Trade Sense by PortNet

- Trade Sense is web based platform providing traders with the necessary timely, accurate and dependable information to handle operations of import and export.
- The content of the platform is divided into several sections giving access to up to date informations in order to complete easily the necessary formalities of a cross-border operation to or from Morocco.

Implementation process

Macro implementation schedule

Community platform "Trade Sense"

Procedures and formalities

A proactive approach instead of reactive

Anticipate the preparation of your transactions by informing you about the prices ,the normes and the rules to succeed your operations .

News and informations exchanges

Collaborative space and e-review

Inform all the users about the current and the future events and news related to the international trade
Space of sharing the good practices and experiences between users .

Decision support tools

Value added services

Trusted reference of supplier of services ,cost simulators by incoterm and reports of the import and export flow forecast.

New marketplace

Tool to develop your business

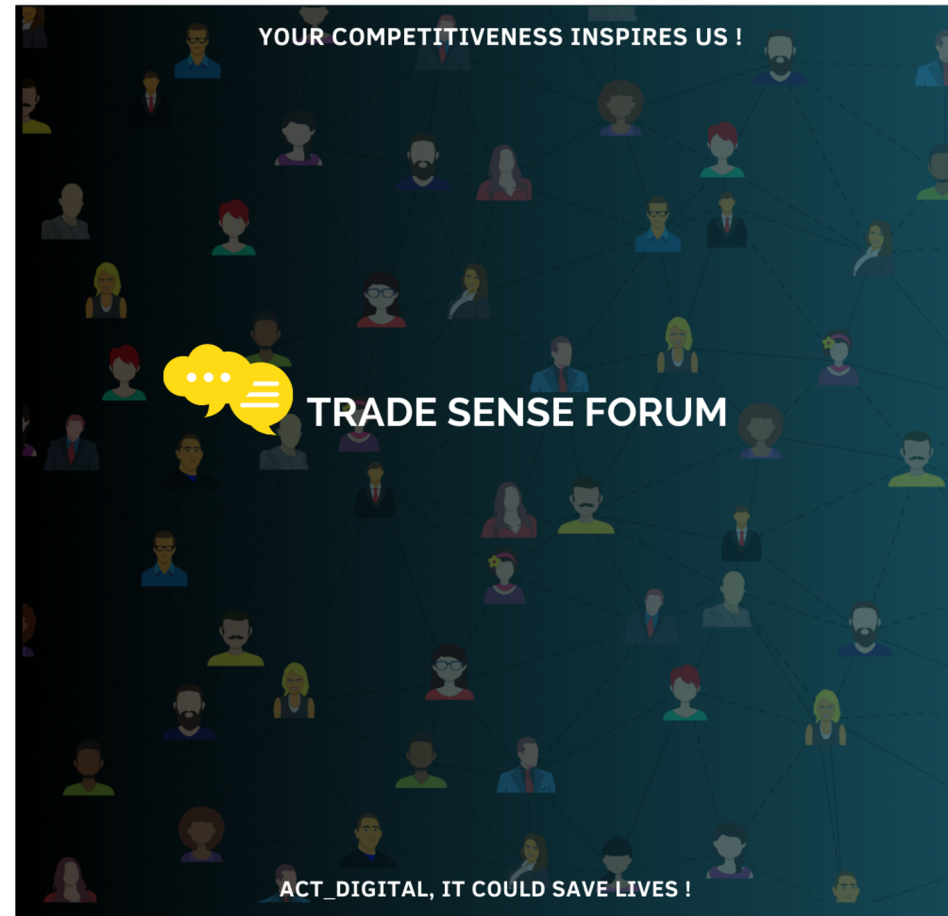

Discovering more about the products and countries you are interested in ,by exploring the international engagement signed by Morocco,knowing the import and export flows and reports of the most relevant market .

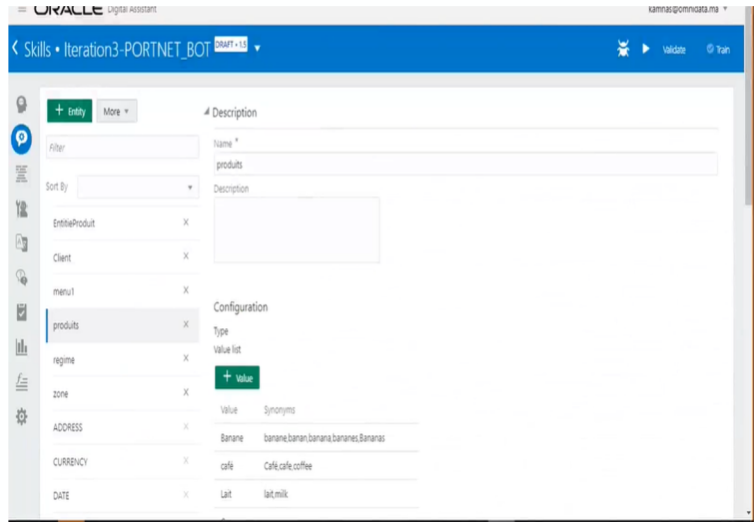

Trade Sense Forum

Trade Sense has an online forum and discussions exchange of international logistic and trade .

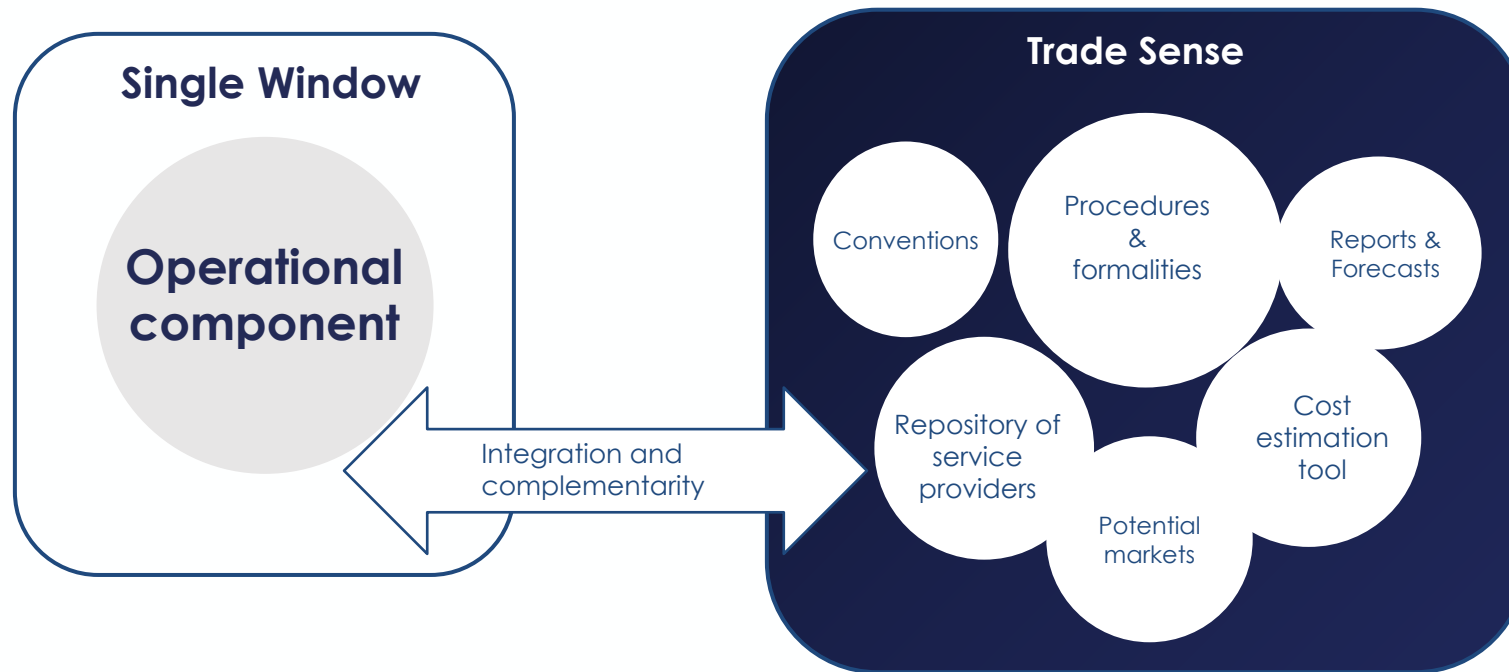

To complete the available offer, we launched the **Trade Sense forum** on july 1,2020.this new collaborative space will allow for the general interest the access to useful informations, experiences and knowledge and will create a synergy between economic operators and all of the international trade ecosystem.

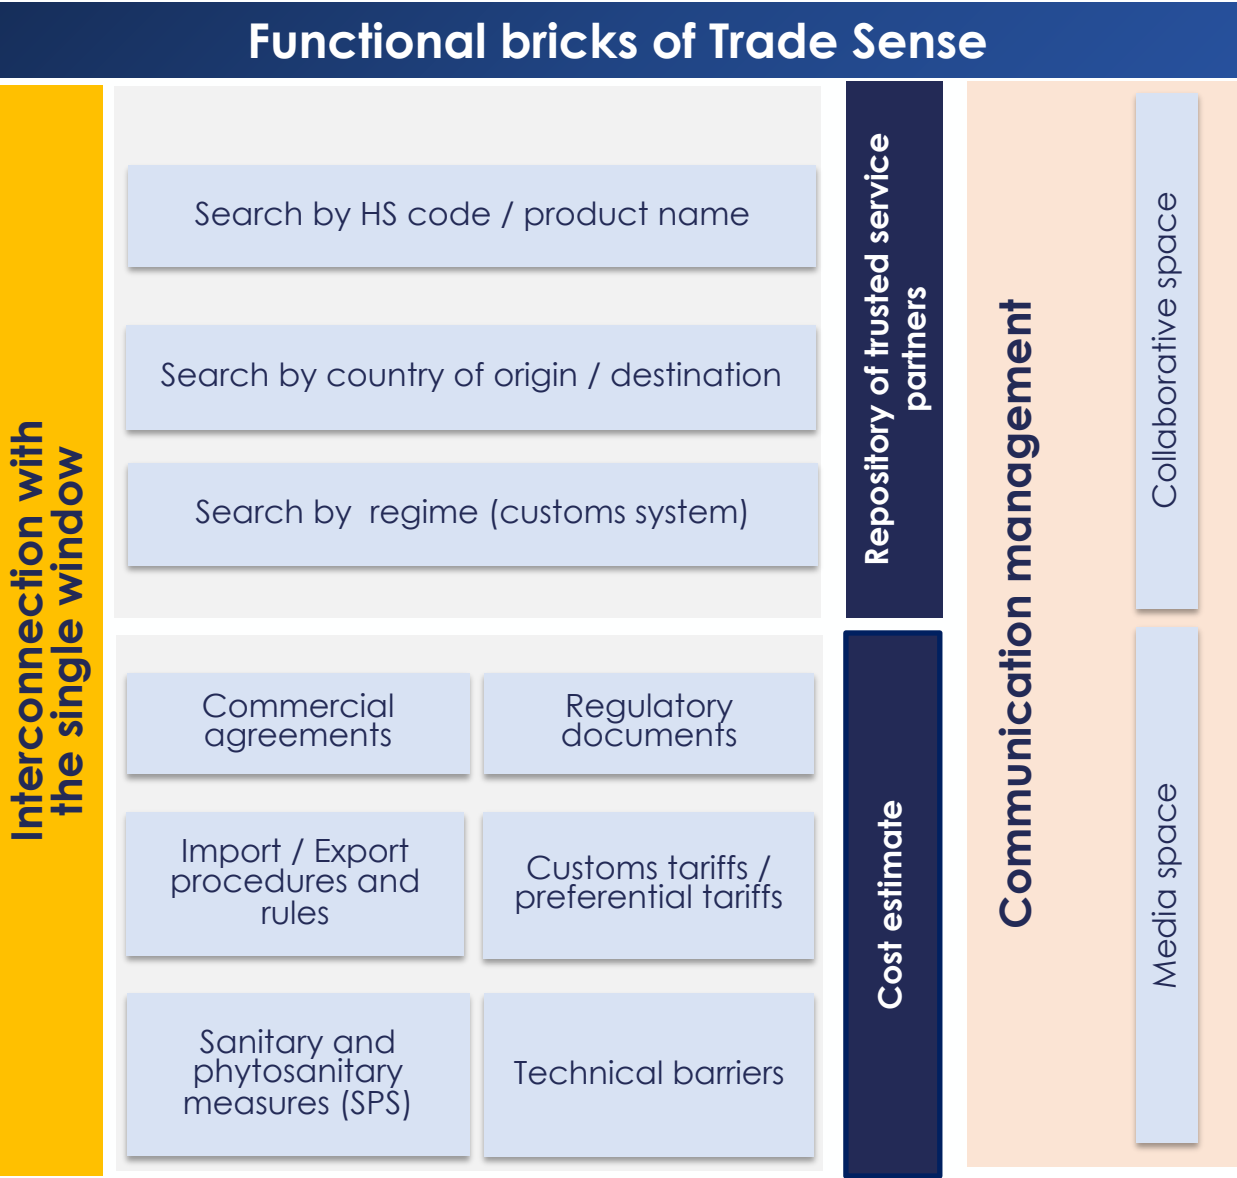

Community platform "Trade Sense"

Trade Sense provides PortNet community with all the information they need to complete their import and export operations. Ultimately, the single window and "Trade Sense" will be integrated to allow smooth navigation between the operational and the information aspects by integrating innovative decision-support tools.
