

## The Czech Natural Gas Sector

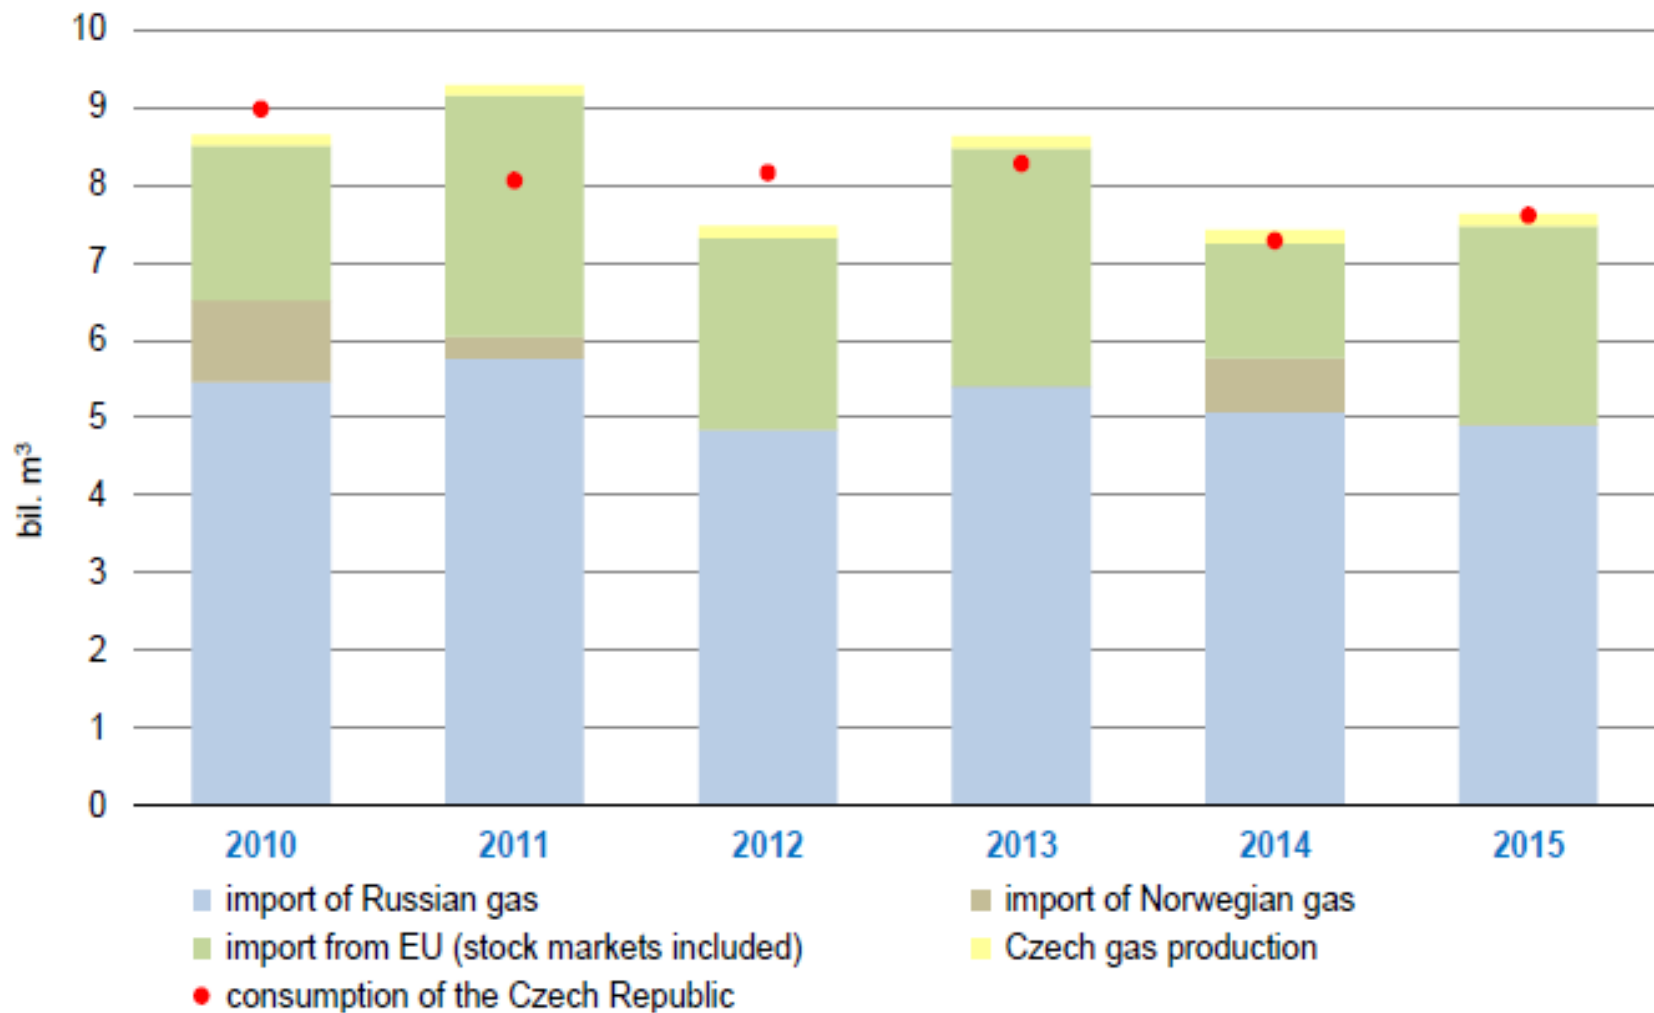

- ➔ **Diversified sources of natural gas** (Russian Federation, Norway, the European Union)
- ➔ **Diversified transportation routes of natural gas** (through Ukraine, Nord Stream, other European transportation networks)
- ➔ **Underground gas storages** (total capacity about 40% of the annual consumption)
- ➔ **Reverse flows of gas in the transportation networks** (all border transfer stations can operate in reverse)
- ➔ **Implementation of the security standards of supplies according to the EU regulation 994/2010 (SoS)**
- ➔ **Support of construction of other storages and cross-border interconnections**

# Primary Energy Sources in the Czech Republic

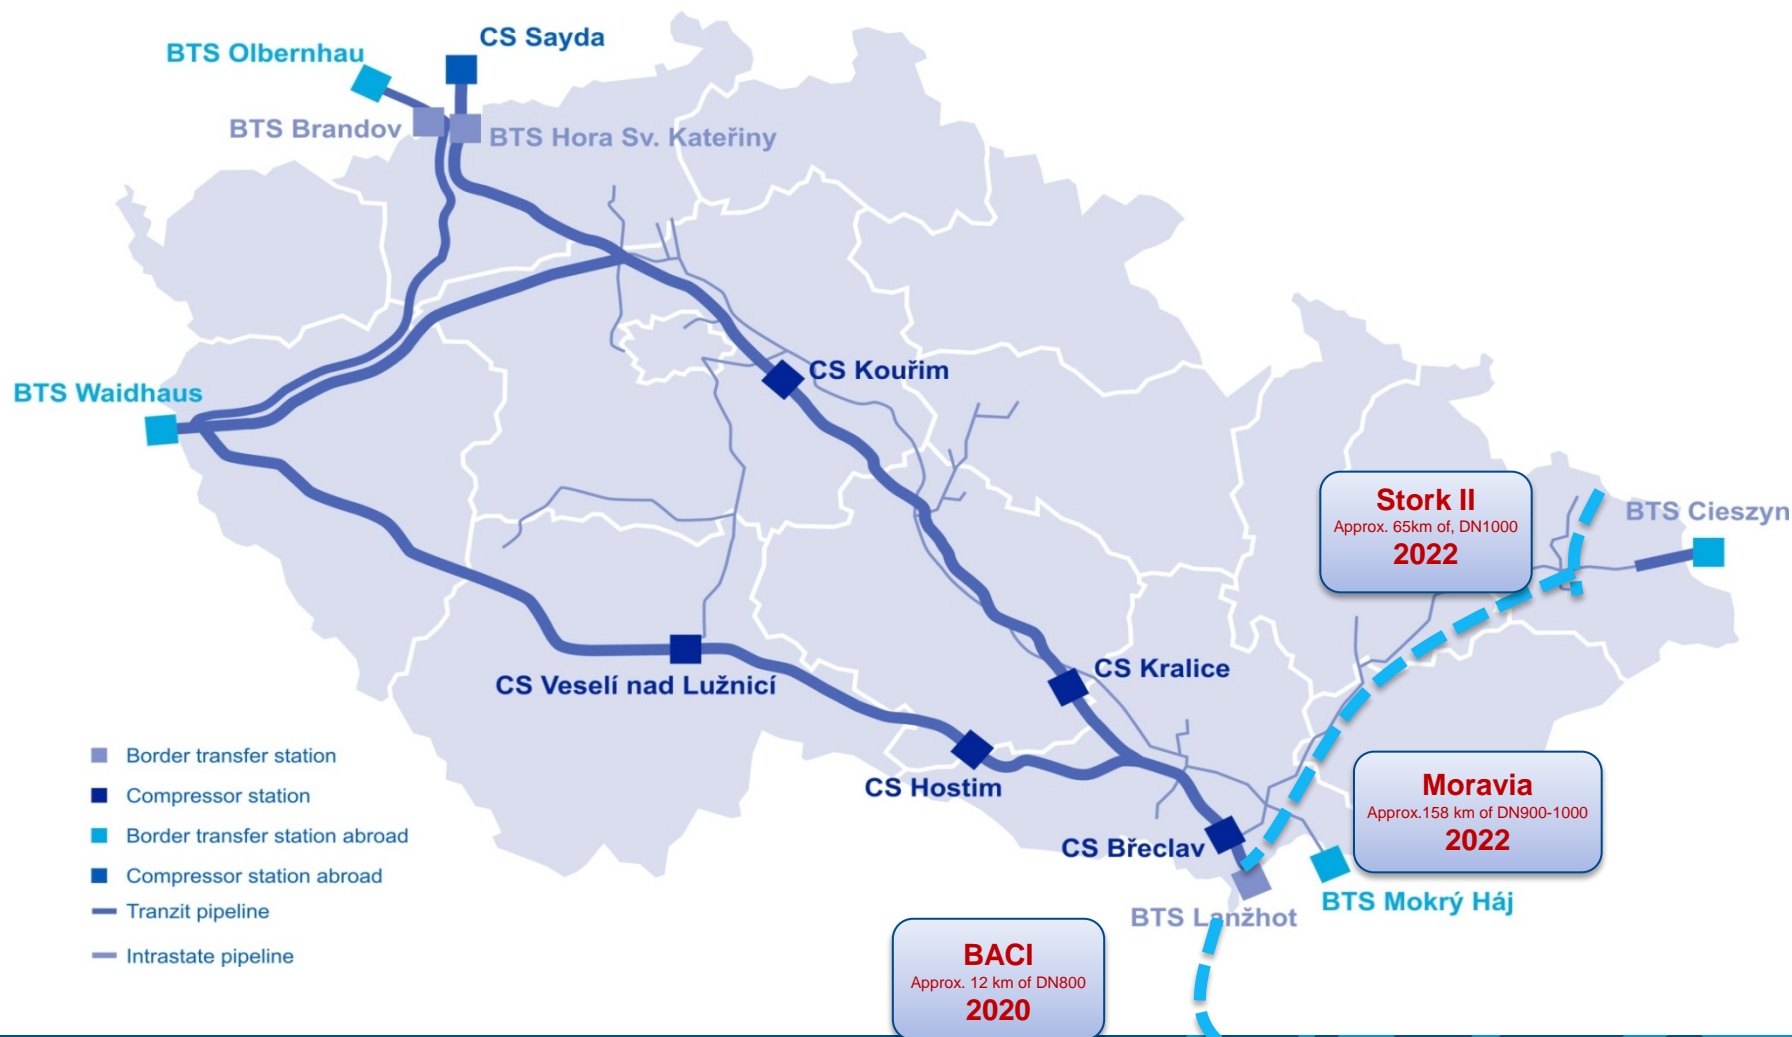

# Imports of natural gas to the Czech Republic

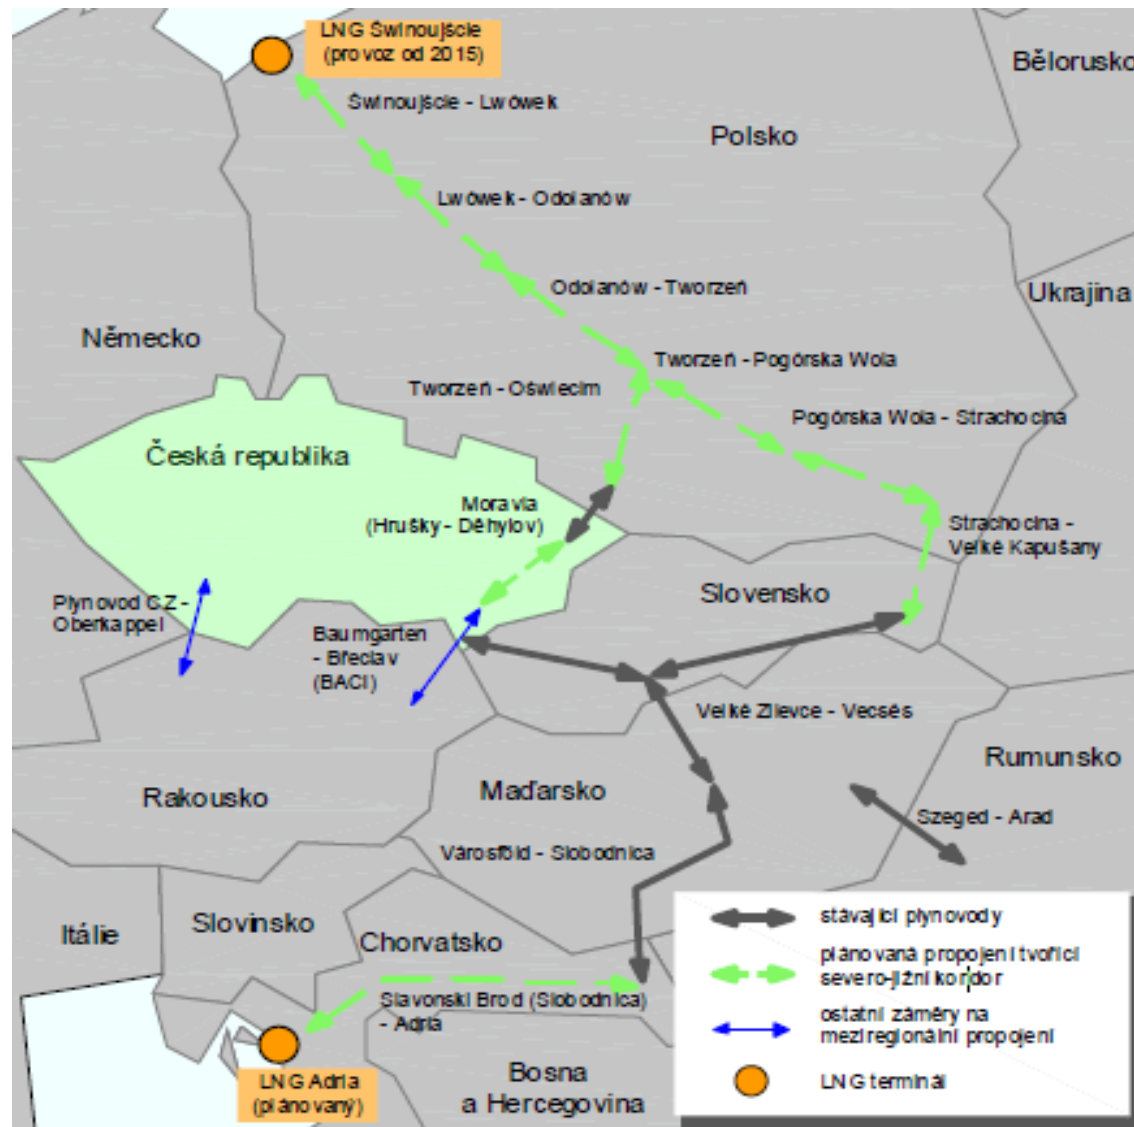

# Total gas quantities consumed in / transited through the Czech Republic

# New investment projects (NET4GAS)

# The North-South corridor

# Underground gas storages
