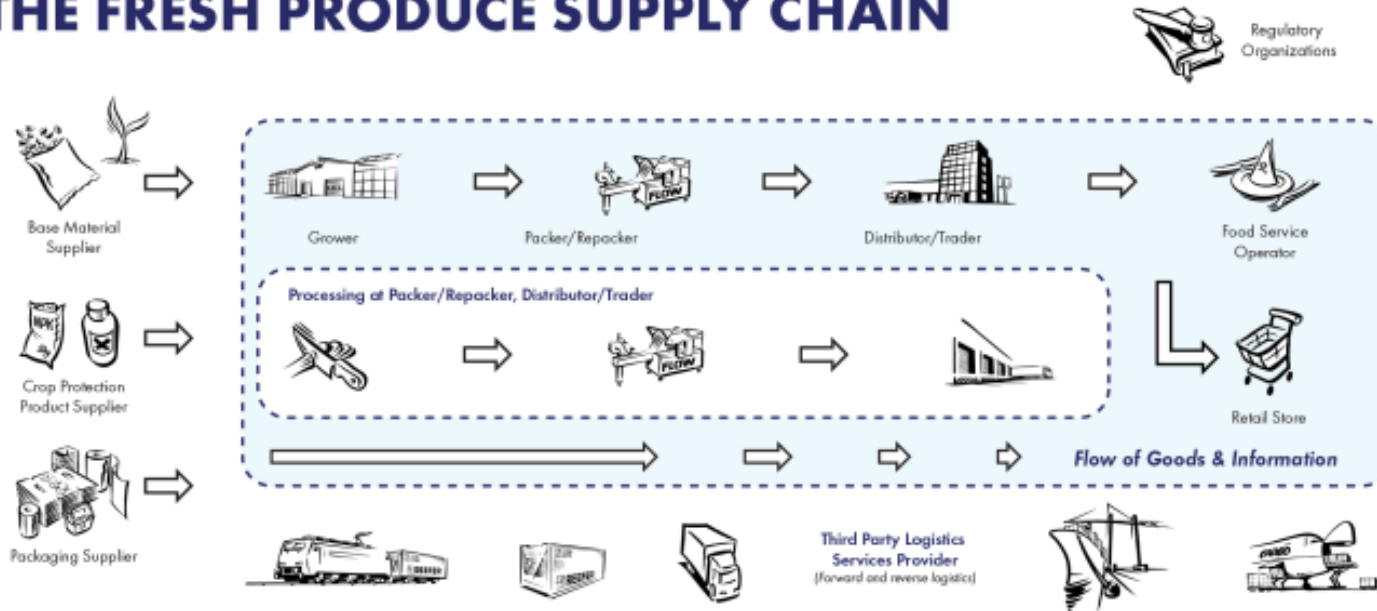

Foundation

Dutch Fresh Produce Centre (GroentenFruit Huis in Dutch)

Standard GS1 (downstream) & UN/CEFACT (upstream)

Business needs (e.g. ISO BIC code as unique ID for containers)

THE FRESH PRODUCE SUPPLY CHAIN

GPC – Part of the GS1 System of Standards

Identify

GS1 Identification Numbers

Companies, Products, Locations,
Logistics, Assets and Services

Capture

GS1 Data Carriers

Barcodes and EPC-enabled RFID

Share

GS1 Data Exchange

Classification, Master Data,
Transactional Data and Physical Event Data

Identification with Global ID Key GLN

SCENARIO 3

SME - GROWER & PACKER

One physical location – Two roles – Three GLNs

Each GLN is based in the same Global Company Prefix (GCP)

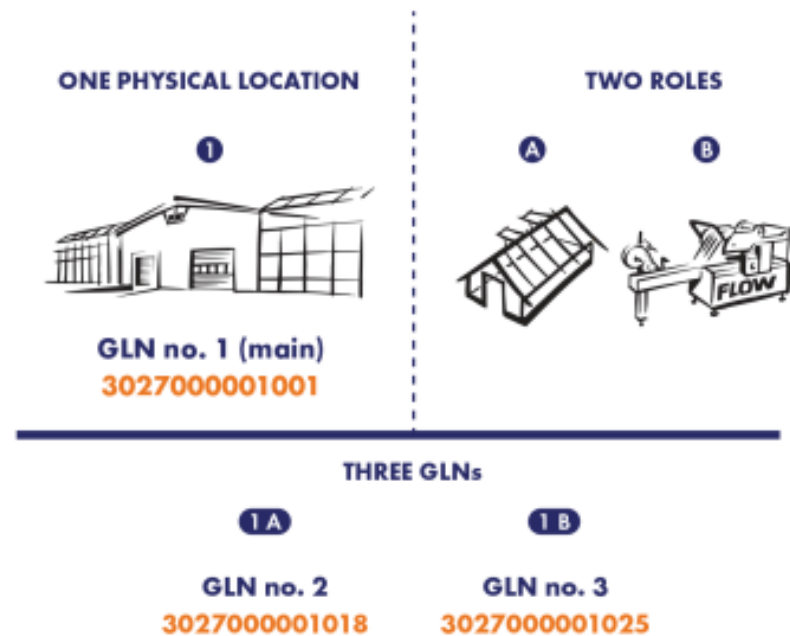

- One legal entity
- One physical location
- Two roles

Role A - Growing

(production unit including harvesting and sorting)

Role B - Packing

- Results in: Three GLNs, because they are also doing packing activities for other SME's

Classification Global “Sector & Supply Chain” key – GPC

Pome Fruits / Pitvruchten

Class Code: 50250800

- Apples
- Appels
- *Malus domestica*
- Brick Code: 10005900

- Japanese Medlars
- Japanse Mispels/Loquats
- *Eriobotrya japonica*
- Brick Code: 10005901

- Nashi
- Nashi-Peren
- *Pyrus pyrifolia*
- Brick Code: 10005902

- Pears
- Peren
- *Pyrus communis*
- Brick Code: 10005903

- Quinces
- Kweeperen
- *Cydonia oblonga*
- Brick Code: 10006173

- Crabapples
- Wilde Appels
- *Malus sylvestris*
- Brick Code: 10006338

- Medlar
- Mispels
- *Mespilus germanica*
- Brick Code: 10006414

- Ya Pear (Shandong)
- Ya Peren (Chinese Peren)
- *Pyrus ussuriensis* var. *viridis*
- Brick Code: 10006415

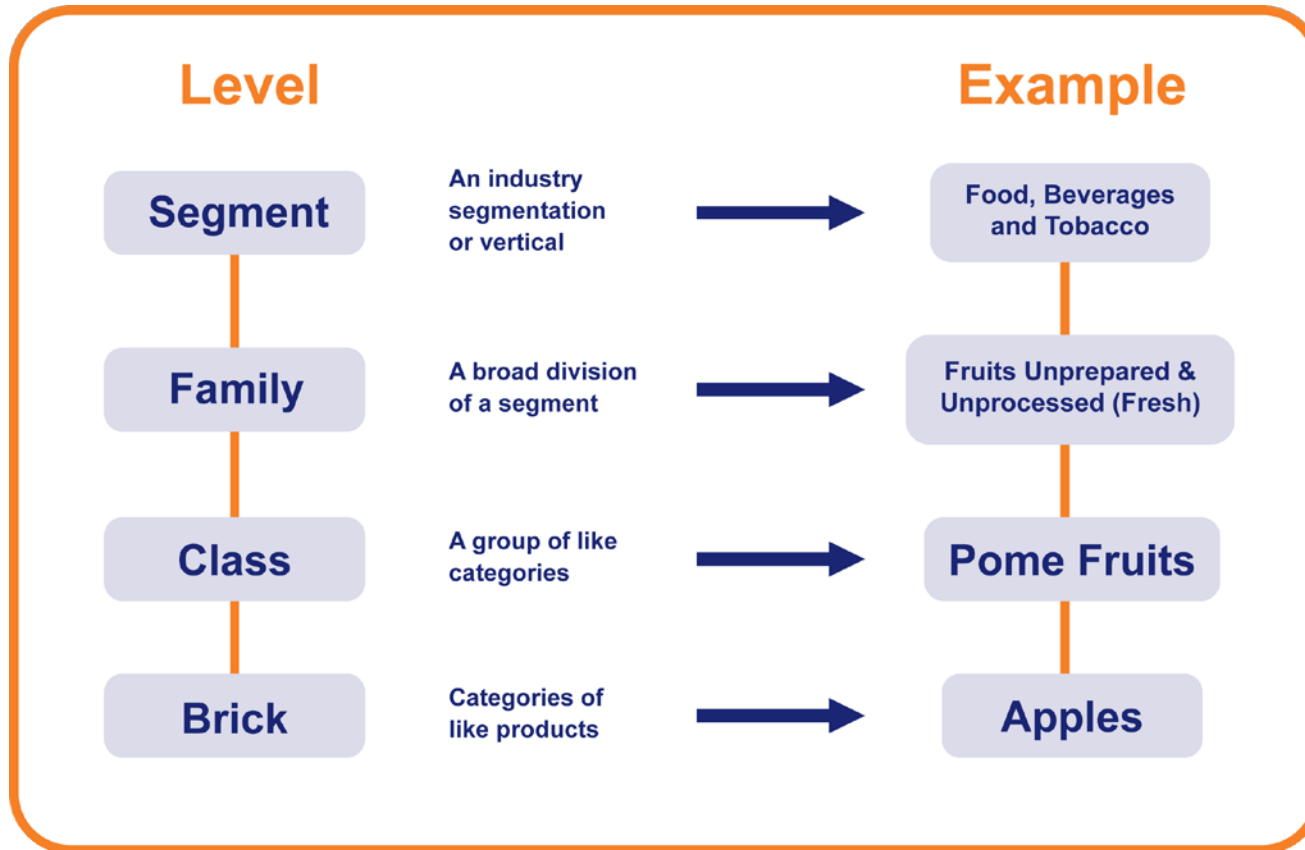

What is GPC?

- A system that gives buyers and sellers a common language for grouping (or categorising) products in the same way, everywhere in the world
- Improves the GDSN data accuracy and integrity, speeds up the supply chain's ability to react to consumer needs, and contributes to breaking down language barriers.
- Since 2007, GPC adoption has grown in coverage and in implementation (in parallel with the use of GTINs) in GDS

Classification Global “Sector & Supply Chain” key – GPC

Classification Global “Sector & Supply Chain” key – GPC

Segment		Family		Class	
Food, Beverages and Tobacco		Fruits U & U (Fresh)		Pome Fruits	
Bricks	Brick Code	Brick Attributes		Attribute Values	
Apples	10005900	Apple Variety		Elstar	
Japanese Medlars		Country/Zone of Origin		Netherlands	
Nashi		Growing Method		Conventional	
Pears		Quality (UNECE Standard)		Class I	
Quinces					

Classification Global “Sector & Supply Chain” key – GPC

**A GTIN can only be assigned to one Brick
More GTINs are classified under one and the same Brick**

**Brick Description:
Apples**

**GTIN: Global Trade Item Number
GTIN = 123456789123C**

Brick Code = 10005900

GPC Brick Code = Mandatory Field GDSN (GS1 DAS/1SYNC Datapool)

GPC Translations

GPC is officially published in Oxford English and is translated to **16** other languages

Arabic

Italian

Czech

Japanese

Chinese

Persian

Dutch

Portuguese

Finnish

Russian

French

Serbian

German

Swedish

Hungarian

Spanish

Classification Global “Sector & Supply Chain” key – GPC

Class

50260400
SS Peppers

Bricks

- Chilli Peppers
- Elongated Sweet Peppers (Pointed)
- Flat Sweet Peppers (Tomato Peppers)
- Hot Peppers
- Pepper Variety Packs
- Square Sweet Peppers (Blunt)
- Square Tapering Sweet Peppers (Peg Top)

Selecting Systems and Components

Cherry Tomatoes - Round
Ronde Cherrytomaten
Lycopersicum esculentum
Brick Code: 10006162

• Tomatoes - Oblong
• Pruintomaten
• *Lycopersicum esculentum*
• Brick Code: 10006163

Tomatoes - Round
Ronde Tomaten
Lycopersicum esculentum
Brick Code: 10006165

• Tomatoes Variety Packs
• Tomaten - Assortimenten
• *Lycopersicum esculentum*
• Brick Code: 10006166

**Upstream Information Exchange needs GPC
for apple trees and tomato plants**

Development GPC new segment Crops

Overview GPC

Plant-based Agriculture

- **Fruit & Vegetables (Fresh Foods)**

Available - main commodities western world (scope: trade)

- **Flowers, Plants & Bulbs (Horticulture)**

Available - all relevant commodities (scope: trade)

- **Crops cultivated, Plants Products**

New development (NOT related to trade legislation)

- ✓ Animal feed: corn/maize, alfalfa
- ✓ Processed foods: grains, rice, potatoes, sugar beets and sugar cane
- ✓ Other processing industry: cotton, flax, rapeseed, olives (olive-oil) and winegrapes

Development GPC new segment Crops

- **Overlap in sectors**

GPC available for Horticulture and Fresh Foods

- **Plants**

More commodities/products from the same plant

Wheat vs byproduct Straw

Celery leaves, Stem celery, Turnip rooted celery

- **Purpose**

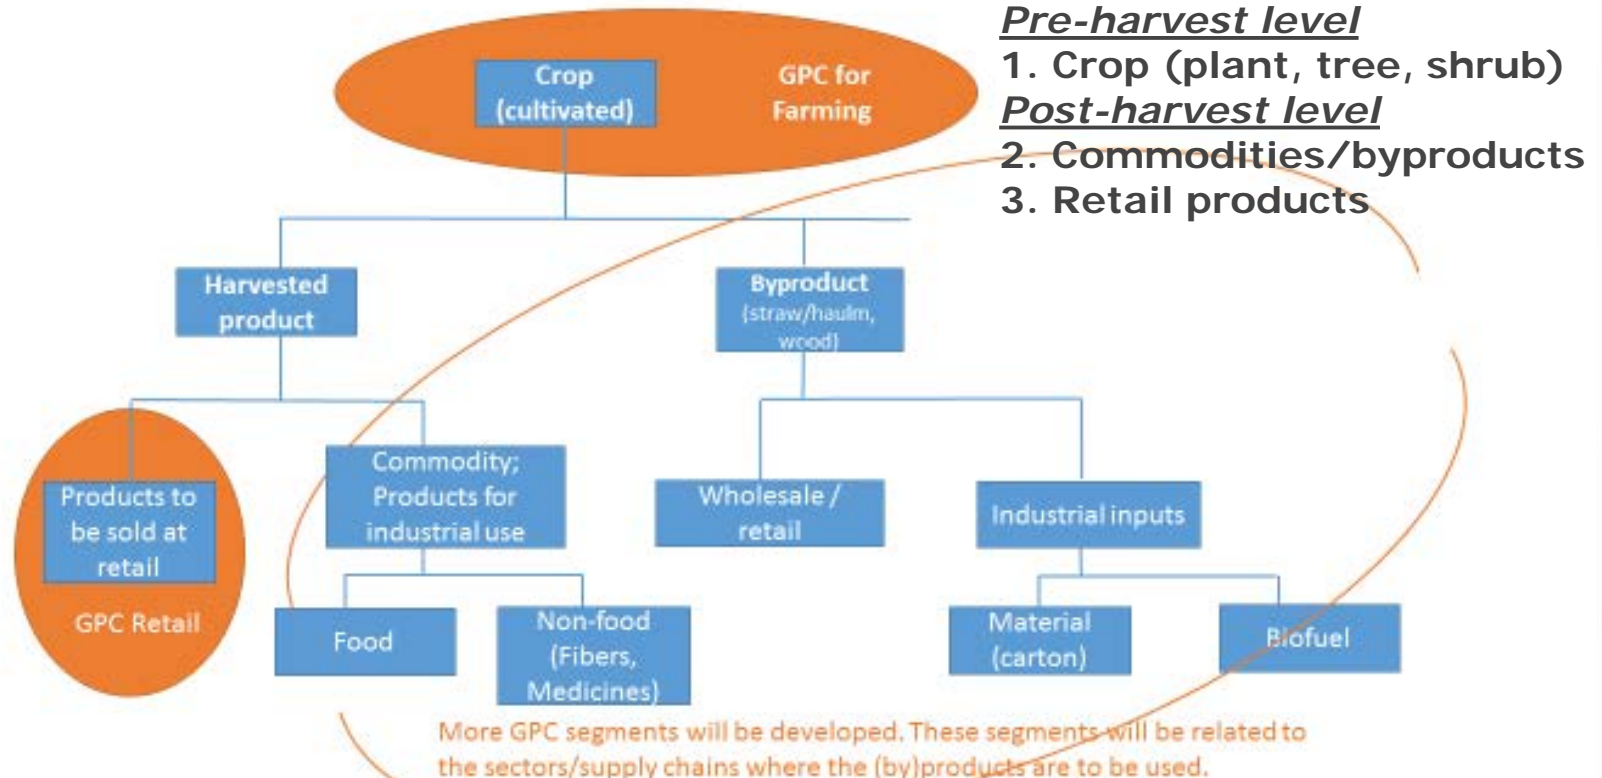

Tomatoes for industry – fresh consumption

Byproducts (tomato-straw) – added value for waste

- **Type of commodity**

Grain – Vegetable – Fruit - Fiber

Development GPC new segment Crops

Classification with Global ID - GPC

What

Supply chain partners do need the “**GS1 Key**” **GPC** as unique Global ID

General primary production identification (upstream)

Classification Plant based pre-harvest phase & animal based

- Crops (cultivated)
- Livestock (live animals) *(out of scope in this presentation)*

More specific product identification (downstream & upstream)

Plant based post harvest & animal based and not alive

- Identify Harvested product/commodity
- Identify Livestock products (more or less available, improvements)

Use cases GPC segment Crops (beyond GDSN=Master data retail)

Three use cases:

- ITC Global Sustainable Network/Colombian Coffee Growers Federation
- UN/CEFACT eCrop* - Crop Data (e.g. Farm Digital project)
- UN/CEFACT eLab - Laboratory Observation Report

** UN/CEFACT eCrop supported by countries: US, Austria and The Netherlands. Based on GS1 Keys*

Identification with Global ID - GLN

The Sustainability Network Initiative of **UN/ITC** & **GS1** supports a unique Global ID for each individual agricultural producer

Who

All supply chain partners do need the GS1 Key **GLN** as unique Global ID. (Also starting point GS1 in Europe standards deployment Fresh Produce)

General identification in Agriculture

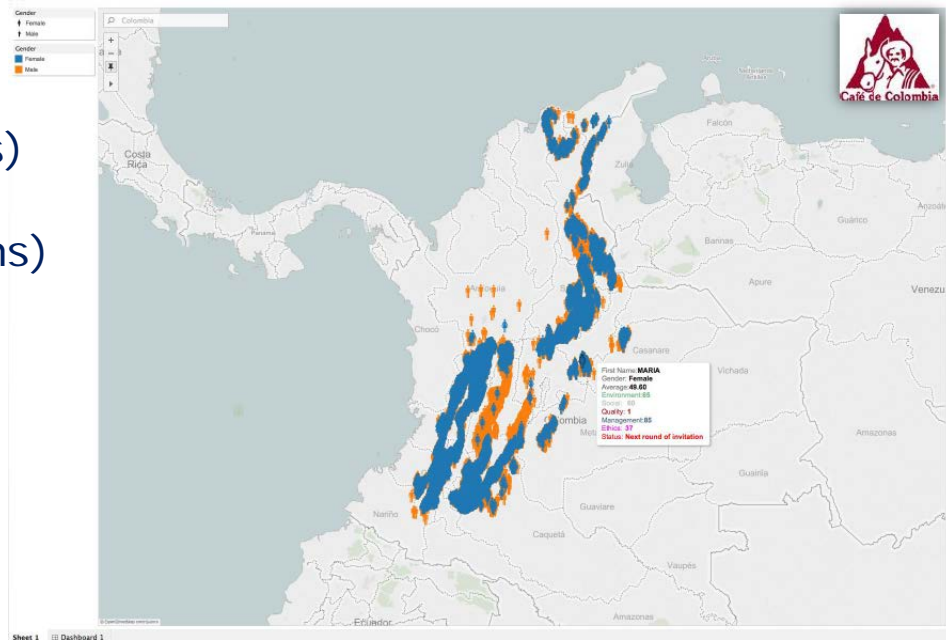

- SME of primary producer food & non food

More specific identification in Agriculture

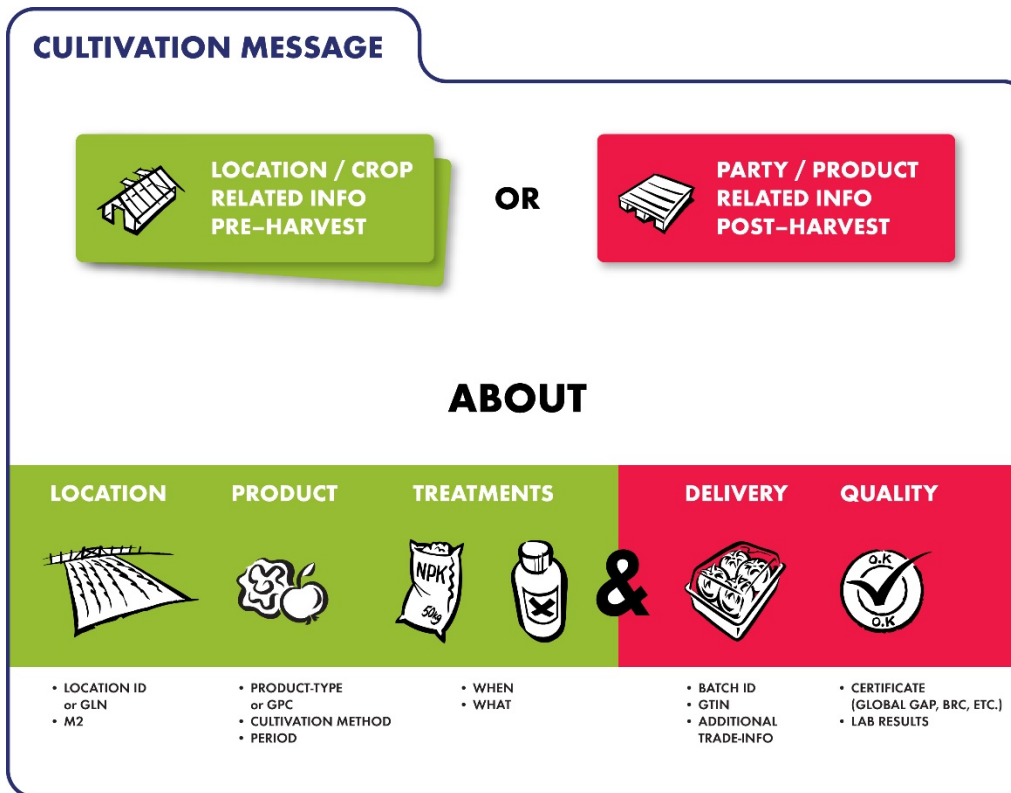

- Production Site of primary producer
- Produce Handling Unit of primary producer/packer

Use cases GPC segment Crops

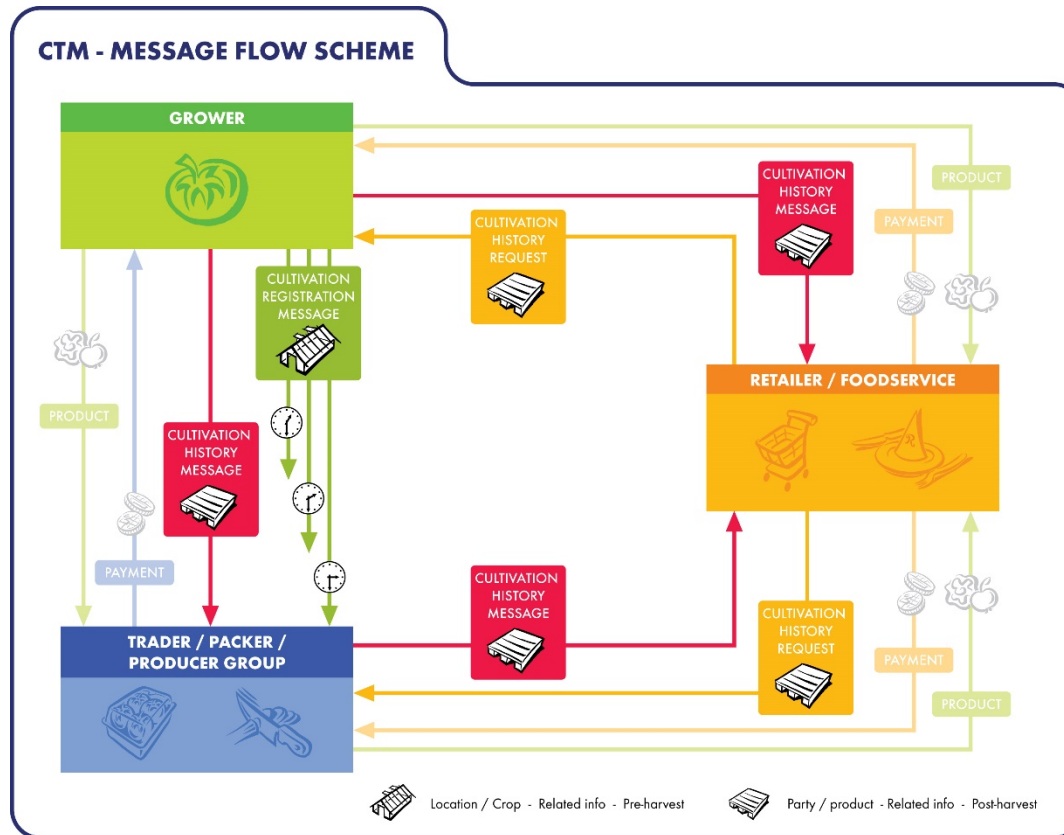

- ❑ Different plots
- ❑ Crop - coffee bean plant
- ❑ Harvested product (beans)
- ❑ Commodity (roasted beans)
- ❑ Product (at retail store)
- ❑ Growers with other crops

Use cases GPC segment Crops

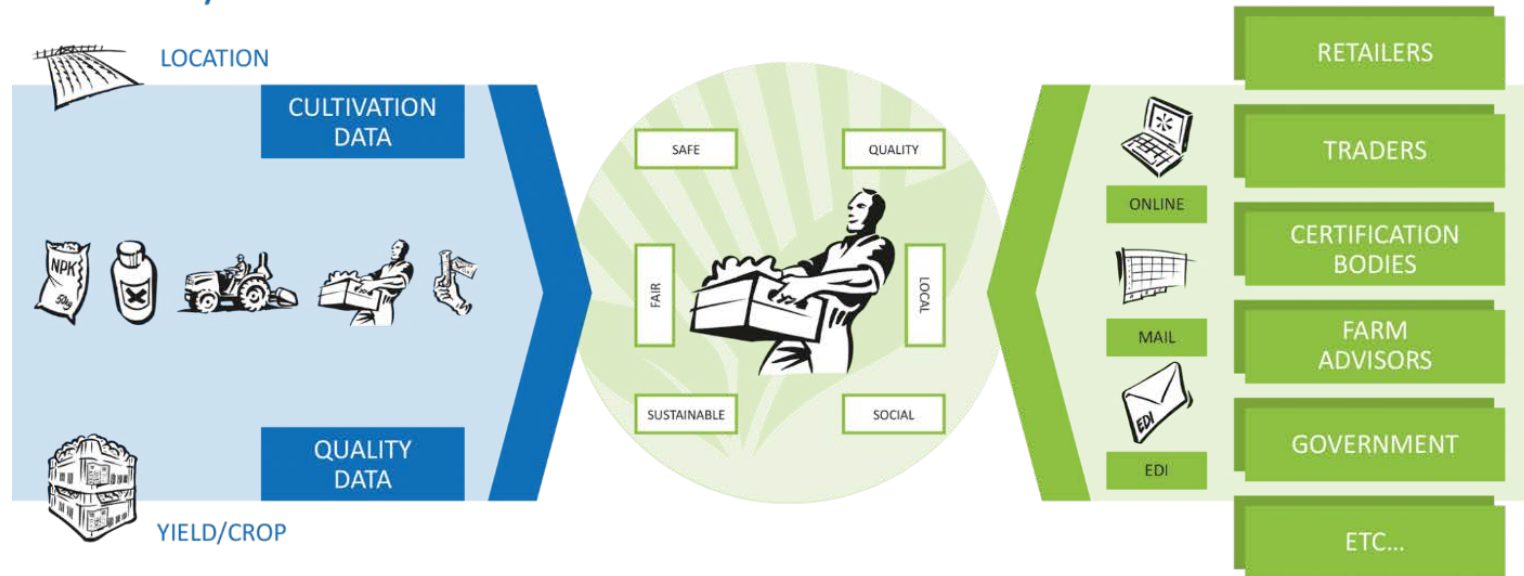

Use cases GPC segment Crops

Use cases GPC segment Crops - eCrop

Why...

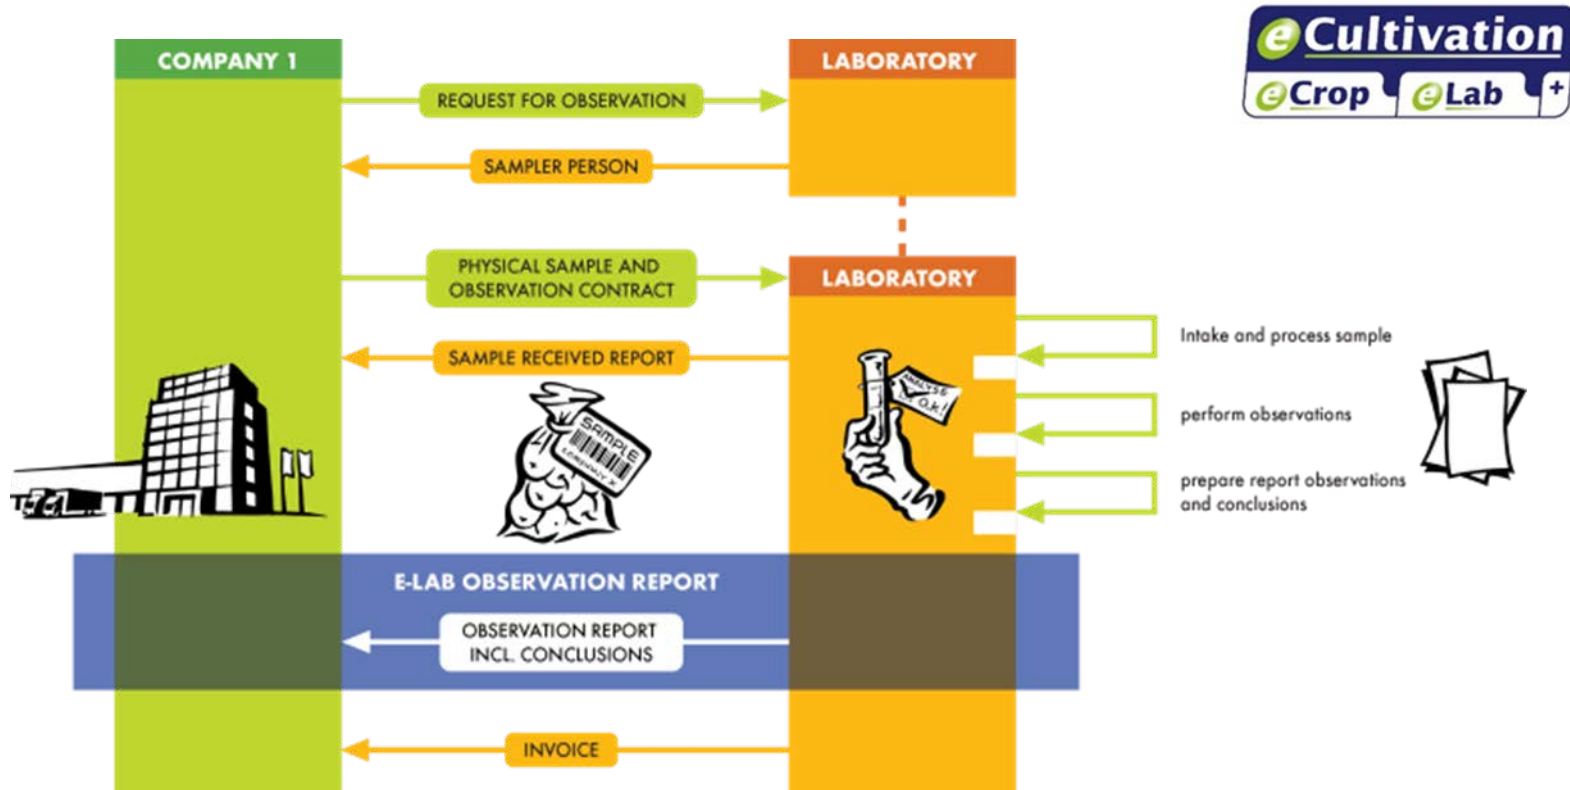

A CONCERN FOR THE GROWER...

Use cases GPC segment Crops

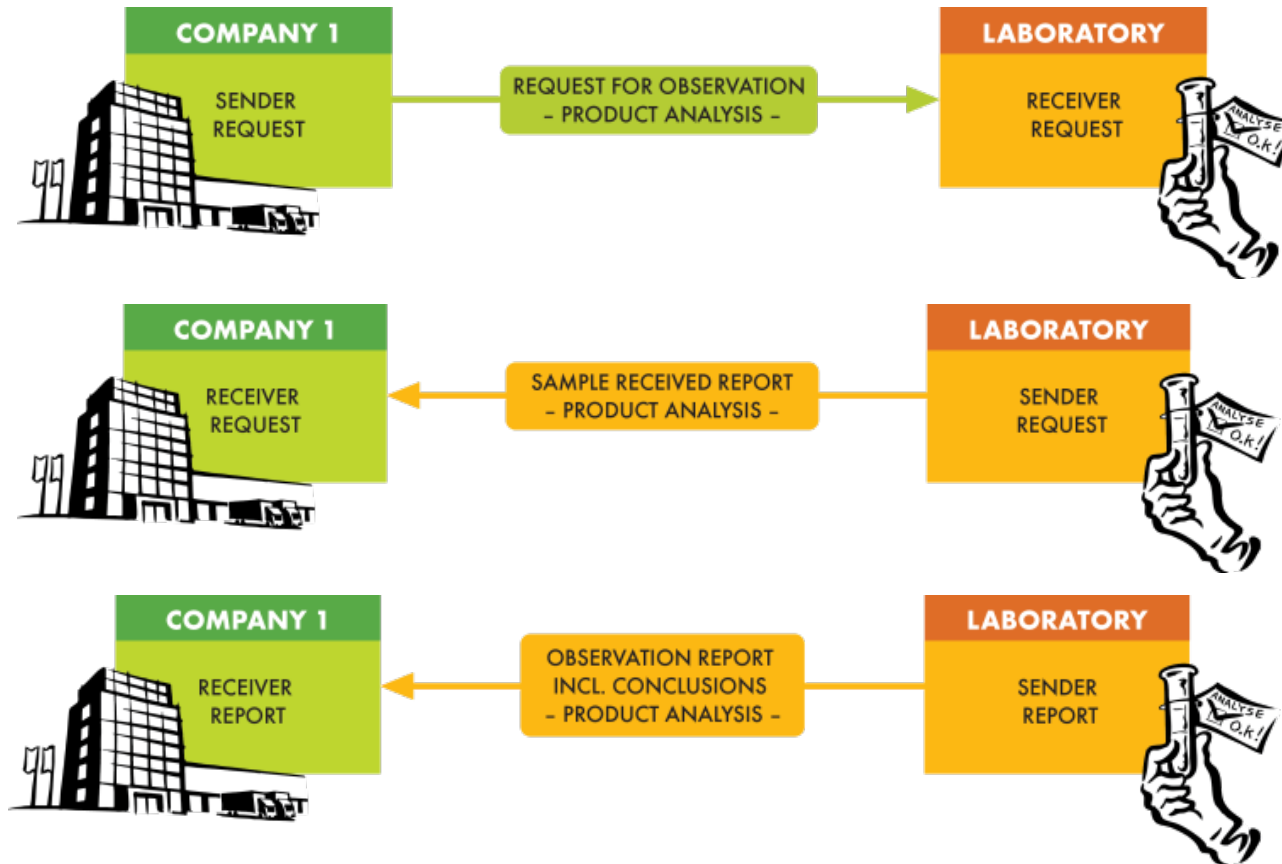

Gain for industry

- Proper international classification for several use cases
- Suitable for The Global Sustainability Network
- Suitable for UN/CEFACT eCrop (pre harvest)
- Suitable for UN/CEFACT eLab (pre harvest)
- Common upstream applications in horticulture, fresh produce & commodities and animal feed
- ✓ Quality Control
- ✓ Crop Protection
- ✓ Yield Measurement including Waste Management
- Suitable for UN/CEFACT Traceability (pre- and post harvest)
business need for further development of EPCIS standard

UN/CEFACT eLab

UN/CEFACT eLab

GS1 in EU F&V WG – Agricultural Quality Standards

Next steps to think about – solving problems for SME's

❑ Information on F&V labels – digitization

Guidance regarding use of 2D barcodes with label information for the consumer (GS1 2D or QR-codes)

❑ Identification grower & packer (dispatcher/shipper)

Simple Global ID's for companies will support sustainability. Not for every certification scheme a separate producer ID. Unique ID's needed for Quality reasons/trust (legislation) and certification schemes (grower / packer have to comply with several certification schemes).

Q & A

Questions?

Stone Fruit / Steenvruchten Class Code: 60250000

- Apricots
- Abrikoszen
- Prunus armeniaca
- Brick Code: 10005905

- Sour Cherries
- Zure Kersen
- Prunus cerasus
- Brick Code: 10005907

- Stemless/Sweet Cherries
- Zoete Kersen
- Prunus avium
- Brick Code: 10005908

- Damsons
- Damson-Pruimen
- Prunus domestica ssp. insititia
- Brick Code: 10005909

- Mirabelles
- Mirabelle-Pruimen
- Prunus domestica ssp. syriaca
- Brick Code: 10005910

- Nectarines
- Nectarines
- Prunus persica var. nucipersica
- Brick Code: 10005911

- Peaches
- Perziken
- Prunus persica
- Brick Code: 10005912

- Greengages
- Reine Claudes
- Prunus domestica ssp. italica
- Brick Code: 10005913

- Japanese Plums
- Japanse Pruimen
- Prunus salicina
- Brick Code: 10005914

- Plumcots
- Plumcots
- Prunus domestica x armeniaca
- Brick Code: 10005915

- Stonefruit Hybrids
- Hybrides van Steenvruchten
- Interbreeds grown from stonefruits (Hybrids)
- Brick Code: 10005916

- Plums
- Pruimen
- Prunus domestica
- Brick Code: 10005917

- Paraguay
- Wilde Perzikken (Paraguayos)
- Prunus persica var. amygdalus
- Brick Code: 10006443
