

## Mr. Jorn HEERULFF

### **Vice Chairman, Bureau International des Containers**

---

In 1970, Mr. Jorn Heerulff graduated in production engineering and, in 1978, he got a degree in economics.

Since 1974, he has been holding various positions in the international maritime industry. Starting from 1978, he has been devoted to the global intermodal container transportation industry. From 1980, he has been implementing some of the first automatic and electronic container gate movement and M & R message transactions as well as defining a location coding system for container facilities. From 1982, Mr. Heerulff has been promoting ISO EDIFACT syntax based message sets.

Since 1982, he has been a member of various ISO TC104 container working groups and holding various voluntary roles with the BIC (Bureau International des Containers).
