

Mr. Rolf WESSEL

IT Product Manager, SEEBURGER AG

Rolf Wessel is currently an IT Product Manager at SEEBURGER AG focussing on the digitalization of business processes and Electronic Data Interchange (EDI). He is an expert on eInvoicing software applications and services, such as sending, receiving and processing messages plus integration with SAP and other ERP systems. He is a Project Manager at the United Nations Center for Trade Facilitation and Electronic Business (UN/CEFACT) and is currently leading the *Supply Chain Reference Data Model (SCRDM)* project that is the basis of the process-driven Cross-Industry-invoice (CII) of UN/CEFACT, syntax of the CEN norm. Rolf is involved in the hybrid invoice ZUGFeRD initiative led by FeRD, the forum for electronic invoicing in Germany. He is a supply chain management expert at the VeR, the E-Invoice Alliance Germany and he also works in the e-business group of DIN, the German Industry Norm. Rolf represents the German delegation of FeRD at the French-German expert workshops on electronic invoicing - hybrid invoice – Factur-X with the french Forum National de la Facture Electronique (FNFE) supporting the governments initiative on the international standardization and harmonization of eInvoicing processes. Rolf is a graduated in Business Information Systems.
