

The Global Energy Efficiency Accelerator Platform: Overview of Progress

Tim Farrell and Ksenia Petrichenko

19 October 2016 - Workshop on Global Energy Efficiency Accelerator Platform and Progress in Accelerating Industrial Energy Efficiency

**COPENHAGEN CENTRE
ON ENERGY EFFICIENCY**
SE4ALL EE HUB

**7TH INTERNATIONAL
FORUM ON
ENERGY FOR
SUSTAINABLE DEVELOPMENT**
18-21 OCTOBER 2016 • BAKU - AZERBAIJAN

**SUSTAINABLE
ENERGY FOR ALL**

Sustainable Energy for All and the new global commitment to energy efficiency

- United Nations Sustainable Development Goals
 - 17 UN-wide goals; energy efficiency contributes to achieving a number of them.
 - SDG7 on energy: adopts SEforAll's objectives and establishes it as the delivery mechanism for this goal
- SEforAll and the UNFCCC Process
 - At COP21, SEforAll grew the global movement for EE with new commitments from over 100 jurisdictions, 100 companies and 100 financial institutions
 - SEforAll is designated as energy efficiency lead under the Global Climate Action Agenda (GCAA, formerly LPAA), the UNFCCC official engagement mechanism for 'non-state actors': SEforAll will be featured at COP 22

Copenhagen Centre on Energy Efficiency (C2E2)

- Serves as the global Energy Efficiency Hub of SEforALL.
- Coordinates and facilitates the implementation of SEforALL energy efficiency activities globally by:
 - Assisting policy change in countries and cities with knowledge, insights and technical support;
 - Accelerating energy efficiency through innovation in delivery models, public-private partnership formation and project development; and
 - Raising the profile of energy efficiency by communicating success and supporting outreach.
- Hosts the Secretariat for SEforALL's Global Energy Efficiency Accelerator Platform.

SEforALL's Global Energy Efficiency Accelerator Platform

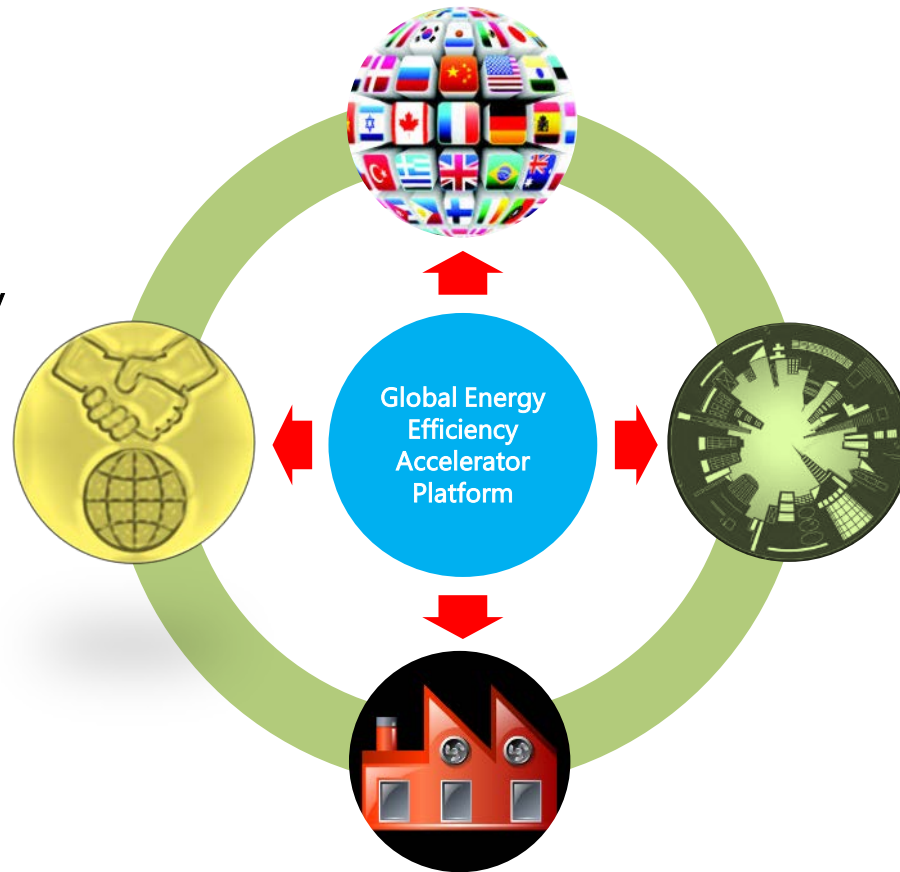

The Accelerator Platform is a key partnership and leadership mechanism for implementing energy efficiency

- Showcasing government and private sector commitments
- Sharing information and creating/brokering implementation partnerships
- Tracking progress and identifying priority opportunities
- Bridging the gap to energy efficiency finance

Our broader partners

- 110 countries developing energy efficiency actions with the Accelerators
- Links to the G20 and UNFCCC processes

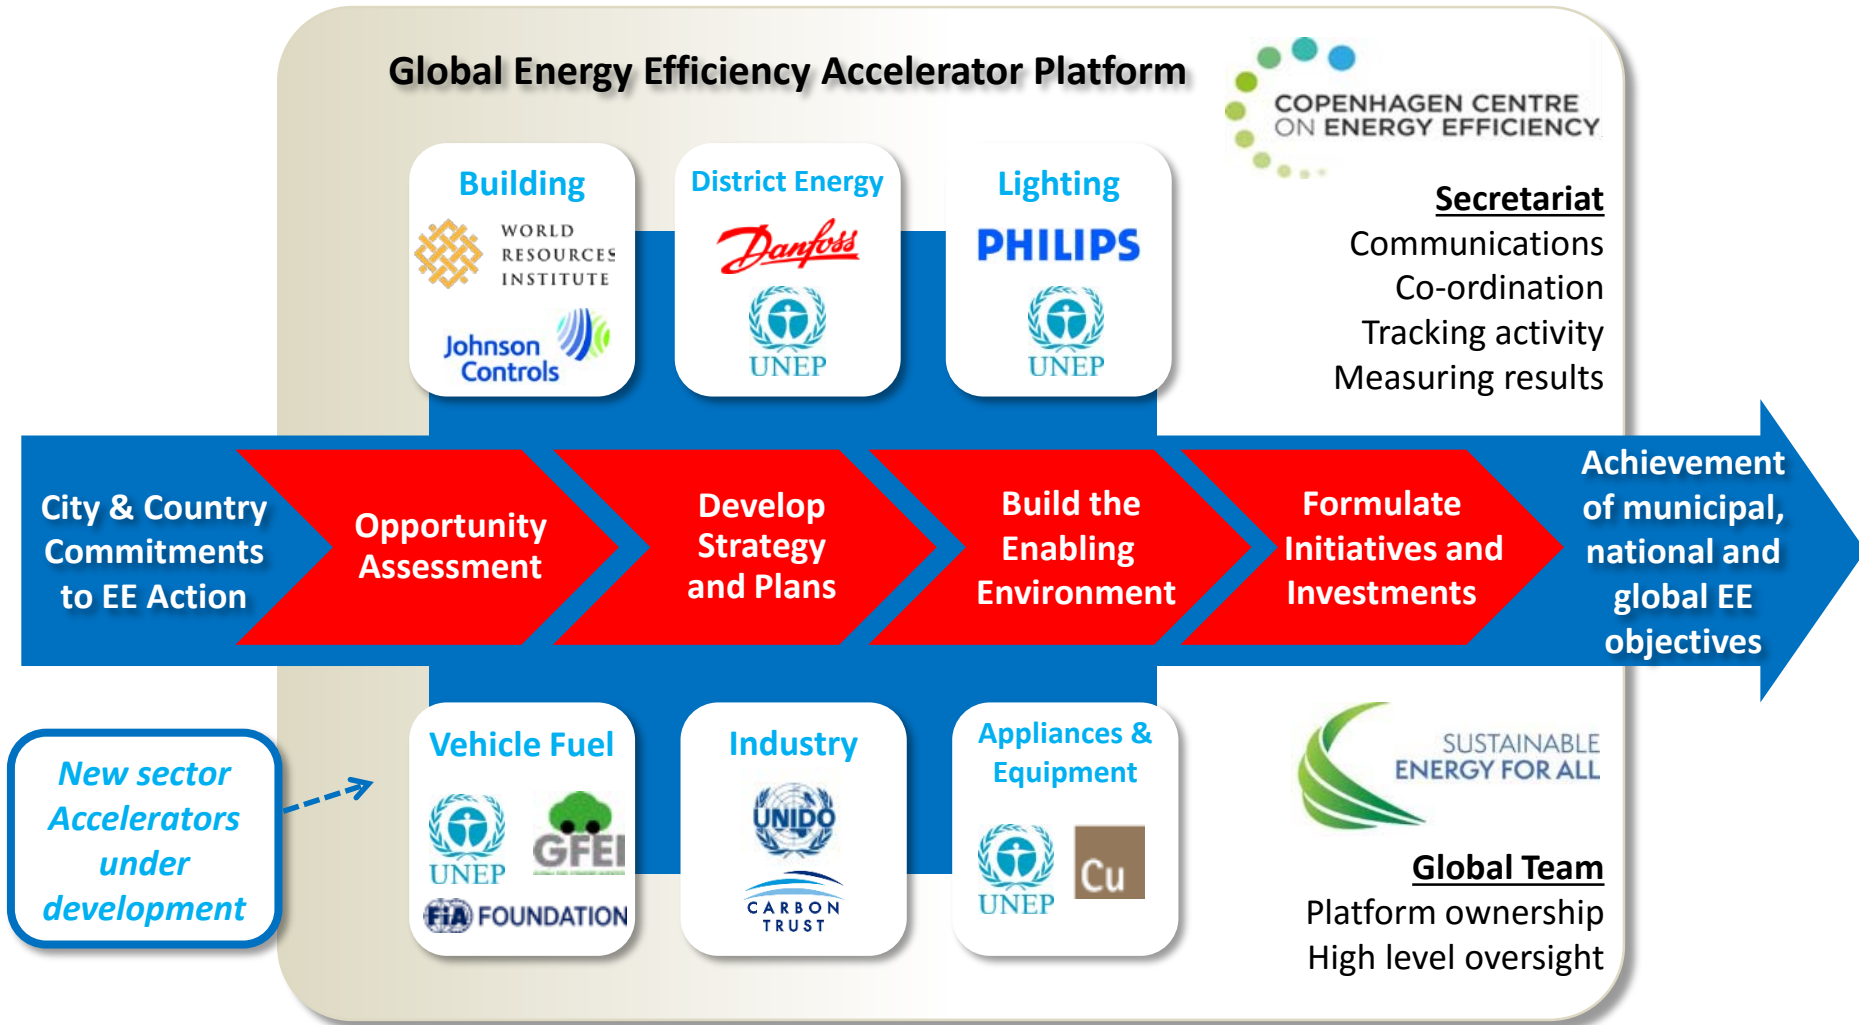

SEforALL's Network and the wider international energy efficiency community

Connection with city initiatives and organizations e.g. C40, ICLEI, Covenant of Mayors

- Comp** • Links with active companies and industry bodies
- Priva** • Links with the Global Alliance on Energy Productivity, Clean Energy Ministerial

The strength of SEforALL's Accelerator Platform

C2E2's City Experts Team

- The GEF-funded Global District Energy in Cities initiative (DES project) is a main activity of the District Energy Accelerator where UN-Environment has been active in establishing city interest in district energy systems
- A major role of C2E2 in the DES project is provided through a City Experts Team, for which we are currently recruiting 3 district energy experts
- The City Team will work full-time over the next three years on the DES project, including on cities in China
- We are looking to engage deployable project experts in other sectors, to support Accelerator scale-up

Enjoy the session!
