

Best Practice Policy Guidelines for LNG

Group of Experts on Gas

21th January 2015 - Geneva

TF Participants

- Alexandre Karasevich (Russia) – Chariman of LNG Task Force
- Dirk van Sloten (IGU)
- Jean Yves Robin (GIIGNL)
- Victor Tuñon (Gas Natural)
- Ramón Diaz (Gas Natural)
- Natasha Udensiva (Columbia University)
- Ben Schlesinger (BSA, US)
- Vladimir Feygin (ROSNEFT Oil Company)
- Luis Ignacio Parada (Enagas)
- Luis Gorospe (REPSOL)
- Pedro Moraleda (Energy Analyst)
- Francisco de la Flor Garcia (Enagas)
- Alfredo Puente (Gas Natural)
- Lucia Mora Ruiloba (Enagas)
- Katherine Spector (Canadian Imperial Bank of Commerce)

Introduction

- Purpose of Task Force on LNG – Gather and communicate key challenges and advantages of LNG to affected publics
- Significant information already developed – avoid duplication!
- Summarize trends in gas supply
- Specific advantages of gas and LNG
 - Ample and increasing gas supplies and fleet
 - Lower carbon emissions, local air quality
 - Flexibility, cost

Program Focus

1. New Uses of LNG, including small scale:
 - Bringing gas to remote areas. (remote gas services)
 - Use of LNG as a transport fuel.
2. Regulatory needs:
 - Implement regulation to facilitate the use of natural gas and LNG, e.g., EU Wobbe restrictions
 - Norms and standards for LNG
3. Advantages of gas and LNG in mitigating climate change.

Target Audience

- Government Policy Makers
- Intergovernmental and industry groups
- Research Institutes & NGOs
- Educational/Academic Institutions
- Climate Advocates
- Others

Timeline

- Formulate program and plan (April 2015)
- Organize presentation materials (throughout 2015)
- Complete report to Group of Gas Exports (Year End 2015)
